Modern Mandarin Chinese Grammar

Modern Mandarin Chinese Grammar provides an innovative reference guide to Mandarin Chinese, combining traditional and function-based grammar in a single volume.

The Grammar is divided into two parts. Part A covers traditional grammatical categories such as phrase order, nouns, verbs, and specifiers. Part B is carefully organized around language functions and notions such as:

• Communication strategies
• Making comparisons
• Giving and seeking information
• Expressing apologies, regrets, and sympathies

The two parts of the Grammar are closely linked by extensive cross-references, providing a grammatical and functional perspective on many patterns. All grammar points and functions are richly illustrated with examples, with a strong focus on contemporary usage.

Main features of the Grammar include:

• Examples given in simplified characters, traditional characters and romanization (pinyin)
• Clear explanations and accessible descriptions
• Particular attention to areas of particular difficulty for learners of Mandarin Chinese

Implementing feedback from users of the first edition of the Grammar, this second edition has been revised throughout to offer expanded explanations, examples, cross-referencing, and indexing and brand new chapters on aspect, resultative verbs, directional verbs, and “ba” sentences.

This is the ideal reference grammar for learners of Mandarin Chinese at all levels, from elementary to advanced. No prior knowledge of grammatical terminology is assumed and a glossary of grammatical terms is provided. This Grammar is accompanied by the Modern Mandarin Chinese Grammar Workbook (978-0-415-83488-9) which features related exercises and activities.

Chapter 50

Claudia Ross and Jing-heng Sheng Ma
Introduction

https://vk.com/readinglecture

This book is divided into two sections: ‘Structures’ and ‘Situations and functions.’

Part A ‘Structures’ is a concise grammar of Mandarin Chinese organized in the familiar and traditional way, providing an overview of the Chinese writing system and describing the major features of Mandarin grammar. This section should be used for reference when you want to know something about a form or structure. For example, if you want to review the structure of the noun phrase, or how to form numbers, or the structure of the passive form, you should consult this section.

Part B ‘Situations and functions’ is organized in terms of how to do things with language, and it is the longer of the two sections. For example, if you want to know how to address someone, how to say ‘no,’ how to make comparisons, or how to apologize, you should consult this section.

Often, the same ground is covered in both parts of this book, although the emphasis is different in each section. Related sections are linked by cross-referencing, indicated by arrows in the margin of the page directing you to another section. Related functions are also cross-referenced throughout the book. You should always follow the cross-reference links so that you have a complete picture of the expression that you are exploring and can use it correctly and accurately.

Topics covered in this book are listed in the table of contents and in the index, and you should use them to help you find words and topics quickly and easily. Notice that the index is an alphabetical listing that includes keywords in English and in Pinyin romanization. For example, if you want to know how to indicate that you have had an experience in the past you can look in the index for the English expression ‘experiential aspect’ or for the word guò (过/過).

In this book, we use traditional grammatical terms to explain the structures of Mandarin. The terms are presented in the glossary at the beginning of this book. Once you are familiar with the grammatical terms you will find them helpful in understanding the grammar and in expressing yourself accurately.

We hope that you will find this book useful and informative. We look forward to learning how you use the book, and to receiving your suggestions on how it can be improved.

How to use this book

This book brings together two different types of resources to help you to understand Mandarin Chinese. They are presented in two parts: Part A: ‘Structures’ and Part B: ‘Situations and functions.’

When you want to review some aspect of Mandarin grammar such as how to describe a noun or where to put the prepositional phrase in a sentence, you should consult Part A. On the other hand, when you want to know how to apologize, or how to address someone, or how to emphasize something, you should consult Part B. Some topics are covered in more than one chapter of the book. For example, the verb suffix 过/過 guò is included in ‘Structures’ in Chapters 11, 13, and 17, and also in ‘Situations and functions’ in Chapter 37, ‘Indicating completion and talking about the past.’ Arrows in the left-hand margin of each page indicate additional sections of the book in which a topic is discussed. You should follow the cross-references and read everything about the topic that you are exploring in order to get a full picture of its structure and functions.

Some topics can be expressed differently depending upon the level of formality in a specific situation. Where appropriate, we have indicated the level of formality associated with expressions. See, for example, ‘Prepositions and prepositional phrases’ (Chapter 14, section 14.2.8) and ‘Greetings and goodbyes’ (Chapter 24, section 24.3).

This book provides the most common ways of expressing the major structures and functions in Mandarin. Native speakers of Mandarin differ in their use of some expressions, and we have tried to note standard variations. In your study of Mandarin, you will come across structures and expressions that are not included in this book. You should add them to your repertoire as you continue to strengthen your language skills.

To help you to consolidate your overall knowledge of Chinese, we begin this book with a brief overview of Mandarin pronunciation and an introduction to the Chinese writing system. For a more detailed coverage of pronunciation, consult a beginning level Mandarin textbook. For more information about the Chinese writing system, consult the references cited in the Acknowledgments.

Glossary of grammatical terms

Adverbs
Adverbs are words that precede and modify a verb or verb phrase.

他们都很忙。
They are all very busy.

弟弟已经回家了。
Younger brother already went home.

Sentence adverbs occur at the beginning of a sentence and indicate the relationship of information in a conversation or written text.

孩子小的时候，父母照顾他们。后来，父母老了，该是孩子照顾父母了。
When children are young, parents take care of them. Afterwards, when the parents are old, the children should take care of the parents.

Classifiers
Classifiers are words that occur after a number and/or specifier and before a noun. Some grammars refer to classifiers as ‘measure words.’ Classifiers often need not be translated into English.

Clauses
Clauses are dependent sentences, that is, sentences that occur within a larger sentence.

Some verbs take clauses as their objects:

她说她今天很忙。
She said she is very busy today.
Glossary of Grammatical Terms

我知道他没有钱。
Wǒ zhīdào tā méi yǒu qián.
I know he doesn’t have any money.

Clauses may also serve as subjects:

她昨天跟你说话并不表示她愿意当你的女朋友。
Tā zuótiān gēn nǐ shuō huà bìng bù biǎoshì tā yuàn yì dāng nǐ de nǚ péngyou.
(The fact that) she spoke with you yesterday does not mean that she is willing to be your girlfriend.

Complements

Some Mandarin grammars distinguish a class of verb complements, words or phrases that follow the verb and augment its meaning in some way. Included in the class of verb complements are result complements, potential complements, directional complements, manner complements, and degree complements. These various verb complements participate in different grammatical structures and perform different communication functions, and we therefore do not group them together in this book. Complements of result and direction participate in the same kinds of grammatical structures, and we discuss them in Chapters 18 and 19, along with their potential forms. We also discuss complements of result along with other structures that function to indicate result in Chapter 32. Complements of degree function as intensifiers for adjectival verbs, and we discuss them in Chapter 10. Complements of manner function to indicate the way that actions are performed, and we discuss them in Chapter 31. Here are the sections of this book in which each complement is included.

Result complements
► 18, 32.1

Directional complements
► 19, 48.8

Potential complements
► 18.6, 19.5, 32.2

Degree complements
► 10.3

Manner complements
► 31.3

Conjunctions

Conjunctions are words that connect two nouns or noun phrases to form a noun phrase.

妈妈和爸爸都会说中国话。
Māma hé bāba dōu huì shuō Zhōngguó huà.
Mom and Dad can both speak Chinese.

GLOSSARY OF GRAMMATICAL TERMS

Final particles

Final particles are syllables that occur at the end of the sentence and indicate a speech act or speaker perspective.

我们吃饭吧！
Wǒmen chī fàn ba!
Let’s eat! (suggestion)

我们吃饭吧！
Wǒmen chī fàn ba!
Let’s eat! (suggestion)

我們吃飯吧!
Wǒmen chī fàn ba!
Let’s eat! (suggestion)

我得走了。再不走就晚咯。
Wǒ děi zǒu le. Zài bù zǒu jiù wǎn lo.
I’d better go now. If I don’t go, I will be late. (obviousness)

Grammatical particles

Grammatical particles are syllables that convey grammatical meaning, for example 的 de (noun modification), 得 de (postverbal adverbial modification), 地 de (preverbal adverbial modification), 了 le (completed action), 着/著 zhe (duration).

Indirect objects see Objects

Intensifiers

Intensifiers are words that precede and modify stative verbs, adjectival verbs, and modal verbs.

我很喜歡他。
Wǒ hěn xǐhuan tā.
I like him a lot.

我很喜歡他。
Wǒ hěn xǐhuan tā.
I like him a lot.

我很喜歡他。
Wǒ hěn xǐhuan tā.
I like him a lot.

那本书太贵了。
Nà běn shū tài guì le.
That book is too expensive.

你真会跳舞。
Nǐ zhēn huì tiào wǔ.
You can really dance.

Nouns

Nouns are words that can be directly preceded by a specifier and/or number + classifier.

一書
yī běn shū
one book

一書
yī běn shū
one book

Noun phrases

Noun phrases are nouns and their modifiers.

Numbers

Number words.

Objects

There are two different types of objects, direct and indirect.

The direct object is generally the noun phrase affected by or created by the action of the verb. The direct object generally follows the verb, though it may also be topicalized (see Topics).
I read books in the library every day.

I have already eaten dinner.

The indirect object refers to the recipient of the object noun phrase. In Mandarin, only a small number of verbs take a direct and indirect object. These include 给/給 gěi ‘give’ and 送 sòng ‘present as a gift.’ In all cases, the indirect object precedes the direct object.

For most verbs, the recipient is expressed as the object of a preposition and not as an indirect object.

Predicates

The predicate of a sentence includes a verb and any object(s) or complements of the verb. It may also include negation, adverbs, prepositional phrases, and phrases that indicate time when, duration, or frequency.

Prepositional phrases

Prepositional phrases consist of a preposition and its following noun phrase. In Mandarin, the prepositional phrase typically precedes the verb phrase.

Prepositions

Prepositions are words that indicate the relationship of a noun phrase to a verb, for example

在 zài ‘at,’ 到 dào ‘to,’ 给/給 gěi ‘to/for,’ 替 tì ‘for.’
Pronouns

Pronouns are words that take the place of a noun or noun phrase.

王明是学生。 他是学生。
Wáng Míng shì xuésheng. Tā shì xuésheng.

我不认识那两个人。 不认识他们。
Wǒ bù rènshi nà liǎng gè rén. Wǒ bù rènshi tāmen.

Sentences

Normally, a full sentence includes a subject and a predicate. The sentence may begin with a topic.

topic + subject + predicate

那个孩子,脾气很坏。
Nàge háizi, píqi hěn huài.
That child has a bad temper. (lit. ‘That child, the temper is bad.’)

Specifiers and demonstratives

Specifiers are words that translate as ‘this/these’ or ‘that/those’ and describe a noun.

这本书很有意思。
Zhè běn shū hěn yǒu yìsi.
This book is very interesting.

These same words, when used to ‘point’ to an object, are ‘demonstratives.’

这是中国毛笔。
Zhè shì Zhōngguó máobǐ.
This is a Chinese writing brush.

Subjects

The subject is the noun or noun phrase about which information is provided in the predicate. In Mandarin, the subject of a sentence occurs before the verb phrase. It can be omitted if it is understood from the overall context of the sentence. Typically, a subject is omitted if it is identical in reference to the subject of the preceding sentence.

我看了电影。( ) 九点钟就回家了。
Wǒ kàn le diànyǐng. ( ) jiǔdiǎn jiù huí jiā le.
I saw a movie. At nine o’clock I returned home.
Topics
Generally speaking, the topic is the noun or noun phrase that the sentence, paragraph, or narrative is about. The topic occurs at the beginning of a sentence, and is often distinct from the subject.

中国菜，我特别喜欢吃家常豆腐。
Zhōngguó cài, wǒ tèbié xǐhuan chí jiācháng dòufu.
(As for) Chinese food, I especially like to eat homestyle beancurd.

In Mandarin, the object of the verb may sometimes occur in ‘topic’ position, at the beginning of the sentence, before the subject.

羊肉，我不太喜欢吃。
Yángròu, wǒ bù tài xǐhuan chī.
Mutton, I don’t particularly like to eat (it).

A sentence need not begin with a topic.

Verbs
Verbs are words that can be directly negated, or modified by an adverb, or that can serve as the ‘yes’ answer to yes–no questions. Verbs are the main word in the predicate, and a Mandarin sentence must include a verb. Verbs that take one or more objects are called transitive, and verbs that do not take an object are called intransitive. Mandarin has the following types of verbs.

Adjectival verbs
Adjectival verbs are verbs that can be translated as adjectives in English, for example 大 dà ‘big,’ 好 hǎo ‘good,’ 贵/貴 guì ‘expensive.’ Adjectival verbs are usually intransitive. Note that adjectival verbs do not occur with 是 shì ‘be.’

Say this         Not this
他很高。         *他是很高。
Tā hěn ɡāo.     Tā shì hěn ɡāo.
He is very tall.

Stative verbs
(a) Stative verbs are verbs that express states, for example 喜欢/喜歡 xǐhuan ‘like,’ 像 xiànɡ ‘resemble.’

我喜欢他。
Wǒ xǐhuan tā.
I like him.

(b) Stative verbs are linking verbs, for example 是 shì ‘be,’ 姓 xìnɡ ‘be family named,’ 有 yǒu ‘have, exist.’

她有很多朋友。
Tā yǒu hěn duō péngyou.
She has many friends.
Modal verbs

Modal verbs are verbs that express ability, permission, or obligation, for example 会/會 hui ‘can’ (mentally able), 能 néng ‘can’ (physically able), 可以 kěyǐ ‘may’ (have permission), 得 dé ‘must/have to.’ Modal verbs can serve as the one word answer to yes–no questions, but in complete sentences they are always followed by a verb phrase complement.

Action verbs

Action verbs are verbs that refer to events. There are two kinds of action verbs:
- Open-ended action verbs express open-ended actions, such as 跑 pāo ‘run,’ 写/寫 xiě ‘write,’ and 听/聽 tīng ‘listen.’ Most open-ended action verbs in Mandarin are transitive.
- Change-of-state action verbs express actions that refer to a change of state and have no duration, such as 坐 zuò ‘sit (down),’ 忘 wàng ‘forget,’ and 放 fàng ‘put (down), place.’

Verb complements (see Complements)

Verb phrases

The verb phrase includes the modal verb, the verb, and any objects of the verb. (See also Predicates)

他每天看电视。
他每天看電視。
Tā měitiān kàn diànsì. He watches television every day.
爸爸给我钱。
爸爸給我錢。
Bàba gěi wǒ qián. Dad gives me money.
他会开车。
他會開車。
Tā huì kāi chē. He can drive (a car).
我请你吃晚饭。
我請你吃晚飯。
Wǒ qǐng nǐ chī wǎnfàn. I invite you to eat dinner.

A note on grammatical categories and grammatical category shift

In Mandarin, a word may belong to more than one grammatical category. For example, some words may serve as both a verb and a preposition.

<table>
<thead>
<tr>
<th>Verb</th>
<th>Preposition</th>
</tr>
</thead>
<tbody>
<tr>
<td>给/給</td>
<td>gěi</td>
</tr>
<tr>
<td>到</td>
<td>dào</td>
</tr>
<tr>
<td>在</td>
<td>zài</td>
</tr>
</tbody>
</table>
Out of context, it is not possible to say whether the word 给/給 gěi or 到 dào or 在 zài is a preposition or a verb. However, in the context of a sentence or phrase, the category of the word is clear:

**Preposition**

我想去中国。
我想去中國。

Wǒ xiǎng dào Zhōngguó qù.
I want to go to China.

**Verb**

你什么时候到？
你甚麼時候到？

Nǐ shénme shíhòu dào?
When are you arriving?

Some textbooks and grammars provide special labels for words that can function as more than one category of word. For example, the label ‘coverb’ is used in many textbooks for words that can be both prepositions and verbs.
A note on Chinese characters
https://vk.com/readinglecture

Certain traditional characters have more than one standard form. Here are some examples. This book uses the characters in the first column. An overview of the origin, structure, and systems of Chinese characters is presented in Chapter 3.

裏 裏 lǐ
著 着 zhè
叫 叫 jiào
為 爲 wèi

In addition, the word zuò when used as the verb ‘do’ can be written as 做 or 作. This book uses the form 做. In compounds such as 工作 gōngzuò ‘work,’ zuò is written as 作.

Overview of pronunciation and Pinyin romanization

1.1 The Mandarin syllable

The syllable in Mandarin Chinese can be made up of three parts: an initial consonant, a final, and a tone. For example, the syllable 麻 má is made up of the initial m, the final a, and the rising tone [ˊ]. Syllables need not have an initial consonant. The syllable 饿 è is made up of the final e and the falling tone [ˋ]. In addition, a syllable may lack a tone. Syllables that do not have a tone are referred to as having neutral tone.

This section presents a brief overview of the initials, finals, and tones of Mandarin. Initials and finals are presented in Pinyin romanization. For a guide to their pronunciation, please consult a beginning level Mandarin textbook.

1.1.1 Initials

The Mandarin initials are presented here in the traditional recitation order:

<table>
<thead>
<tr>
<th>Type of sound</th>

</thead>
<tbody>
<tr>
<td>1 bilabial</td>

<tr>

<td>j q x</td>
</tr>
<tr>
<td>5 retroflex</td>
<td>zh ch sh r</td>
</tr>
<tr>
<td>6 alveolar affricate/fricative</td>
<td>z c s</td>
</tr>
</tbody>
</table>

1.1.2 Finals

Finals are listed by initial vowel.

- a finals          a an ang ai ao
- o/e finals        o e en eng ei ou ong er
- u finals          u ua uo uai ui uan un uang ueng
- i finals          i ia iao ie iu ian in iang ing iong
- ü finals          ü üe üan ün

1.1.3 Tones

Tone is the pitch contour of the syllable. Mandarin has four contour tones and a neutral tone. In most romanization systems of Mandarin, the tone is indicated by a diacritic over a vowel, or as a number following the syllable.
The following chart illustrates the contour of the four Mandarin tones when a syllable is spoken in isolation, that is, when it is neither preceded nor followed by another syllable.

1. level pitch  
2. rising pitch  
3. falling-rising pitch  
4. falling pitch  

The contour of a tone may change depending upon the following syllable. This is often called tone sandhi. Tone change is typically not indicated in the Pinyin spelling of words.

The third tone is the only tone that changes independent of the meaning of the syllable.

When a third tone occurs before another third tone, it is pronounced as a rising (second) tone.

\[3 + 3 \rightarrow 2 + 3\]

\[\text{hěn hǎo} \rightarrow \text{hén hǎo}\  \text{很好} \ \text{very good}\]

When a third tone occurs before any other tone, it is pronounced as a low tone. This low tone is often called a half third tone.

\[\text{mǎi shū} \rightarrow \text{mai shū} \ \text{买书} / \text{買書} \ \text{buy books}\]

Tone is an inherent part of the Mandarin syllable, and Mandarin uses tones to distinguish meaning in the same way that the choice of a consonant or a vowel distinguishes meaning. Notice how tone determines the meaning of the following syllable.

Tone

1. \[mā (ma1) \text{ 妈 / 媽} \text{ mother}\]
2. \[má (ma2) \text{ 麻} \text{ numb}\]
3. \[mǎ (ma3) \text{ 马 / 馬} \text{ horse}\]
4. \[mà (ma4) \text{ 骂 / 罵} \text{ scold}\]
neutral \[ma (ma5) \text{ 吗 / 嗎} \text{ question particle}\]

**Pinyin romanization**

Mandarin is written with Chinese characters, but characters do not provide consistent information about pronunciation. Therefore, Mandarin is typically studied via a transcription. Many transcription systems have been devised for Mandarin Chinese in China and in the West. Most of these are based on the Roman alphabet, and are therefore termed ‘romanization’ systems. In 1958, the People’s Republic of China established *Hanyu Pinyin* (usually referred to as Pinyin) as its standard romanization system. Because of the widespread use of this system of Pinyin in Chinese language teaching around the world, it is used to transcribe the Chinese words in this book.

**Placement of tone mark in Pinyin**

If a final includes three vowels, or two vowels and a final consonant, the tone mark is written over the second vowel:

\[\text{kuài huán biān qióng}\]

If a final includes two vowels and no final consonant, the tone mark is placed over the first vowel, unless the first vowel is \(i\) or \(u\):

\[\text{āi áo ěi òu}\]
\[\text{iā ié iǔ}\]
\[\text{uà ué uǐ uò}\]
Some additional Pinyin conventions

- 'u' after the initials j, q, and x is pronounced ü but is written as u.
- When 'i' and 'ü' begin a syllable, they are written as yi and yu.
- When 'u' begins a syllable, it is written as wu.
- In two-syllable words, when the boundary between syllables is not clear from the Pinyin spelling and more than one interpretation of the boundary is possible, an apostrophe is used to separate the syllables. For example, if the second syllable begins with a vowel, an apostrophe is used: Xi’an 西安 vs. xiān 先.
Syllable, meaning, and word

2

The special status of the Mandarin syllable

2.1

The syllable and meaning

One of the features of Chinese is that each syllable is associated with a meaning. For example, the Mandarin word for bus station/train station or bus stop/train stop is 车站 chēzhàn. The syllable 车 chē means vehicle and the syllable 站 zhàn means stand. Occurring together as a word, 车站 chēzhàn is very nearly the sum of its parts: vehicle stand.

Some words in English have the kind of structure that Mandarin has, but for most English words, syllables need not have independent meaning. For example, the English word ‘lettuce’ consists of two syllables: ‘let’ and ‘tuce.’ These individual syllables do not have meaning on their own, and it makes no sense to ask about the meaning of ‘let’ or of ‘tuce’ in the word ‘lettuce.’ In contrast, with very few exceptions, the individual syllables of Mandarin words have identifiable meanings, and when learning new words, it makes good sense to note the meanings of the individual syllables.

1 In Chinese, a small number of syllables are not associated with a meaning. The most common is the noun suffix 子 zi. See 2.2.1.1.

2 A multi-syllable Mandarin word is not always simply the sum of its parts. For example, the word 故事 gùshì ‘story’ is composed of the syllables 故 gù ‘former, previous’ and 事 shì ‘situation, incident.’

2.1.2

The syllable and Chinese characters

In Chinese, the syllable is associated with a Chinese character as well as a meaning. When a syllable is associated with more than one meaning, it is generally the case that each meaning is written with a different character. For example, Mandarin has a number of meanings associated with the pronunciation zhàn. Each meaning is written with a different character:

蘸 zhàn dip in liquid (like a pen in ink)
占/佔 zhàn occupy
战/戰 zhàn fight
栈/棧 zhàn storehouse
绽/綻 zhàn split; burst open
站 zhàn to stand; a stop, a stand

Because of these differences, the status of the syllable is much more important in Chinese than in English. Conversely, the status of the word is less important in Chinese than in English.
Multi-syllable tendency in Mandarin words

Although Mandarin syllables have meanings, they often combine to form words. Here is a short list of Mandarin syllables and words that they form.

### Strategies that create and maintain the two-syllable word

The most common length of Mandarin words is two syllables, and a number of common word formation strategies exist which help to create and maintain the two-syllable word.

#### 2.2.1.1 The suffix 子 zǐ

One-syllable words may be turned into two-syllable words by the addition of the suffix 子 zǐ. This suffix adds little or no meaning to the word. It usually occurs in neutral tone (zǐ).

Some nouns occur in contemporary Mandarin only with the 子 zǐ suffix, for example 孩子 háizi ‘child,’ 房子 fángzi ‘house,’ 屋子 wūzi ‘room,’ 本子 běnzi ‘notebook,’ 袜子 wàzi ‘socks.’

Some words can occur with or without the suffix. These include 车/車 chē → 车子/車子 chēzǐ ‘car,’ 鞋 xié → 鞋子 xiézǐ ‘shoe,’ 盘/盤 pán → 盤子/盤子 pánzǐ ‘plate,’ 票 piào → 票子 piàozǐ ‘ticket.’

In the Beijing dialect of Mandarin, the suffix 尺/兒 (é)r is routinely added to words in many categories, especially to nouns and classifiers. 尺/兒 r suffixation adds a retroflex (r) sound but no additional syllable to the word. If a word ends in a final consonant, the 尺/兒 r suffix replaces the final consonant: 份 fèn → 份儿/份兒 fèr ‘a portion,’ 玩 wán → 玩儿/玩兒 wán ‘to play,’ 电影/電影 diànyìng → 电影儿/電影兒 diànyīr ‘movie,’ etc. The suffix may also replace a vowel in the final: 孩子 hái → 孩儿/孩兒 hár ‘child.’

In this book, we write -r suffixed words in terms of their changed pronunciation. That is, we write wán or wán’er.

#### 2.2.2 Location suffixes

Location words may be suffixed with 头/頭 tóu, 面/面 miàn, or 边/邊 biān to make them two-syllable words: 下头/下头 xiàtou ‘below,’ 外面 wàimian ‘outside,’ 左边/左邊 zuǒbiān ‘left side,’ etc.

In Mandarin spoken in southern China and Taiwan, the specifiers 这/這 zhè, 那/那 nà, 哪/哪 nǎi are suffixed with 里/裏 when they are used as location words: 这里/這裏 zhèlǐ ‘here,’ 那里/那裏 nàlǐ ‘there,’ and 哪里/nǎlǐ ‘where?’

---

7.3, 47.1
Abbreviation
Words and phrases that are longer than two syllables are often abbreviated to two syllables. The two syllables that form the new, abbreviated word are typically the first syllable of each of the words in the phrase or the first two syllables of the first word in the phrase, though other combinations occur.

超级市场/超級市場 chāojí shìchǎng supermarket → 超市 chāoshì
公共汽车/公共汽車 gōnggōng qìchē public bus → 公车/gōngchē
飞机场/飛機場 fēijīchǎng airport → 机场/jīchǎng

Word-specific tone changes
In addition to the tone changes mentioned in section 1.1.3 for all third-tone syllables, there are certain tone changes that occur in specific words.

Tone change in the word 不 bù
不 bù changes to bú when it occurs before another fourth-toned syllable in the same word, phrase, or breath group:

4–4 → 2–4
di bù duì → bú duì
not correct
bù bì → bú bì
need not

Tone change in the numbers — yī ‘1,’ qī ‘7,’ and bā ‘8’
The tone of the numbers — yī ‘1,’ and, less commonly, qī ‘7,’ and bā ‘8’ may change to second tone yí, qí, and bá before a fourth-toned syllable in the same word, phrase, or breath group:

1–4 → 2–4
yīgòng → yígòng
altogether
yídìng → yídìng
certainly
yī bèizi → yí bèizi
a lifetime
qī kuài qián → qí kuài qián
seven dollars
bā bèi → bá bèi
eightfold
In addition, 一 yī changes to fourth tone before syllables with first, second, or third tone.

In Beijing and northern China, certain syllables lose their original tone and are pronounced as neutral tone. This tone change does not occur in Taiwan, where all syllables retain their original tones.

1.1.3 The complete conditions for change to neutral tone are complex, but here are some general rules for the change of a second syllable to neutral tone.

- The second syllable is a repetition of the first syllable:
  - 太太  tàitài → tàitai
  - 弟弟  dìdì → didi
  - 谢谢/謝謝  xièxiè → xièxie
  - 看看  kànkàn → kànkan

- The second syllable is a suffix that does not contribute a meaning to the word. This includes the suffix 子 zǐ and the directional suffixes 头/頭  tóu, 面  miàn, and 边/邊  biān:
  - 孩子  háizǐ → háizì
  - 里头/裏頭  lǐtóu → lítou
The meaning of the second syllable is the same as or overlaps with the meaning of the first syllable:

\[ \text{tone-tone} \rightarrow \text{tone-neutral} \]

- 衣服 clothing \quad \text{yīfú} \rightarrow \text{yīfu}
- 衣 \quad \text{yī} \quad \text{clothing}
- 服 \quad \text{fú} \quad \text{clothing}
- 事情 matter/situation \quad \text{shìqíng} \rightarrow \text{shìqing}
- 事 \quad \text{shi} \quad \text{situation}
- 情 \quad \text{qíng} \quad \text{situation}

The second syllable retains its tone when it adds to and expands the meaning of the first syllable. Examples include:

- 学期/學期 \quad \text{xuéqī} \rightarrow \text{xuéqī}
  - semester
  - study
- 作法 \quad \text{zuòfǎ} \rightarrow \text{zuòfǎ}
  - method of doing
- 看完 \quad \text{kànwán} \rightarrow \text{kànwán}
  - finish reading

Sometimes, the use of full or neutral tone in the second syllable makes a difference in meaning. Here are two examples:

- 老子 \quad \text{Lǎo Zǐ} \quad \text{Laozi, the Taoist philosopher}
- 老子 \quad \text{lǎozi} \quad \text{used to refer to one’s father, or, humorously, to oneself}
- 孙子 \quad \text{Sūn zǐ} \quad \text{5th C BC treatise on the art of war}
- 孙子 \quad \text{sūnzi} \quad \text{grandson}

### Incorporating foreign words and naming foreign objects

Chinese has not borrowed freely from other languages. However, when it incorporates foreign words into the language, it typically uses the following strategies:

- Adapting the foreign pronunciation to conform to the syllable structure of Chinese.

**Names**

- 罗斯福/羅斯福 \quad \text{Luósīfú} \quad \text{Roosevelt}
- 加缪/加繆 \quad \text{Jiāmóu} \quad \text{Camus}
- 丘吉尔/邱吉爾 \quad \text{Qiūjí’ěr} \quad \text{Churchill}
- 拿破仑/拿破崙 \quad \text{Nápòlún} \quad \text{Napoleon}
- 莎士比亚/莎士比亞 \quad \text{Shāshìbìyà} \quad \text{Shakespeare}

1. Forming new words based on meaning or function.
2. When new items enter China, they often lose their foreign pronunciation and get new Chinese names that reflect their meaning or function. Here are some examples:

- 电视/電視 | diànshì | television (electric vision) |
- 电脑/電腦 | diànnǎo | computer (electric brain) |
- 微波炉/微波爐 | wēibō lú | microwave oven (micro-wave-stove) |
- 手机/手機 | shǒuji | cell phone/mobile phone (hand machine) |
- 热狗/熱狗 | règǒu | (lit.) hot dog |
- 卫星/衛星 | wèixīng | satellite (protection star) |

3. Forming new words based on meaning while preserving the foreign pronunciation.

- 万维网/萬維網 | wàn wéi wǎng | the World Wide Web (a net of 10,000 connections) |
- 可乐/可樂 | kělè | cola (it can make you happy) |
- 拖拉机/拖拉機 | tuōlājī | tractor (drag pull machine) |
- 摩托车/摩托車 | mótuō chē | motorcycle (a vehicle you touch and support with your hands) |
- 信用卡 | xìnyòng kǎ | credit card (trust card) |
- 吉普车/吉普車 | jípǔ chē | jeep (lucky widely used vehicle) |

Foreign companies often follow this principle when translating the names of their companies and their products into Chinese.

- 可口可乐/可口可樂 | Kěkǒukělè | Coca Cola [soft drink] (pleasant to drink and it can make you happy) |
- 福特 | Fútè | Ford [automobiles] (happiness – exceptional) |
- 汰渍/汰漬 | Tàizì | Tide [laundry detergent] (eliminate stains and sludge) |

The Chinese writing system: an overview

Although transcription systems can be used to write Chinese, Chinese characters are the basis of written communication in China. This chapter presents an overview of Chinese characters.

3.1 Traditional and simplified characters

There are two standard systems of characters in current use: traditional characters and simplified characters. Simplified characters are the official characters used in mainland China and Singapore. Traditional characters are the official characters used in Taiwan and other parts of the Chinese-speaking world.

Most characters in the traditional and simplified systems are identical. However, in the simplified character system, many frequently used characters have been simplified from their traditional, more complex form. Here are some examples.

A simplified way of writing characters has existed for hundreds of years. Simplified characters were used in informal documents and in some forms of calligraphy before they were adopted by mainland China as the official form. Therefore, although the two forms now have some political significance, you may encounter simplified characters in use in Taiwan and traditional characters in use in mainland China.

3.2 The structure of Chinese characters: the radical and the phonetic

3.2.1 The radical

All Chinese characters contain a radical, a sequence of strokes that broadly categorize the character in terms of meaning.

In the set of traditional characters, there are 214 radicals. In the set of simplified characters, there are 189 radicals. Some radicals may occur as independent characters. Others only occur as part of a character.

3.2.2

The phonetic

Some characters are radicals by themselves. Examples include:

水 shuǐ water
木 mù wood
人 rén person

However, most characters include a radical and additional sets of strokes. Often, these additional strokes provide a hint at the pronunciation of the character. When they do, they are called the phonetic.
Here are examples of characters with phonetics. As you can see, the pronunciation of the phonetic may be identical or similar to the pronunciation of the character.

<table>
<thead>
<tr>

</tbody>
</table>

Noting phonetic information is a helpful way to remember characters. However, the phonetic rarely provides complete information about the pronunciation of a character.

### 3.3 The traditional classification of characters

Chinese characters originated during the early Shang dynasty or the late Xia dynasty, in the seventeenth century BC. One of the earliest Chinese dictionaries, the *Shuowen Jiezi*, compiled in AD 121, established a classification of characters that is still used today. The classification identified the following six categories based on structure and representation of meaning.

#### 3.3.1 Pictographs 象形 xiàngxíng

Pictographs originated as pictures of objects. They represent only a small portion of Chinese characters. The modern forms are stylized versions of the ancient forms. Here are comparisons of the Shang Dynasty forms with the modern forms of the same characters.

3.3.2 Ideographs 指事 zhǐ shì

Ideographs represent abstract meanings, often having to do with spatial orientation. Only a small number of characters are ideographs. Examples are presented here.

<tr>

</tr>
</tbody>
</table>

3.3.4 Phonetic compounds 形声/形聲 xíngshēng

Phonetic compounds are the most common type of Chinese character and are discussed in 3.2.2 above.

3.3.5 False borrowings 假借 jiǎjiè

False borrowings involve the use of a character to refer to another word with identical pronunciation but different meaning. For example, the word for ‘wheat,’ written as 来/來, a picture of the wheat plant, was ‘borrowed’ to write the abstract concept ‘come,’ which, at the time, had the same pronunciation as the word for wheat. The character for ‘wheat’ was later revised to distinguish it from the character for ‘come.’ In present-day writing, ‘wheat’ is written as 麦/麥 mài and ‘come’ is written as 来/來 lái. The similarity in the characters can be seen in the traditional form of the characters. Note that the pronunciation of the two words is no longer identical, though they still rhyme.

3.3.6 Semantic derivations 轉注/轉注 zhuǎnzhù

Characters are considered 轉注/轉注 zhuǎnzhù when they are used to represent a meaning that is derived from the original meaning of the character. For example, the character 网/網 wǎng, originally a picture of a fishing net, is used to refer to networks in general. It is the character used in one of the Chinese translations of the World Wide Web: 万维网/萬維網 wàn wéi wǎng. The simplified character for net, 网, is the older form of the character.
3.4 Character stroke order: 笔顺/筆順 bǐshùn

3.4.1 Basic rules of stroke order

Each Chinese character contains a precise number of strokes written in a fixed order. Below are the basic rules of stroke order for the writing of Chinese characters.

Rule | Example
--- | ---
1 Horizontal (横 héng) precedes vertical (竖/豎 shù). | 十
2 Left falling stroke (撇 piě) precedes right falling stroke (捺 nà). | 人
3 First top, then bottom. | 三
4 First left, then right. | 他
5 First outside, then inside. | 月
6 First complete the inside of a box, then seal the box. | 日
7 First center, then sides. | 小
8 First horizontal (横 héng), then left falling stroke (撇 piě), then right falling stroke (捺 nà). | 大

3.4.2 Special stroke order rules

Rule | Example
--- | ---
1 Write the dot (点/點 diǎn) last if it is positioned at the top right corner of a character. | 我
2 Write the dot (点/點 diǎn) last if it is positioned inside a character. | 太
3 If the character includes the curved left-falling stroke (横折撇/横摺撇 héng zhé piě) and one other component, write the curved left-falling stroke last. | 建
4 If the character consists of more than one horizontal stroke (横 héng) and vertical stroke (竖/豎 shù), write the vertical stroke first, and the horizontal stroke at the bottom last. | 上
5 If a character has a horizontal stroke (横 héng) in the middle, write the horizontal stroke last. | 女

Phrase order in the Mandarin sentence

4.1 Basic phrase order

The basic order of the Mandarin sentence is

\[ \text{topic} + \text{subject} + \text{predicate} \]

A sentence need not have an overt topic. In addition, if the subject is understood from the context of the sentence, it is often omitted from the sentence.

The predicate consists of everything in the sentence except for the topic and subject, including the verb, its objects, negation, adverbial modifiers, prepositional phrases, and aspect particles. The following sections present the order of these constituents.

4.2 The position of direct and indirect objects

In the neutral sentence in which nothing is emphasized, the direct and indirect objects of the verb follow the verb. We refer to the verb and its objects as the verb phrase.

If there is an indirect object, it precedes the direct object.

\[ \text{subject} + \text{verb} + \text{indirect object} + \text{direct object} \]

他给我一本书。
他給我一本書。
Tā gěi wǒ yī běn shū.
He gave (gives) me one book.

Most verbs take only a direct object.

\[ \text{subject} + \text{verb} + \text{direct object} \]

我看了那些书。
我看了那些書。
Wǒ kàn le nà xiē shū.
I read those books.

The object may also occur before the subject for emphasis. In this position it is topicalized.
4.3 The position of prepositional phrases

Prepositional phrases generally occur right before the verb and its objects.

subject + prepositional phrase + verb + direct object

他跟他的女朋友吃晚饭。
他跟他的女朋友吃晚饭。
Tā gēn tā de nǚ péngyou chī wǎnfàn.
He eats dinner with his girlfriend.

4.4 The position of location phrases

The location phrase, the phrase that indicates where an action occurs, is a type of prepositional phrase. It always occurs before the verb phrase.

subject + location phrase + verb phrase

我在家吃饭。
我在家吃飯。
Wǒ zài jiā chī fàn.
I eat at home.

Within the location phrase, the order of constituents is from the largest to the smallest. Letters are addressed following this principle.

中国北京潮阳区建国门外大街一号
中國北京潮陽區建國門外大街一號
Zhōngguó Běijīng Cháoyáng qū Jiànguó mén wài dà jiē yī hào
China Beijing Chaoyang District Jianguo Gate Outer Road Number 1 → Number 1,
Jianguo Gate Outer Road, Chaoyang District, Beijing, China

4.5 The position of ‘time when’ phrases

A phrase that indicates the ‘time when’ a situation takes place occurs at the beginning of the predicate.

subject + time when + predicate

我 每天 喝咖啡。
Wǒ měitiān hē kāfēi.
I drink coffee every day.

他 每天 跟他的女朋友吃晚饭。
他 每天 跟他的女朋友吃晚飯。
Tā měitiān gēn tā de nǚ péngyou chī wǎnfàn.
He eats dinner with his girlfriend every day.

If ‘time when’ is emphasized or contrasted with another time, it may occur before the subject:

昨天我太舒服。今天已经没问题了。
昨天我不太舒服。今天已經沒問題了。
Zuótiān wǒ bù tài shūfu. Jīntiān yǐjing méi wèntí le.
Yesterday I was a bit uncomfortable. Today it is no longer a problem.
The position of duration phrases

Within the ‘time when’ phrase, the order of constituents is from the largest block of time to the smallest block of time:

一九九八年二月十五日
yī jiǔ jiǔ nián èryuè shíwǔ rì
1998 year February 15 → February 15, 1998

昨天晚上八点钟
zuótiān wǎnshang bā diǎn zhōng
yesterday evening 8 o’clock → 8 o’clock last night

The relative order of the ‘time when’ phrase and the location phrase

When a sentence includes both a ‘time when’ phrase and a location phrase, ‘time when’ generally occurs before location.

subject + time when + location + verb phrase

我每天在家吃饭。
我每天在家吃饭。
Wǒ měitiān zài jiā chī fàn.
I eat at home every day.

The position of adverbs

Adverbs occur at the beginning of the predicate, before the verb and any prepositional phrase. Adverbs usually occur after the ‘time when’ phrase.

我上个月只看了一个电影。
我上個月只看了一個電影。
Wǒ shàng gè yuè zhǐ kàn le yī gè diànyǐng.
Last month I only saw one movie.

The position of negation

Negation occurs before the verb and any prepositional phrase. It usually occurs after an adverb, though certain adverbs may either precede or follow negation.

The position of duration phrases

Duration phrases are time phrases that indicate the length of time that an action occurs. Duration phrases directly follow the verb. Unlike English, there is no preposition associated with the expression of duration in Mandarin.

我在中国住了三年。
我在中國住了三年。
Wǒ zài Zhōngguó zhù le sān nián.
I in China lived three years. → I lived in China for three years.
4.10 Order within the noun phrase

The main noun in the noun phrase, the head noun, occurs as the last word in the phrase. All phrases that describe or modify the head noun occur before the head noun.

那本很有意思的书
那本很有意思的畫
nà běn hěn yǒu yìsi de shū
that very interesting book

4.11 Phrase order in questions

In Mandarin, the order of phrases in questions is identical to the order of phrases in statements. Unlike English and many European languages, Mandarin questions are not characterized by a special question word order.

Statement

我喜欢他。
我喜歡他。
Wǒ xǐhuan tā.
I like him.

Content question

你喜欢谁?
你喜歡誰?
Nǐ xǐhuan shéi?
Who do you like?

Yes–no question

你喜欢他吗?
你喜歡他嗎?
Nǐ xǐhuan tā ma?
Do you like him?
The position of aspect particles

4.12 The position of aspect particles

Mandarin indicates the aspect of an event; that is, the way that the event is viewed by the speaker, with three different aspect particles, 了 le perfective, 着/著 zhe durative, and 过 guo experiential. These aspect particles directly follow the verb (or, for the perfective particle 了 le, either the verb or verb + object phrase) and always occur in neutral tone. Sentences that include the durative aspect particle 着/著 zhe often also include the words 在 zài or 正在 zhèng zài at the beginning of the verb phrase.

我已经吃饭了。
我已經吃飯了。
Wǒ yǐjing chī fàn le.
I’ve already eaten.

他们吃着饭呢。
他們吃著飯呢。
Tāmen chīzhe fàn ne.
They are eating.

你吃过中国饭吗？
你吃過中國飯嗎？
Nǐ chīguo Zhōngguó fàn ma?
Have you eaten Chinese food before?

With the exception of the written form of the third person pronoun, tā (see 5.2 below), Mandarin nouns are not marked for gender, and there is not the distinction between masculine, feminine, and neuter found in many European languages. The properties of Mandarin nouns are described here.

5.1 Common nouns

Most nouns are common nouns. Their referents may be concrete (纸/紙 *zhǐ* ‘paper,’ 桌子 *zhuōzi* ‘table,’ 水 *shuǐ* ‘water’) or abstract (思想 *sīxiǎng* ‘thought,’ 原则/原則 *yuánzé* ‘principle,’ 自由 *zìyóu* ‘freedom’). Mandarin makes no grammatical distinction between ‘mass’ and ‘count’ nouns.

Mandarin common nouns have a single, invariant form. They do not reflect number, and the same form of the noun is used whether the noun is singular or plural. When no number is used with a noun, the noun is understood to be neither singular nor plural, but simply unspecified for number. In addition, nouns that occur without any modifiers or descriptions have a general rather than a specific reference. For example, 书/書 *shū* refers to ‘book’ in general and not to any specific book.

When it is necessary to indicate the number of a noun, the noun is modified by a number + classifier phrase. The classifier is required after the number. Number + noun without an intervening classifier is ungrammatical. Compare the following:

<table>
<thead>
<tr>
<th>Say this</th>

</tbody>
</table>
When a specifier 这/這 zhè, zhèi ‘this/these,’ 那 nà, nèi ‘that/those,’ or the question specifier 哪 nǎ, něi ‘which’ modifies the noun, it also must be followed by a classifier or number + classifier. If the number is ‘one,’ the number may be omitted.

A small number of common nouns referring to people can be suffixed with -们/們 men, the suffix that also marks the plural form of pronouns (see section 5.2 below).

<td>comrades</td>
</tr>
<tr>
<td>孩子们/孩子們 háizimen</td>
<td>children</td>
</tr>
<tr>
<td>学生们/學生們 xuéshengmen</td>
<td>students</td>
</tr>
</tbody>
</table>

This use of -们/們 men with common nouns is relatively rare. It conveys a sense of inclusion and is sometimes used when addressing an audience.

同学们，今天我们听马老师作的报告。
同學們，今天我們聽馬老師作的報告。
Tónngxuémen, jīntiān wǒmen tīng Mǎ lǎoshī zuò de bàogào.
Fellow students, today we are going to listen to a report by teacher Ma.

When a noun is suffixed with -们/們 men it cannot be further modified with any kind of modifying phrase, including a number + classifier phrase.

5.2 Pronouns

Mandarin has first, second, and third person pronouns and a reflexive pronoun.

Mandarin pronouns have the following properties:

- Pronouns are not distinguished in terms of grammatical role. The same pronouns are used for subject, object, possession, etc.
- Pronouns have singular and plural forms. The suffix -们/們 men is added to the singular form to make it the plural form.
- Gender is not reflected in the spoken language. The written language has distinctions for the second and third person pronouns, though only the third person gender distinction is commonly used.
The reflexive pronoun 自己 zìjǐ ‘self’

Mandarin has only one reflexive pronoun, and it is not marked for person or gender. To indicate person, the reflexive may optionally be preceded by the relevant personal pronoun.

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>我 wǒ</td>
<td>我们 wǒmen</td>
</tr>
<tr>
<td>I/me</td>
<td>we/us</td>
</tr>
<tr>
<td>你 nǐ (masculine or neutral)</td>
<td>你们 nǐmen</td>
</tr>
<tr>
<td>她 nǐ (feminine)</td>
<td>你们 nǐmen</td>
</tr>
<tr>
<td>you</td>
<td>you</td>
</tr>
<tr>
<td>他 tā (masculine or neutral)</td>
<td>他们 tāmen</td>
</tr>
<tr>
<td>她 tā (feminine)</td>
<td>她们 tāmen</td>
</tr>
<tr>
<td>it/牠 tā (non-human or inanimate)</td>
<td>他们 tāmen (feminine)</td>
</tr>
<tr>
<td>he/she/it</td>
<td>they/them</td>
</tr>
</tbody>
</table>

自己 zìjǐ ‘self’ is also used without a personal pronoun. When it occurs in object position, it is understood to refer to the subject:

你在中国一定得把自己照顾好。
你在中國一定得把自己照顧好。

Nǐ zài Zhōngguó yīdìng děi bǎ zìjǐ zhàogù hǎo.

When you are in China you certainly should take good care of yourself.

没有人不喜欢自己的。
没有人不喜歡自己的。

Méi yǒu rén bù xǐhuan zìjǐ de.

No one doesn’t like him/herself.

自己 zìjǐ ‘self’ may be used to indicate contrast with another noun phrase or pronoun:

我希望他们结婚，可是我自己不想结婚。
我希望他們結婚，可是我自己不想結婚。

Wǒ xīwàng tāmen jiéhūn, kěshì wǒ zìjǐ bù xiǎng jiéhūn.

I hope they will get married, but I myself don’t plan to get married.

这是我自己的事。你不用管。
这是我自己的事。你不用管。

Zhè shì wǒ zìjǐ de shì. Nǐ bù yòng guǎn.

This is my affair. You need not be concerned with it.
Pronouns

5.2.2 The inclusive pronoun咱们咱们 zánmen ‘we’

The inclusive pronoun咱们咱们 zánmen ‘we’ is used in northern dialects of Mandarin.咱们咱们 zánmen ‘we’ refers to the speaker, other people associated with the speaker, and to the addressee. When a speaker uses咱们咱们 zánmen ‘we’ as the subject, he or she includes you in the remarks.

咱们都是自己人。
咱们都是自己人。
Zánmen dōu shì zìjī rén.
We are all family. (We, including you, are all one family.)

‘Inclusive’咱们咱们 zánmen contrasts with an ‘exclusive’ use of ‘we’ that is associated with我们我们 wǒmen. In the exclusive sense, we们我们 wǒmen refers to the speaker and others associated with the speaker but not to the addressee.

我们欢迎你。
我們歡迎你。
Wǒmen huānyíng nǐ.
We welcome you.

咱们咱们 zánmen only has the inclusive meaning. In addition,咱们咱们 zánmen is only used as subject, and never as object.

我们们 wǒmen can have either inclusive or exclusive meaning and it occurs as subject and object. It is much more commonly used than咱们咱们 zánmen.

5.2.3 Modification of pronouns

Pronouns represent an entire noun phrase. Therefore, in general, they are not further modified. However, Mandarin has a small number of literary expressions in which the pronoun is modified:

可怜的我
可憐的我
kělián de wǒ
poor me

美丽的她
美麗的她
měilì de tā
pretty her

善良的高老师
善良的高老師
shànliáng de Gāo lǎoshī
good-hearted professor Gao

5.2.4 Possession involving pronouns

Mandarin does not have possessive pronouns. The meaning of possessive pronouns is conveyed by pronoun + 的 de.

我的朋友
wǒ de péngyou
my friend

他的小狗
tā de xiǎogǒu
his puppy
Here is a table showing the Mandarin equivalent of English possessive pronouns. When *pronoun* + 的 *de* is followed by a noun, the English equivalent is *my*, *your*, *his/her*, *our*, and *their*. When *pronoun* + 的 *de* is not followed by a noun, the English equivalent is *mine*, *yours*, *his/hers*, *ours*, and *theirs*.

Zhè shì wǒ de shū.

Zhè shì wǒ de, nà shì nǐ de.

Proper nouns include personal names, place names, names of companies, names of schools, etc.

- 万里长城/萬里長城

- 喜玛拉雅山脉/喜瑪拉雅山脈

Proper nouns, like pronouns, typically occur without additional modification. As is the case with pronouns, Mandarin has a small number of literary expressions in which the proper noun may be modified. Here are some examples.

可爱的王美玲
kě’ài de Wáng Měiling
charming Wang Meiling

山清水秀的台湾
shānqīng shuǐxiù de Táiwān
Taiwan of green hills and clear streams → beautiful Taiwan

Telephone numbers are recited as a series of single digits from 0 to 9. When reciting a telephone number, the number 2 is always 二 èr.

**6.1.2 Numbers 11–19**

</tr>
</tbody>
</table>

**6.2 Number 100 and higher**

**6.2.1 100, 1,000, 10,000, and 100,000,000**

Chinese has distinct words for multiples of 100, 1,000, 10,000, and 100,000,000 as follows:

<table>
<thead>
<tr>
<th>Multiples</th>
<th>Chinese</th>
<th>Pinyin</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hundreds</td>
<td>百 bǎi</td>
<td>100</td>
<td>一百 yī bǎi</td>
</tr>
<tr>
<td>Thousands</td>
<td>千 qiān</td>
<td>1,000</td>
<td>一千 yī qiān</td>
</tr>
<tr>
<td>Ten thousands</td>
<td>万 wàn</td>
<td>10,000</td>
<td>一万 yī wàn</td>
</tr>
<tr>
<td>Hundred millions</td>
<td>亿 yì</td>
<td>100,000,000</td>
<td>一亿 yī yì</td>
</tr>
</tbody>
</table>

These number words function as classifiers. Therefore, the number 2 is usually 两/兩 liǎng when it occurs immediately before the word for ‘hundred,’ ‘thousand,’ or ‘ten-thousand’: 两百/兩百 liǎng bǎi, 两千/兩千 liǎng qiān, 两万/兩万 liǎng wàn, etc. In many regional dialects of Mandarin, 二百 èr bǎi, 二千 èr qiān, 二万 èr wàn, etc. is also acceptable.

**6.2.2 Forming numbers through 9,999**

Numbers up to 9,999 follow the same pattern as in English:

<thead>
<tr>

### 6.2.3 ‘Zero’ as a placeholder

The word ○/零 líng may be used when the ‘hundreds’ place or the ‘tens’ place is empty, provided there is a number before and after ○/零 líng. For example, it can be used to mark the ‘hundreds’ place when the thousands and tens are filled, as in the following number.

7,066 七千 零 六十 六
qī qiān líng liù shí liù

It can be used to mark the ‘tens’ place when the hundreds and single numbers are filled, as in the following number.

9,102 九千 一百 零 二
jiǔ qiān yī bǎi líng èr

When two consecutive places are empty, ○/零 líng occurs only once.

6,006 六千 零 六
liù qiān líng liù

#### 6.2.4 Forming numbers 10,000 to 100,000,000

Languages read numbers in terms of the categories that they distinguish. English distinguishes tens, hundreds, thousands, millions, and up. Numbers between one thousand and one million are read in terms of the numbers of thousands that they contain.

Chinese distinguishes the categories of tens, hundreds, thousands, ten-thousands, and hundred millions. Numbers between ten thousand and one-hundred million are read in terms of the number of ten-thousands that they contain. Compare the way that English and Chinese read the following numbers.

<table>
<thead>
<tr>
<th>English</th>
<th>Chinese</th>
</tr>
</thead>
<tbody>
<tr>
<td>1,000</td>
<td>一 千 yi qiān</td>
</tr>
<tr>

<tr>

<td>二十二万</td>
<td>五千</td>
<td>二百</td>
<td>五十</td>
</tr>
</tbody>
</table>

Observe how these numbers are read in Chinese.
6.4 Ordinal numbers

To make a number ordinal, add the prefix 第 di before the number:

1st 第一 di yī 20th 第二十 di èrshí
2nd 第二 di èr 50th 第五十 di wǔshí
3rd 第三 di sān 77th 第七十七 di qīshíqī
4th 第四 di sì 83rd 第八十三 di bāshí sān
5th 第五 di wǔ 95th 第九十五 di jiǔshíwǔ
6th 第六 di liù 100th 第一百 di yībǎi
10th 第十 di shí 1,000th 第一千 di yìqiān

In ordinal numbers, 'second' is always 第二 di èr and never *第两/第兩 di liǎng.

6.3 Formal characters for numbers

To discourage forgery, Chinese numbers are sometimes written using the following special set of characters. The numerals on Chinese currency are written with these special characters.

<table>
<thead>
<tr>

Chapter 8 presents the words and phrases associated with money.
6.5 Estimates and approximations

To indicate that a quantity is ‘more or less’ the stated number, use the phrase 左右 zuòyuò ‘more or less,’ as follows:

\[ \text{number + classifier (+ noun) + 左右 zuòyuò} \]

- 五十个 (人) 左右
- 五百个 (人) 左右
- wǔshí gè (rén) zuòyuò
- about 50 (people) (50 people more or less)
- 一百块 钱 左右
- 一百塊 錢 左右
- yībǎi kuài qián zuòyuò
- around $100 ($100 more or less)

To indicate that a quantity is almost but not quite the stated amount, use 差不多 chàbuduo + number ‘almost number.’

\[ \text{差不多 chàbuduo + number + classifier (+ noun)} \]

- 差不多五十个 (人)
- 差不多五十個 (人)
- chàbuduo wǔshí gè (rén)
- almost 50 people
- 差不多一百块 (钱)
- 差不多一百塊 (錢)
- chàbuduo yībǎi kuài (qián)
- almost $100

To indicate that a quantity is greater than or equal to the stated number, use 以上 yǐshàng ‘or more.’ For a more formal expression with the same meaning, use 之上 zhī shàng.

\[ \text{number (+ classifier + noun) + 以上 yǐshàng/之上 zhī shàng} \]

- 五十 (个人) 以上
- 五十 (個人) 之上
- wǔshí (gè rén) yǐshàng
- 50 (people) or more
- 五十 (个人) 以下
- 五十 (個人) 之下
- wǔshí (gè rén) zhī xià
- 50 (people) or less

To indicate that the actual number is less than or equal to the stated number, use 以下 yíxià ‘or fewer.’ For a more formal expression with the same meaning, use 之下 zhī xià.

\[ \text{number (+ classifier + noun) + 以下 yíxià/之下 zhī xià} \]

- 五十 (个人) 以下
- 五十 (個人) 之下
- wǔshí (gè rén) yíxià
- 50 (people) or less
- 五十 (个人) 之内
- 五十 (個人) 之内
- wǔshí (gè rén) zhī nèi
- 50 (people) or fewer

To indicate that the actual time lies within a specified period of time, use 以内 yǐnèi. For a more formal expression with the same meaning, use 之内 zhī nèi.

\[ \text{一年以内}
- 一年之内}
- yī nián yǐnèi
- within one year
- yī nián zhī nèi
- within one year
Fractions, percentages, decimals, half, and multiples

6.6

To indicate the actual number is more than the stated number, use 多 duō ‘more than.’

\[ \text{number} + \text{多 duō} + \text{classifier (+ noun)} \]

五十多个人
五十多個人
wǔshí duō gè rén
more than 50 people

To indicate an approximation within a small range, use two numbers in a sequence as follows:

我一两天就回来。
我一兩天就回來。
Wǒ yī liǎng tiān jiù huí lái.
I’ll come back in a day or two.

这个东西卖三四块钱。
這個東西賣三四塊錢。
Zhège dōngxi mài sān sì kuài qián.
This thing sells for three or four dollars.

This expression can be used together with 左右 zuǒyòu:

这个东西卖三四块钱左右。
這個東西賣三四塊錢左右。
Zhège dōngxi mài sān sì kuài qián zuǒyòu.
This thing sells for around three or four dollars.

Fractions, percentages, decimals, half, and multiples

6.6.1 Fractions

To indicate fractions, use the pattern:

\[ \frac{X}{Y} \text{ 分 之 Y} \]

\[ \text{fēn zhī} \]

三分之一
sān fēn zhī yī
one-third

Note that the ‘whole’ is expressed first and the ‘part of the whole’ is expressed second.

\[ \frac{1}{3} \text{ 四分之一} \]

\[ \text{si fēn zhī yī} \]

\[ \frac{2}{3} \text{ 五分之二} \]

\[ \text{wǔ fēn zhī èr} \]

\[ \frac{9}{10} \text{ 十分之九} \]

\[ \text{shí fēn zhī jiǔ} \]

\[ \frac{7}{9} \text{ 九分之七} \]

\[ \text{jiǔ fēn zhī qī} \]

\[ \frac{1}{15} \text{ 十五分之一} \]

\[ \text{shíwǔ fēn zhī yī} \]

6.6.2 Percentages

Percentages are expressed as parts of 100. The expression used for percentages is the same as for fractions, but the ‘whole’ is always 百 bǎi ‘100’:

\[ \text{百 分 之} + \text{number} \]

\[ \text{bǎi fēn zhī} \]

\[ 10\% \text{ 百分之十} \]

\[ \text{bǎi fēn zhī shí} \]

\[ 25\% \text{ 百分之二十五} \]

\[ \text{bǎi fēn zhī èrshíwǔ} \]

\[ 37\% \text{ 百分之三十七} \]

\[ \text{bǎi fēn zhī sānshíqī} \]

\[ 66\% \text{ 百分之六十六} \]

\[ \text{bǎi fēn zhī liúshíliù} \]

\[ 99\% \text{ 百分之九十九} \]

\[ \text{bǎi fēn zhī jiǔshíjiǔ} \]
Decimals

Decimals are recited as a series of single digits and zeros after a decimal point. The decimal point is read as 点/點 diǎn:

<table>
<thead>
<tr>
<th>Decimal</th>
<th>Chinese</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>一点一/一點一 yī diǎn yī</td>
</tr>
<tr>
<td>2.5</td>
<td>(二 or 两) 点五/(二 or 两) 点五 (èr or liǎng diǎn wǔ)</td>
</tr>
<tr>
<td>14.56</td>
<td>十四点五六/十四点五六 shí sì diǎn wǔ liù</td>
</tr>
<tr>
<td>30.808</td>
<td>三十点八零八/三十点八零八 sān shí diǎn bā líng bā</td>
</tr>
<tr>
<td>8.06</td>
<td>八点〇六/八點〇六 bā diǎn líng liù</td>
</tr>
</tbody>
</table>

If there is no number before the decimal point, the fraction may optionally be recited as ○点/點 (XXX) 理点 (XXX):

<table>
<thead>
<tr>
<th>Decimal</th>
<th>Chinese</th>
</tr>
</thead>
<tbody>
<tr>
<td>.35</td>
<td>○点三五/○點三五 líng diǎn sān wǔ</td>
</tr>
<tr>
<td>.27</td>
<td>○点二七/○點二七 líng diǎn èr qī</td>
</tr>
</tbody>
</table>

NOTE

Chinese often omits the final zero after a decimal point. For example, $8.60 may also be written as $8.6.

Indicating ‘half’

The word 半 bàn means ‘half.’

To indicate half of something, place 半 bàn before the classifier associated with the thing.

半碗饭/半碗饭 bàn wǎn fàn
half a bowl of rice

半本书/半本書 bàn běn shū
half a book

半杯水
bàn bēi shuǐ
half a glass of water

To indicate one or more things and a half, place 半 bàn immediately after the classifier associated with the thing:

number + classifier + 半 bàn

三碗半(饭)/三碗半(飯)
sān wǎn bàn (fàn)
three and a half bowls (of rice)

三本半(书)/三本半(書)
sān běn bàn (shū)
three and a half volumes (of books)

三杯半(水)
sān bēi bàn (shuǐ)
three and a half cups (of water)

To indicate ‘half’ in time expressions, see Chapter 49.

- 49.1.1, 49.1.3.2, 49.1.4
Indicating multiples of a quantity with 倍 bèi

倍 bèi is a classifier and is always preceded by a number: 一倍 yī bèi, 两倍/liǎng bèi, 三倍 sān bèi, etc.

一倍 yī bèi means ‘one fold,’ or ‘one time more than a given quantity.’ 两倍/liǎng bèi means ‘twofold,’ 三倍 sān bèi means ‘threefold,’ etc.

倍 bèi often occurs with expressions that imply an increase:

价格都增加了一倍了。

Jiàgé dōu zēngjiā le yī bèi le.

Prices have all doubled (increased by one-fold).

今年这本书比去年贵了一倍。

Jīnnián zhè běn shū bǐ qùnián guì le yī bèi.

This year this book is twice as expensive as it was last year.

倍 bèi also occurs in equational sentences such as the following:

我的书是你的书的两倍。

Wǒ de shū shì nǐ de shū de liǎng bèi.

I have twice as many books as you.

(lit. ‘My books are the equivalent of two times your books.’)

If 半 bàn ‘half ’ occurs, it follows 倍 bèi:

今年学中文的学生是去年的一倍半。

Jīnnián xué Zhōngwén de xuésheng shì qùnián de yī bèi bàn.

The number of students studying Chinese this year is 1½ times greater than last year.

Discounts, sales, and percentage off the price

The expression for a discount or sale is the verb phrase 打折 dǎ zhé.

Discounts are expressed as a percentage of the original or full price.

九折 jiǔ zhé is 90% of the original price, or 10% off. 七点五折/七點五折 qīdiǎn wǔ zhé is 75% of the original price, or 25% off. Here are additional examples of discounts. Discounts are written with either Chinese or Arabic numerals.

To find out if an item is discounted or on sale, you can ask:

打折吗？

Do you discount?

打不打折？

Dǎ bù dǎ zhé?

Is there a discount?
To find out how much of a discount there is, you can ask:

打几折？/打幾折？

How much discount is there?

**Lucky and unlucky numbers**

Some numbers have special significance in Chinese based on their value in traditional Chinese numerology or because they are near-homophones with a word with positive or negative connotations. Here are some numbers with special significance.

**Numbers with negative connotations – unlucky numbers**

- 四 sì (near homophone with 死 sǐ ‘to die’)
- 五 wǔ (near homophone with 无/無 wú ‘nothing’)

**Numbers with positive connotations – lucky numbers**

- 六 liù (near homophone with 留 liú ‘remain, leftover/excess’)
- 八 bā (near homophone with 发/發 fā ‘prosperity’)

The special significance of odd and even numbers

- 单号/單號 dānhào ‘odd numbers.’ Odd-numbered items are appropriate for funerals and other sad occasions.
- 双号/雙號 shuānhào ‘even numbers.’ Even-numbered items (except for the number 4) are appropriate for weddings and other happy occasions.

**Numbers used in phrases and expressions**

Numbers, especially sequential numbers, are often used in Chinese phrases.

**1’s and 2’s**

一清二楚
yī qīng èr chǔ
perfectly clearly

他说得一清二楚。
他說得一清二楚。
Tā shuō de yī qīng èr chǔ.
He said it perfectly clearly.

**3’s and 4’s**

张三李四
张三李四
Zhāng Sān Lǐ Sì
John Doe and Mary Smith (ordinary people)

不三不四
bù sān bù sì
neither here nor there, questionable, no good
7's and 8's

乱七八糟
luàn qī bā zāo
a mess/disorganized

七上八下
qī shàng bā xià
be in an unsettled state of mind

6.9 — yī as a marker of sequence

In addition to functioning as a number, the word — yī is also used to indicate sequence in the following structure:

一 yī + verb
as soon as verb occurs . . .

他一看见他孩子就很高兴。
他一看見他孩子就很高興。
Tā yī kànjiàn tā háizi jiù hěn gāoxìng.
As soon as he sees (his) children he is happy.

6.10 Numbers that are used as words

Numbers that are homophonous or near homophones with words may be used as abbreviations for words. This kind of substitution is particularly common on the internet and in written advertisements and signs. Examples include:

5 3 0 五三零
wǔ sān líng
(我想你)
(wǒ xiǎng nǐ)
I’m thinking of you – I miss you.

5 2 0 五二〇
wǔ èr líng
(我爱你)
(wǒ ài nǐ)
I love you

8 8 八八
bā bā
(拜拜)
(bàibài)

Specifiers and demonstratives

这/這 zhè and 那 nà have two functions.

They can be used as **demonstratives**, or words that are used to point out an item:

- 那是我的手机。
  - Nà shì wǒ de shǒujī.
  - That is my cellphone.

They can be used as **specifiers**, or words that occur as part of a noun phrase and that identify specific items:

- 这三本书
  - zhè sān běn shū
  - these three books

When used as specifiers, these words each have an alternative pronunciation. 这/這 may be pronounced zhè or zhèi. 那 may be pronounced nà or néi. The choice of pronunciation varies by speaker and region of China.

### 7.1 这/這 zhè ‘this’ and 那 nà ‘that’ as demonstratives

As demonstratives, 这/這 zhè ‘this’ and 那 nà ‘that’ refer to an entire noun phrase, either a concrete object or an abstract concept. They always occur at the beginning of the sentence, and they serve as the subject of the sentence. They can occur in statements or in questions.

- 那是中文字典。
  - Nà shì Zhōngwén zìdiǎn.
  - That is a Chinese dictionary.

- 这是我的书。
  - Zhè shì wǒ de shū.
  - This is my book.

- 那是什么?
  - Nà shì shénme?
  - What is that?
  - (lit. ‘That is what?’)

- 这是什么意思?
  - Zhè shì shénme yìsi?
  - What is the meaning of this?
  - (lit. ‘This is what meaning?’)
7.2 这/這 zhè, zhěi ‘this/these’ and 那 nà, nèi ‘that/those’ as specifiers

When they are used as specifiers, 这/這 zhè, zhěi ‘this/these’ and 那 nà, nèi ‘that/those’ are part of a noun phrase. They occur before the number if there is one, and before the classifier and the noun in this order:

specifier + (number) + classifier + noun

Here are examples of noun phrases that begin with specifiers. Following each noun phrase there is an example showing how the noun phrase is used in a sentence.

<tr>

</tr>
</tbody>
</table>

Notice that 这/這 zhè, zhěi and 那 nà, nèi do not have separate singular and plural forms.

7.3 这儿/這兒 zhèr and 这里/這裏 zhělǐ ‘here,’ 那儿/那兒 nàr and 那里/那裡 nàlǐ ‘there’

这儿/這兒 zhèr (这里/這裏 zhělǐ) ‘here’ and 那儿/那兒 nàr (那里/那裡 nàlǐ) ‘there’ indicate location. 这儿/這兒 zhèr ‘here’ and 那儿/那兒 nàr ‘there’ are used in the north of China, including Beijing. 这里/這裏 zhělǐ and 那里/那裡 nàlǐ are used in the south of China, including Taiwan. The meaning and use of 这儿/這兒 zhèr and 这里/這裏 zhělǐ is the same, as is the meaning and use of 那儿/那兒 nàr and 那里/那裡 nàlǐ. Each member of the pair is interchangeable in our examples here and throughout this book.

这儿/這兒 zhèr ‘here’ and 那儿/那兒 nàr ‘there’ may occur at the beginning of the sentence as the subject. As subjects, they may optionally be preceded by the location preposition 在 zài ‘at.’

(在)这儿有很多商店。
(在)這兒有很多商店。
(Zài) zhèr yǒu hěn duō shāngdiàn.
Here (in this location) are a lot of shops.

(在)那儿没有停车场。
(在)那兒沒有停車場。
(Zài) nàr méi yǒu tíngchē cháng.
There (in that location) there aren’t any parking lots.
SPECIFIERS AND DEMONSTRATIVES

When they are not the subject, 这儿/这儿 zhèr ‘here’ and 那儿/那儿 nàr ‘there’ must be preceded by the location preposition 在 zài ‘at.’

我在那儿工作。
Wǒ zài nàr gōngzuò.
I work there.

我在哪儿买东西。
Wǒ zài nàr mǎi dōngxi.
I shop there.

People cannot serve as location nouns. To make a person into a location, follow it with a location specifier.

请到我这儿来。
Qǐng dào wǒ zhèr lái.
Please come to me. [to my location]

我们今天晚上去小王那儿吃饭。
Wǒmen jīntiān wǎnshang qù Xiǎo Wáng nàr chī fàn.
Tonight we’ll go to Xiao Wang’s to eat.

Classifiers

8.1 The structure of phrases involving classifiers

A classifier is a word that occurs between the specifier and/or number and the noun. In Chinese, a classifier always occurs between a specifier or number and a noun in this order:

specifier + number + classifier + noun

Specifiers and/or number + classifier + noun forms a noun phrase.

1. Classifiers are sometimes referred to as ‘measure words.’
2. In English, mass nouns such as ‘coffee,’ ‘rice,’ and ‘sand’ occur with classifiers. In Chinese, all nouns occur with classifiers when they are preceded by a specifier and/or number.

Here are examples of noun phrases with specifiers, numbers, classifiers, and nouns. The classifier is emphasized in each example. The classifier is often omitted when a Mandarin noun phrase is translated into English.

8.2 Nouns and associated classifiers

Most nouns are associated with a particular classifier. Classifiers are often not predictable from the noun so they must be memorized. Some dictionaries indicate the classifier associated with a noun.

8.2.3 个/個 *gè*, the general classifier

The most commonly used classifier is 个/個 *gè*. It is used with many different nouns including people and things. It does not contribute any meaning to the noun phrase in which it occurs. It is generally pronounced with neutral tone.

- 一个人/一個人 *yī gè rén*: a person
- 一个问题/一個問題 *yī gè wèntí*: a problem/a question
- 一个东西/一個東西 *yī gè dōngxi*: a thing (a physical object)

In mainland China, in informal speech, 个/個 *gè* can be used as the classifier for almost any noun, even those with an established classifier. This phenomenon is sometimes referred to as 个化/個化 *gè huà* 'ge-ization.'

- 一个车/一個車 *yī gè chē*: a car
- 一个房子/一個房子 *yī gè fángzi*: a house

8.3 Omission of the head noun

In modern Mandarin, if a noun phrase includes a specifier and/or a number, the classifier may not be omitted. However, the head noun may be omitted from the noun phrase.

*Say this* | *Not this*
---|---
三本书 [or] 三本 | *三书*
三本书 | 三書
sān běn shū [or] sān běn | sān shū
three books [or] three | three
那个学校 [or] 那个 | *那学校*
那个學校 [or] 那個 | 那學校
nàge xuéxiào [or] nàge | nà xuéxiào
that school [or] that one | that school

8.4 Classifiers that occur without a noun

The words for ‘day’ and ‘year’ are classifiers. They may be preceded by a number, and they are never followed by a noun.

- 天 *tiān*: day
- 年 *nián*: year
- 一天 *yī tiān*: one day
- 一年 *yī nián*: one year
- 两天/兩天 *liǎng tiān*: two days
- 两年/兩年 *liǎng nián*: two years
Money and prices

In Chinese, money and prices are expressed as noun phrases. The units of money, dollars, dimes, and cents are expressed by classifiers. The word for money, 钱/錢 qián, is a noun, and may occur at the end of the noun phrase.

In informal and spoken contexts, the classifiers for money are as follows:

<table>
<thead>
<tr>
<th>表面符</th>
<th>读音</th>
<th>汉语</th>
</tr>
</thead>
<tbody>
<tr>
<td>块/塊</td>
<td>kuài</td>
<td>dollar</td>
</tr>
<tr>
<td>毛</td>
<td>máo</td>
<td>dime</td>
</tr>
<tr>
<td>分</td>
<td>fēn</td>
<td>cent</td>
</tr>
</tbody>
</table>

分 fēn represents 1 cent to 9 cents. Multiples of 10 cents are represented by 毛 máo.

五块/五塊 三毛 八分 钱/錢 = $5.38
sìshíbā kuài jiǔ máo liù fēn qián

The number 2 in the phrases ‘2 dollars,’ ‘2 dimes’ (20 cents), or ‘2 cents’ may be either 二 èr or 两/兩 liǎng.

三块/三塊 四毛 二分 钱/錢 = $3.42

Chinese also has the following formal written classifiers for dollars and dimes.

<table>
<thead>
<tr>
<th>表面符</th>
<th>读音</th>
<th>汉语</th>
</tr>
</thead>
<tbody>
<tr>
<td>元/圓</td>
<td>yuán</td>
<td>dollar</td>
</tr>
<tr>
<td>角</td>
<td>jiǎo</td>
<td>dime</td>
</tr>
</tbody>
</table>

These are the classifiers used on currency and in formal financial transactions.

For the formal characters for numbers, see 6.3

When 元/圓 yuán and 角 jiǎo are used, the noun 钱/錢 qián does not occur in the money phrase. 元/圓 yuán and 角 jiǎo are often not used together in the same price. 角 jiǎo tends to occur only when the denomination is smaller than one 元/圓 yuán.

$3.00 三元/圓 sān yuán
$0.60 六角 liù jiǎo

To ask ‘how much money?’ say 多少钱？/多少錢？duōshao qián?

These two books多少钱？

Zhè liǎng běn shū duōshao qián?

How much (money) are these two books?
CLASSIFIERS

To ask how many dollars, dimes, or cents, say:

几块钱？/幾塊錢？ jǐ kuài qián? how many dollars?
几毛钱？/幾毛錢？ jǐ máo qián? how many dimes?
几分钱？/幾分錢？ jǐ fēn qián? how many cents?

这本书几块钱？
這本書幾塊錢？
Zhè běn shū jǐ kuài qián?
How many dollars does this book cost? (How much is this book?)

一瓶水几毛钱？

一块糖几分钱？
一塊糖幾分錢？
Yī kuài táng jǐ fēn qián?
How many cents does a piece of candy cost? (How much is a piece of candy?)
A noun phrase consists of a noun and any words that describe or ‘modify’ the noun. Here is an example of a noun phrase with the noun emphasized.

三个大老虎
三個大老虎
sān gè dà láohǔ
three big tigers

Additional examples of noun phrases are presented below.

In this chapter, we refer to the noun that is being described or modified as the head noun and to the words or phrases that describe or modify the head noun as the modifier.

In Mandarin Chinese, the relative position of modifier and noun is constant:

In Chinese, all noun modifiers occur before the head noun.

9.1 Modifying a noun with a specifier and/or number

Nouns can be modified by

- a specifier (‘this,’ ‘that,’ ‘which?’)
- or a number (‘four,’ ‘twenty’),
- or a specifier and number together (‘these four,’ ‘those twenty,’ ‘which two?’)

In Mandarin, the classifier associated with the noun being modified must be included in the modifying phrase. The entire phrase precedes the head noun as follows:

specifier + classifier + noun

那 本 书
那 本 書
nà běn shū
that book

number + classifier + noun

两 本 书
兩 本 書
liǎng běn shū
two books
9.2 Modifying a noun with all other modifiers: modification with 的 de

Noun modifiers may also be nouns, pronouns, verbs, or phrases that include a verb. These kinds of modifiers are typically followed by the particle 的 de, and the noun phrase has the following form:

\[
\text{modifier + 的 de + head noun}
\]

In English, when a modifier includes a verb, the modifier occurs after the head noun as a relative clause introduced by a relative pronoun (‘who,’ ‘whom,’ ‘which’) or a complementizer (‘that’). In these examples, the modifier of the noun is presented in square brackets.

- the book [that I bought]
- the people [who spoke to you]

In Mandarin, all modifiers precede the head noun. In addition, Mandarin has no words that correspond to relative pronouns or complementizers. Do not attempt to translate them into Chinese.

9.3 Omission of the particle 的 de

The particle 的 de is sometimes omitted from the modifier.

的 de may be omitted:

• when the modifier is an unmodified one-syllable adjectival verb.
  贵车/貴的车 guì de chē → 贵车/貴 chē expensive car
  but not
  很贵的车/很貴的车 hěn guì de chē → *很贵车/很貴车 hěn guì chē

• when the modifier is closely associated with the noun, describing, for example, nationality:
  美国人/美國的人 Měiguó de rén → 美国人/美國人 Měiguó rén American person

• or a close personal relationship in which the modifier is a pronoun:
  我的爸爸 wǒ de bàba → 我爸爸 wǒ bàba my father

9.4 Noun modifiers in a series

In Mandarin Chinese, a noun may be modified by any number of modifiers.

- The modifiers occur in a series before the head noun.
- A modifier that is a specifier and/or a number ends with a classifier. All other modifiers may end in the particle 的 de.
- The head noun occurs only once, at the end of the series of modifiers.

Here are examples of noun phrases in which the head noun is modified by a series of modifiers. Each modifying phrase is included in [square brackets].

我们[昨天看的] [刚出来的] [中国的]电影
我們[昨天看的] [剛出來的] [中國的]電影
wǒmen [zuótiān kàn de] [gāng chūlái de] [Zhōngguó de] diànyǐng
the Chinese movie that just came out that we saw yesterday

[你给我介绍的] [那两个] [很聪明的]留学生
[你給我介紹的] [那兩個] [很聰明的]留學生
[nǐ gěi wǒ jièshào de] [nà liǎng gè] [hěn cōngming de] liúxuéshēng
those two very smart exchange students who you introduced me to

Modifiers may occur in any order. However, modifiers involving inherent personal characteristics often occur closer to the head noun.

[穿毛衣的] [很可爱的]小孩子
[穿毛衣的] [很可愛的]小孩子
[chuān máoyī de] [hěn kě’ài de] xiǎo háizi
the very cute child who is wearing a sweater
Noun modifiers involving specifiers and numbers often occur first in a sequence of modifiers, though they may also occur closer to the head noun for emphasis or contrast.

[nàge] [dài yǎnjìng de] [hěn gāo de] rén
[very tall] person who wears glasses

Omission of the head noun

When the head noun is predictable from the context, it may be omitted. The presence of 的 de or a classifier at the end of a phrase identifies the phrase as a noun phrase modifier. When the head noun is omitted, 的 de cannot be omitted.

Modification with 之 zhī

之 zhī is the marker of noun modification in literary Chinese, and it is used for this purpose in certain literary expressions in modern Chinese, including the following. These instances of 之 zhī are not interchangeable with 的 de.

- 我三天之内一定做得完。

Adjectival verbs translate into adjectives in English. They include 高 gāo ‘be tall,’ 貴/貴 guì ‘be expensive,’ 小 xiǎo ‘be small,’ 大 dà ‘be big,’ 好 hǎo ‘be good,’ etc.

Mandarin adjectival verbs, unlike English adjectives, are not preceded by a linking verb such as the verb 是 shì ‘be.’

Say this  Not this

他高。  *他是高。
Tā gāo.  Tā shì gāo.
He is tall.

那本书贵。  *那本书是贵。
那本書貴。  那本書是貴。
Nà běn shū guì.  Nà běn shū shì guì.
That book is expensive.

那个人不好。  *那个人没好。
那個人不好。  那個人沒好。
Nàge rén bù hǎo.  Nàge rén méi hǎo.
That person is not good.

The properties of adjectival verbs are discussed below.

**NOTE**

是 shì may occur before adjectival verbs, but only for emphasis.

---

### 10.1 Negation of adjectival verbs

Adjectival verbs are negated by 不 bù. They are never negated by 没/没 méi.

他不高。  *他没/没高。
Tā bù gāo.  Tā méi gāo.
He is not tall.

那本书不贵。  *那本书没贵。
那本書不貴。  那本書沒貴。
Nà běn shū bù guì.  Nà běn shū méi guì.
That book is not expensive.

那个人不好。  *那个人没好。
那個人不好。  那個人沒好。
Nàge rén bù hǎo.  Nàge rén méi hǎo.
That person is not good.
10.2 Yes–no questions with adjectival verbs

Adjectival verbs can occur in yes–no questions formed by 吗/嗎 ma or the verb-not-verb structure.

- 那个学校大吗？
- 那個學校大嗎？
  Nàge xuéxiào dà ma?
  Is that school big?

- 那个学校大不大？
- 那個學校大不大？
  Nàge xuéxiào dà bù dà?
  Is that school big?

10.3 Modification by intensifiers

Adjectival verbs can be modified by intensifiers. Most intensifiers precede the adjectival verb.

<table>
<thead>
<tr>
<th>Intensifier</th>
<th>Intensifier + adjectival verb</th>
</tr>
</thead>
<tbody>
<tr>
<td>很  hěn</td>
<td>好  hǎo</td>

</tr>
<tr>
<td>更   gèng</td>

</tr>
<tr>
<td>最   zuì</td>

</tr>
</tbody>
</table>
ADJECTIVAL VERBS

The intensifier suffixes 得很 de hěn ‘very,’ 极了/極了 jíle ‘extremely,’ and 得不得了 débù déliǎo ‘extremely’ follow the adjectival verb. They are sometimes referred to as degree complements or complements of degree.

- 好得很 hǎo de hěn
  - be very good
- 好极了 hào jíle
  - be terrific
- 好得不得了 hǎo de bù déliǎo
  - be terrific

Stative verbs and the modal verbs 会/會 huì and 能 néng can also be modified by intensifiers, but they do not take intensifier suffixes.

10.4 Two-syllable preference

Adjectival verbs generally occur in two-syllable phrases. In affirmative form, when no special emphasis is intended, one-syllable adjectival verbs are usually preceded by 很 hěn. When negated, 不 bù provides the additional syllable.

- 他很高。 Tā hěn gāo.
  - He is tall.
- 那本书很贵。 Nà běn shū hěn guì.
  - That book is expensive.

10.5 Comparative meaning

Adjectival verbs do not have a distinct comparative form. However, in certain contexts they have comparative meaning.

They have comparative meaning when the context implies a comparison:

- Q: 谁高？/誰高？ Shéi gāo?
  - Who is tall?
  - or
  - Who is taller?
- A: 他高。 Tā gāo.
  - He is tall.
  - or
  - He is taller.

They have comparative meaning when they occur in comparison structures:

- 他比你高。 Tā bǐ nǐ gāo.
  - He is taller than you.
Linking adjectival verbs

They have comparative meaning when followed by 一点/一點 yīdiǎn a little more.

可以便宜一点吗？
Kěyǐ piányí yīdiǎn ma?
Can it be a little cheaper?

They also have comparative meaning when they occur in structures that indicate change.

To explicitly express comparative meaning, precede the adjectival verb with the intensifier 更 gèng or the expression 还(要)/還(要) hái (yào).

他更高。 他还(要)高。
Tā gèng gāo. Tā hái (yào) gāo.
He is (even) taller. He is (even) taller.

Superlative meaning

Adjectival verbs do not have a distinct superlative form. To express the superlative meaning, precede the adjectival verb with the intensifier 最 zuì ‘most.’

他最高。 那本书最贵。
Tā zuì gāo. Nà běn shū zuì guì.
He is the tallest. That book is the most expensive.

Adjectival verbs and comparison structures

Adjectival verbs are used in comparison structures.

Comparison structures involving 比 bǐ ‘more than’ and 没有/沒有 méi yǒu ‘less than’ typically end with an adjectival verb or a modified adjectival verb.

我比你高。
Wǒ bǐ nǐ gāo.
I am taller than you.

我没有你高。
Wǒ méi yǒu nǐ gāo.
I am not as tall as you.

Linking adjectival verbs

The adverb 又 yòu can be used to link adjectival verbs as follows. The structure is used to convey the meaning ‘both . . . and . . .’

那个男的又高又大。
Nàge nán de yòu gāo yòu dà.
That guy is both big and tall.
ADJECTIVAL VERBS

10.9 Adjectival verbs and expressions that indicate change over time

10.9.1 越来越 yuè lái yuè adjectival verb ‘more and more’ adjectival verb

东西越来越贵。
Dōngxi yuè lái yuè guì.
Things are more and more expensive.

10.9.2 越 yuè action verb 越 yuè adjectival verb ‘the more’ (action), ‘the more’ (adjectival verb)

他越说越快。
Tā yuè shuō yuè kuài.
The more he speaks, the faster he speaks.

10.10 Adjectival verbs and sentence final 了 le

Sentence final 了 le may occur at the end of a sentence with an adjectival verb to indicate change.

你高了。
Nǐ gāo le.
You have gotten taller.

When the intensifier 太 tài ‘too’ modifies an adjectival verb, the adjectival verb is typically followed by sentence final 了 le.

东西太贵了。
Dōngxi tài guì le.
Things are too expensive.

你太聪明了。
Nǐ tài cōngming le.
You’re too smart.

► 40.9

► 38.3

► 38.1
Stative verbs describe situations that do not involve action. Examples of stative verbs include 喜欢 / 喜歡 xǐhuan ‘like,’ 爱 / 愛 ài ‘love,’ 像 xiàng ‘resemble,’ 想 xiǎng ‘want,’ 要 yào ‘want,’ 需要 xūyào ‘need,’ 怕 pà ‘fear,’ 尊敬 zūnjìng ‘respect,’ 感谢 / 感謝 gǎnxiè ‘appreciate,’ 懂 dǒng ‘understand,’ 信 xìn ‘believe,’ and 想念 xiǎngniàn ‘miss.’ Certain stative verbs have special meanings and properties and will be discussed separately below. They include the equational verbs 是 shì ‘be’ and 姓 xìng ‘be family named,’ the verb 有 yǒu ‘have,’ ‘exist,’ and the location verb 在 zài ‘be located at.’

Stative verbs are similar to adjectival verbs in their form of negation, their occurrence with intensifiers, and their use in comparison structures.

### 11.1 Negation of stative verbs

Most stative verbs may only be negated by 不 bù. The stative verb 有 yǒu ‘have’ may only be negated by 没 / 沒 méi.

不 bù negates most stative verbs

没 / 沒 méi only negates 有 yǒu

他不像他爸爸。

Tā bù xiàng tā bàba.

He doesn’t resemble his dad.

他不怕狗。

Tā bù pà gǒu.

He is not afraid of dogs.

我不要钱。

Wǒ bù yào qián.

I don’t want money.

他没有车。

Tā méi yǒu chē.

He doesn’t have a car.
### Modification by intensifiers

Stative verbs, like adjectival verbs, can be preceded and modified by intensifiers. The intensifiers are emphasized in each of the following sentences.

- 我们很尊敬他。
  - Wǒmen hěn zūnjìng tā.
  - We all respect him a lot.

- 我很想念你。
  - Wǒ hěn xiǎngniàn nǐ.
  - I miss you a lot.

- 我真怕这种人。
  - Wǒ zhēn pà zhè zhǒng rén.
  - I’m really afraid of this kind of person.

- 他特别需要你的支持。
  - Tā tèbié xūyào nǐ de zhīchí.
  - He especially needs your support.

For a complete list of intensifiers, see section 10.3.

#### Indicating completion, past time, and change of state

The verb suffixes 了 le and 过/過 guo cannot be used to indicate the completion or past time of a stative verb. To indicate that a state existed in the past, use a time expression or adverb that refers to the past.

- 我小的时候怕狗。
  - Wǒ xiǎo de shíhou pà gǒu.
  - When I was small I was afraid of dogs.

- 我以前很喜欢吃口香糖。
  - Wǒ yǐqián hěn xǐhuān chī kǒuxiāngtáng.
  - I used to like to chew gum. (lit. ‘Before, I liked to chew gum.’)

When a stative verb is followed by 了 le, it indicates change of state.

- 我懂了!
  - Wǒ dǒng le!
  - I understand (now)!

[37.1, 38]
The equational verb *shì* ‘be’

Some verbs can function as a stative verb and as an action verb.

</tr>
</tbody>
</table>

*shì* is used less often than the English verb ‘be.’ In particular, in Mandarin, *shì* is ordinarily not used with adjectival verbs or stative verbs. In most circumstances,

<table>
<thead>
<tr>
<th>Say this</th>
<th>Not this</th>

Her family name is Ma.

The negation of 姓 xìng is 不姓 bù xìng.

我不姓李。我姓罗。
我不姓李。我姓羅。
Wǒ bù xìng Lǐ. Wǒ xìng Luó.
My family name isn’t Li. My family name is Luo.

To ask someone’s family name, say:

你姓什么?
你姓甚麼?
Nǐ xìng shénme?
What is your family name?

The very polite way to ask someone’s family name is:

你贵姓?
你貴姓?
Ní guì xìng?
(What is) your honorable family name?
11.6 The verb of possession and existence: 有 yǒu ‘have,’ ‘exist’

有 yǒu has two meanings: ‘have’ and ‘exist.’

11.6.1 有 yǒu used to express possession

有 yǒu means ‘have’ when the subject is something that can have possessions. This includes people, animals, or any other noun that can be described as ‘having’ things:

我有一个弟弟。
Wǒ yǒu yī gè dìdi.
I have a younger brother.

那个书店有很多旧书。
Nàge shūdiàn yǒu hěn duō jù shū.
That bookstore has many old books.

中国有很多名胜古迹。
Zhōngguó yǒu hěn duō míng shèng gǔ jì.
China has many scenic spots and historical sites.

11.6.2 有 yǒu used to express existence

有 yǒu indicates existence when the subject is a location. The most common English translation of this meaning is ‘there is’ or ‘there are.’

房子后头有一个小湖。
Fángzi hòutou yǒu yī gè xiǎo hú.
Behind the house there is a small lake.

那儿有很多人排队。
Nàr yǒu hěn duō rén pái duì.
There are a lot of people there waiting in line.

11.6.3 Possession vs. existence

The meanings of possession and existence are closely related, and often a Chinese sentence with 有 yǒu can be interpreted as conveying either possession or existence. The difference in interpretation typically depends upon whether the subject is understood to be a possessor or a location.

美国大学有很多留学生。
Měiguó dàxué yǒu hěn duō liúxuéshēng.
American universities have many exchange students.

There are many exchange students in American universities.

这个图书馆有很多中文书。
Zhège tushūguǎn yǒu hěn duō Zhōngwén shū.
This library has a lot of Chinese books.

There are a lot of Chinese books in this library.
11.4 Negation of 有 yǒu

The negation of 有 yǒu is always 没有 méi yǒu.

我没有弟弟。

Wǒ méi yǒu dìdi.

I do not have a younger brother.

房子后头没有湖。

Fángzi hòutou méi yǒu hú.

There is no lake behind the house.

这个图书馆没有很多中文书。

Zhège túshūguǎn méi yǒu hěn duō Zhōngwén shū.

他在家。

Tā zài jiā.

He is at home.

图书馆在公园的北边。

Túshūguǎn zài gōngyuán de běibiān.

The library is north of the park.

Notice that English uses the verb ‘be’ and the preposition ‘at’ to express this meaning.

In zài also functions as a preposition. As a preposition, it indicates the location where an action occurs. Depending upon the sentence, it may be translated into English as ‘at,’ ‘in,’ or ‘on.’

他在家吃饭。

Tā zài jiā chī fàn.

He eats at home.

孩子在公园里玩。

Háizi zài gōngyuán lǐ wán.

The children play in the park.

You are only 16 years old. You cannot drink alcohol.
**12.4 Expressing obligations**

Obligations may be strong (*must*) or weak (*should*). In Mandarin, as in English, negation often changes the force of the words used to express obligation. This section presents a brief overview of the use of modal verbs to express obligations. For more on expressing obligations, see Chapter 50.

### 12.4.1 Strong obligation: must, have to

The Mandarin words used to indicate strong obligation (*must*) are 必须/必須 *bìxū*, 必得 *biděi*, and 得 *děi*. 必得 *biděi* and 必须/必須 *bìxū* are more formal than 得 *děi*. 必须/必須 *bìxū* is used in legal pronouncements and in other formal spoken and written contexts.

**必须/必須 bìxū**

### 12.4.2 Weak obligation – social and moral obligation: should, ought to

The modal verbs used to express weak obligations (*should*) associated with social or moral responsibilities include 应该/應該 *yīnggāi*, 该/該 *gāi*, 应当/應當 *yīngdāng*, and 当/當 *dāng*. 应当/應當 *yīngdāng* is more formal than 应该/應該 *yīnggāi* and can be used in formal texts including legal documents. 该/該 *gāi* is used in informal speech. 应/應 *yīng* is used in formal texts including legal documents. For illustrations of legal uses, see

12.4.3 Using modal verbs to express negative obligations: need not, do not have to

你去看朋友的时候不必送礼物。

Nǐ qù kàn péngyou de shíhou bù bì sòng lǐwù.

Action verbs

Action verbs are verbs that describe doing things. They include 买/買 mǎi ‘shop,’ 学/學 xué ‘study,’ 看 kàn ‘look at,’ ‘watch,’ ‘read,’ 吃 chī ‘eat,’ 睡 shuì ‘sleep,’ 去 qù ‘go,’ 唱 chàng ‘sing,’ 洗 xǐ ‘wash,’ etc.

This chapter shows you how to talk about completed, past, and ongoing actions, and introduces the overall properties of action verbs. There are two kinds of action verbs, those that describe open-ended actions, and those that describe actions that cause a change. The last two sections of this chapter present the characteristics of these two types of verbs.

13.1 Indicating that an action is complete

To indicate that an action is complete – that is, that it is viewed as a bounded event – follow the action verb or the verb + object with the perfective particle 了 le.

The location of 了 le, either after the action or after the verb + object phrase, depends upon properties of the object.

If the object consists of a noun phrase without any modification, that is, without a preceding specific, number, classifier, or description phrase, 了 le typically follows the object.

她买东西了。  
她買東西了。  
Tā mǎi dōngxi le.  
She bought things.

她到图书馆去了。  
她到圖書館去了。  
Tā dào túshūguǎn qù le.  
She went to the library.

If the object includes a description, including a specifier, a number + classifier, a question word involving quantity, or any other description, 了 le occurs directly after the verb.

我看了那个电影。  
我看了那個電影。  
Wǒ kàn le nàge diànyǐng.  
I saw that movie.

他吃了两碗饭。  
他吃了兩碗飯。  
Tā chī le liǎng wǎn fàn.  
He ate two bowls of rice.
13.3 Negating actions

13.3.1 Indicating that an action does not occur or will not occur

To indicate that an action does not occur or will not occur, negate the action verb with 不 bù.

我不吃肉。
Wǒ bù chī ròu.
I don’t eat meat.

台北从来不下雪。
Táiběi cónglái bù xià xuě.
It does not snow in Taipei.

明天是星期六。我们不上课。
Míngtiān shì xīngqīliù. Wǒmen bù shàng kè.
Tomorrow is Saturday. We don’t attend class.
**13.3.2 Indicating that an action did not occur in the past**

To indicate that an action did not occur in the past, negate the action verb with 没/沒 (有) méi (yǒu).

- 我今天没(有)吃早饭。
  - 我今天沒(有)吃早飯。
  - Wǒ jīntiān méi (yǒu) chī zǎofàn.
  - I didn’t eat breakfast today.
- 我没买电脑。
  - 我沒買電腦。
  - Wǒ méi mǎi diànnǎo.
  - I didn’t buy a computer.

► 27.1.2, 37.3

When a verb is negated with 没/沒 (有) méi (yǒu), it cannot be suffixed with 了 le. It can, however, be suffixed with 过/過 guò.

► 37.6

</tr>
<tr>
<td>I have never eaten Japanese food before.</td>
<td></td>
</tr>
</tbody>
</table>

► 37.6

**13.4 Asking about actions**

To ask if an action generally occurs, will occur, or is complete, ask a yes–no question.

**13.4.1 Yes–no questions with 吗/嗎 ma**

- 你学中文吗?
  - 你學中文嗎?
  - Nǐ xué Zhōngwén ma?
  - Do you study Chinese?
- 你今天晚上去图书馆吗?
  - 你今天晚上去圖書館嗎?
  - Nǐ jīntiān wǎnshang qù túshūguǎn ma?
  - Are you going to the library tonight?
- 你吃饭了吗?
  - 你吃飯了嗎?
  - Nǐ chī fàn le ma?
  - Have you eaten?
13.4.2 Verb-not-verb yes–no questions

To ask a yes–no question about whether an action generally occurs or will occur, use 不 bù and ask:

(subject) verb 不 bù verb (object)

你学不学中文?
你學不學中文?
Nǐ xué bù xué Zhōngwén?
Do you study Chinese?

你今天晚上去不去图书馆?
你今天晚上去不去圖書館?
Nǐ jīntiān wǎnshang qù bù qù tūshūguǎn?
Are you going to the library tonight?

To ask a yes–no question about whether an action is complete, use 没有 méi yǒu:

(subject) verb (object) 了 le 没有 méi yǒu

你吃饭了没有?
你吃飯了沒有?
Nǐ chī fàn le méi yǒu?
Have you eaten?

13.5 Open-ended action verbs

Open-ended action verbs refer to actions that can have duration and can be performed for a period of time. Examples of open-ended action verbs include 念 niàn ‘study/read aloud,’ 买/買 mǎi ‘shop,’ 写/寫 xiě ‘write,’ 学/學 xué ‘study,’ 跑 pǎo ‘run,’ 吃 chī ‘eat,’ 玩 wán ‘play,’ and 唱 chàng ‘sing.’

13.5.1 Duration of open-ended actions

To indicate the duration of an open-ended action verb, follow the verb with a duration expression. In the following examples, the verb is emphasized.

他在中国住了一年。
他在中國住了一年。
Tā zài Zhōngguó zhù le yīnián.
He lived in China for a year.

他每天看一个钟头的报。
他每天看一個鍾頭的報。
Tā měitiān kàn yī gè zhōngtou de bào.
He reads a newspaper for one hour every day.

To emphasize the ongoing action of an open-ended action verb without specifying the length of the duration, follow the verb with the durative aspect particle 着/著 zhe. 在/在 zài and 呢 ne often occur with 着/著 zhe. 在 zài occurs before the verb and 呢 ne occurs at the end of the sentence.

他在说着话呢。
他在說著話呢。
Tā zài shuōzhe huà ne.
He is speaking.
### 13.5.2 Open-ended action verbs and obligatory objects

Open-ended action verbs are typically followed by an *obligatory object*, a noun phrase that serves as the direct object of the verb. Many open-ended action verbs have a *default object*, an object that automatically occurs with the verb.

Default objects contribute little or no meaning to the *verb + object* phrase and are typically not translated into English.

Change-of-state action verbs

- ‘to read’ is 看书/看書 kàn shū
  *to read a newspaper* is 看報/看報 kàn bào and not
  *看书報/看書報 kànsū bào.

The direct object may be absent when it can be inferred from the context of the sentence.

Q: 你吃了晚饭吗？
    A: 吃了。

Q: 你吃了晚饭嗎？
    A: 吃了。

When it receives special emphasis, the direct object may occur at the beginning of the sentence as the topic, instead of after the verb.

Nàge diànyǐng wǒ hái méi kànguo.
That movie, I still haven’t seen (it).

Change-of-state action verbs

Change-of-state verbs describe events in which the action of the verb results in a change. Here are some examples of change-of-state verbs.

- 坐 zuò to sit (a change from standing to sitting)
- 站 zhàn to stand (a change from sitting to standing)
- 放 fàng to put/place (a change of location)
- 挂/掛 guà to hang (a change of location)
- 离开/離開 líkāi to depart (a change of location)
- 穿 chuān to put on (clothing – on the torso and legs)
- 戴 dài to put on (clothing – on the head, neck, and hands)
- 病 bìng to become sick (a change of health)
- 到 dào to arrive (a change of location from ‘not here’ to ‘here’)
- 去 qù to go (a change of location from ‘here’ to ‘not here’)

Change-of-state verbs and duration

Change-of-state verbs have no duration. However, some change-of-state actions bring about a resulting state. Verbs that indicate this state may be suffixed with 着/著 zhe to focus on the ongoing nature of the state. Here are some examples. A list of additional change-of-state verbs with related ongoing states is presented in 13.6.2.

Háizi dōu zài wūzi li zuòzhe.
The children are all sitting in the room.

Qiángshàng guàzhe yī zhāng huàr.
There is a painting hanging on the wall.
### Change-of-state verbs and stative verbs

Many change-of-state verbs also function as stative verbs.

- Glossary of grammatical terms, 17.2.2
Prepositions and prepositional phrases

Prepositions occur before a noun phrase and indicate some relationship between the noun phrase and the main verb of the sentence. The preposition plus its noun phrase forms a prepositional phrase.

The grammar of the prepositional phrase in the Mandarin sentence

Here are the two rules to follow when using prepositional phrases.

Rule 1. In Mandarin, the prepositional phrase occurs immediately before the verb phrase.

Compare this with English, in which the prepositional phrase occurs immediately after the verb phrase.

They bought ice cream for younger brother.

He jumped onto the bed.

Rule 2. Nothing occurs between the preposition and its noun phrase object.

• The suffixes 了 le, 着/著 zhe, and 过/過 guo follow verbs, but not prepositions:

Say this

他在中国住过一年。

He lived in China for a year.

Tā zài Zhōngguó zhùguo yīnián.

Not this

*他在中国住了一年。

He lived in China for a year.

Tā zài Zhōngguó zhù yīnián.

我昨天跟他说话了。

I spoke with him yesterday.

Wǒ zuótiān gěn tā shuō huà le.

*我昨天跟了他说话。

I spoke with him yesterday.

Wǒ zuótiān gěn le tā shuō huà.
Adverbs occur before the prepositional phrase. They do not occur between the prepositional phrase and the main verb.

Say this

请你马上到我家来。
Qǐng nǐ máshàng dào wǒ jiā lái.
Please come to my home immediately.

Not this

*请你到我家马上来。
Qǐng nǐ dào wǒ jiā máshàng lái.

我一定跟你去看电影。
Wǒ yīdìng gēn nǐ qù kàn diànyǐng.
I will definitely go with you to see a movie.

### 14.2 Basic functions of prepositions

#### 14.2.2 Prepositions that indicate an action performed toward a reference point – no movement involved

You can identify a word as either a preposition or a verb by observing the other words with which it occurs.

- Prepositions are always followed by an object noun phrase and a verb phrase. If a word is not followed by both an object noun phrase and a verb phrase, it is not a preposition.
15

Adverbs

Adverbs are words that modify the verb or verb phrase.

15.1 General properties of adverbs

In Mandarin, adverbs occur at the beginning of the verb phrase, before the verb and any prepositional phrase.

Most adverbs must precede negation, but some adverbs may occur before or after negation.

她一定不去。  and also  她不一定去。
她yìdìng bù qù.
She’s definitely not going.

(She is not definitely going.)

她也许不去。  but not  *她不也许去
她也許不去。
Tā yéxǔ bù qù.
Perhaps she won’t go.

*She not maybe go.

她并不喜欢我。  but not  *她不并喜欢我。
她並不喜歡我。
Tā bìng bù xǐhuan wǒ.
She doesn’t like me at all.

They often eat there.

Unlike verbs, adverbs typically cannot be the one word answer to a yes–no question.

Mandarin has a number of structures that are *adverbial* in function in that they describe the way an action is performed. See

| 31 |

Adjectival verbs, stative verbs, and modal verbs may be modified by intensifiers such as 很 hěn ‘very,’ 太 tài ‘too,’ and 真 zhēn ‘really.’

| 10.3, 11.2, 12.6.3 |

Adverbs add many different kinds of meaning to a sentence. This chapter presents adverbs that have *logical* functions. Other adverbs are presented throughout this book in chapters that focus on the meanings associated with the specific adverbs.

| 27.1, 34, 35, 36.2, 37, 38, 40, 41.2 |

### Adverbs with logical function: 也 yě, 都 dōu, 还/還 hái, 就 jiù, 只 zhī, and 才 cái

#### 15.2.1 也 yě ‘also, in addition’

也 yě is used to introduce a second verb phrase. It never follows negation.

也 yě can be used to introduce a second verb phrase that adds additional information about the subject.

小王学中文。他也学日文。  
Little Wang studies Chinese. He also studies Japanese.

When the subjects are identical in reference, the second subject may be omitted:

小王学中文，也学日文。  
Little Wang studies Chinese and also studies Japanese.

也 yě can be used to indicate that two different subjects share similar properties or perform the same action.

小王很高。小李也很高。  
Little Wang is very tall. Little Li also is very tall.

小王上大学。小李也上大学。  
Little Wang attends college. Little Li also attends college.
Adverbs with logical function: 也 yě, 都 dōu, 还/還 hái, 就 jiù, 只 zhī, and 才 cái

Since 也 yě introduces additional information it can sometimes be translated by ‘and’ in English. However, it is very different from English ‘and.’ ‘And’ can connect almost any kind of phrase; 也 yě can only occur before verbs or verb phrases.

Compare this Mandarin example and its English translation.

我学中文，也学中国历史。
Wǒ xué Zhōngwén, yě xué Zhōngguó lìshǐ.
I study Chinese and I also study Chinese history.

Chinese conjunctions that join noun phrases and convey the meaning of the English ‘and’ include 和 hé and 跟 gēn.

我学中文和中国历史。
Wǒ xué Zhōngwén hé Zhōngguó lìshǐ.
I study Chinese and Chinese history.

都 dōu ‘all, both’

都 dōu can indicate that a verb phrase is true for the entire subject.

我们都学中文。
Wǒmen dōu xué Zhōngwén.
We all study Chinese.

中文, 日文, 他都学。
Zhōngwén, Rìwén, tā dōu xué.
Chinese, Japanese, he studies them both.

都 dōu can indicate that a verb is true for multiple objects. Typically, when 都 dōu refers to objects, the objects occur before the verb as the topic of the sentence.

我们都学中文。
Wǒmen dōu xué Zhōngwén.
We all study Chinese.

她什么时候都很忙。
Tā shénme shíhòu dōu hěn máng.
She is always busy.
都 dōu can occur before or after negation. The relative position of negation and 都 dōu reflects a difference in meaning.

The sequence 都 dōu + negation conveys the meaning ‘all not.’

都 dōu before negation may indicate that the negated verb phrase is true for the entire subject.

他们都没学中文。
他們都沒學中文。
Tāmen dōu méi xué Zhōngwén.
They have not all studied Chinese.

都 dōu before negation can also indicate that the negated verb is true for the entire object. Often, when 都 dōu refers to the object, the object is topicalized.

猪肉，牛肉我都不吃。
豬肉，牛肉我都不吃。
Zhūròu, niúròu wǒ dōu bù chī.
Pork, beef, I don’t eat either.

都 dōu after negation indicates that negation is not true for the entire subject or that it is not true for the entire object. The sequence negation + 都 dōu can often be translated into English as ‘not all.’

我们不都是中国人。她是美国人，他是英国人。只有我是中国人。
我們不都是中國人。她是美國人，他是英國人。只有我是中國人。
Wǒmen bù dōu shì Zhōngguó rén. Tā shì Měiguó rén, tā shì Yīngguó rén.
Zhǐ yǒu wǒ shì Zhōngguó rén.
We are not all Chinese. She is American, he is English. Only I am Chinese.

美国人不都有钱。有的有钱，有的没有钱。
美國人不都有錢。有的有錢，有的沒有錢。
Měiguó rén bù dōu yǒu qián. Yǒu de yǒu qián, yǒu de méi yǒu qián.
Not all Americans have money. Some have money, some don’t have money.

15.2.3 还/還 hái ‘in addition, still, also, else’

还/還 hái marks the continuation of a situation or introduces additional actions performed by the subject. It can never follow negation.

他们还在这儿。
他們還在這兒。
Tāmen hái zài zhèr.
They are still here.

你还学中文吗？
你還學中文嗎？
Nǐ hái xué Zhōngwén ma?
Are you still studying Chinese?

我要买书，还要买纸。
我要買書，還要買紙。
Wǒ yào mǎi shū, hái yào mǎi zhǐ.
I want to buy books. (I) also want to buy paper.

你还要买什么？
你還要買甚麼？
Nǐ hái yào mǎi shénme?
What else do you want to buy?
Adverbs with logical function: 也 yě, 都 dōu, 还/还 hái, 就 jiù, 只 zhī, and 才 cái

### 15.2

**Adverbs with logical function:**

- 也 yě
- 都 dōu
- 还/还 hái
- 就 jiù
- 只 zhī
- 才 cái

15.2.4

**就 jiù ‘only, uniqueness’**

When 就 jiù precedes a verb phrase that is not linked to another verb phrase, it conveys the meaning of uniqueness.

In some sentences, this meaning is best translated by the English word ‘only’:

- 我就有一块钱。
- 我就有一塊錢。
  
  Wǒ jiù yǒu yī kuài qián.
  
  I only have one dollar.

In some contexts, 就 jiù conveys precise identification of a noun phrase. If the noun phrase is a person or place, there may be no English equivalent for 就 jiù.

- 王: 你找谁?
  你找谁?
  
  Wáng: Nǐ zhǎo shéi?
  Nǐ zhǎo shéi?

  林: 我找王美玲。
  我找王美玲。

  Lín: Wǒ zhǎo Wáng Měilíng.
  Wǒ zhǎo Wáng Měilíng.

  王: 我就是。
  我就是。

  Wáng: Wǒ jiù shì.
  Wǒ jiù shì.

If the noun phrase is part of a location phrase, 就 jiù may be translated as ‘right’ or ‘precisely.’

- Q: 赵经理的办公室在哪儿?
  趙經理的辦公室在哪兒?
  
  Zhào jīnglǐ de bàngōngshì zài nǎr?
  Zhào jīnglǐ de bàngōngshì zài nǎr?

  A: 她的办公室就在这儿。
  她的辦公室就在這兒。

  Tā de bàngōngshì jiù zài zhèr.
  Her office is right here.

  Q: 图书馆在哪儿？
  圖書館在哪兒？
  
  Túsīguǎn zài nǎr?
  Túsīguǎn zài nǎr?

  A: 就在火车站的对面。
  就在火車站的對面。

  Jiù zài huǒchēzhàn de duìmiàn.
  Right across from the train station.
就 jiù is also used to link two verb phrases and to signal a relationship of sequence between them.

我看了報以後就睡覺。
Wǒ kàn le bào yǐhòu jiù shuì jiào.
After I read the newspaper I will go to sleep.

她很聰明。一學就會。
Tā hěn cōngming. Yī xué jiù huì.
She is really smart. As soon as she studies it, she gets it.

42.2.2.1
就 jiù usually precedes negation, but it may also follow negation.

這件事情不就是我一个人知道。
Zhè jiàn shìqing bù jiù shì wǒ yī gè rén zhīdao.
(As for) this matter, it is not just I who knows.

15.2.5 只 zhǐ ‘only’
只 zhǐ can be used interchangeably with 就 jiù to express the meaning ‘only.’ It does not have any of the other meanings or functions associated with 就 jiù.

我只有一块钱。
Wǒ zhǐ yǒu yī kuài qián.
I only have one dollar.

像 就 jiù, 只 zhǐ typically precedes negation, but may also follow it.

才 cái ‘only, only then’
才 cái indicates that something is less than expected. In sentences in which there is only a single verb, 才 cái may be translated into English as ‘only.’

他才認識五個字。
Tā cái rěnshì wǔ gè zì.
He only knows (recognizes) five characters [and that is fewer than one would expect].

那个孩子才一岁。当然还不会说话。
Nàge háizi cái yīsuì. Dāngrán hái bù huì shuō huà.
That child is only one year old. Of course (s/he) can’t speak yet.

我今天才挣了三百元。
Wǒ jīntiān cái zhèng le sānbǎi yuán.
Today I only earned 300 yuan (300 dollars).
Adverbs with logical function: 也 yě, 都 dōu, 还/還 hái, 就 jiù, 只 zhī, and 才 cái

When 才 cái is used to link two verb phrases as in the following sentences, it may be translated as ‘only then.’

- 她做完了功课才睡觉。
- 她做完了功课才睡覺。
- Tā zuòwán le gōngkè cái shuì jiào. She finishes doing her homework and only then goes to sleep.
- 那本书我看了两次才懂。
- 那本書我看了兩次才懂。
- Nà běn shū wǒ kàn le liǎng cì cái dǒng. That book, I read it twice and only then understood (it).

### 15.2.2.2

才 cái never follows negation.

In sentences with 才 cái, perfective 了 le does not occur in the main clause.

### 15.2.7

而已 éryǐ ‘and that is all’

In Taiwan, the sentence final expression 而已 éryǐ ‘and that is all’ is commonly used to reinforce the sense of only contributed by 就 jiù, 只 zhī, and 才 cái.

- 我只有五块钱而已。
  我只有五塊錢而已。
  Wǒ zhǐ yǒu wǔ kuài qián éryǐ. I only have five dollars (and that is all).
- 他就写了一个字而已。
  他就寫了一個字而已。
  Tā jiù xiě le yī gè zì éryǐ. He only wrote one character (and that is all).

The meaning ‘only if’ is expressed with the sentence initial phrase 除非 chúfēi.
Conjunctions are words that join phrases belonging to the same grammatical category and indicate a relationship between them. Mandarin conjunctions include the following.

### 16.1 Conjunctions that indicate an ‘additive’ or ‘and’ relationship

#### 16.1.1 和 hé

王明和李安是大学生。

Wáng Míng hé Lǐ Ān shì dàxuéshēng.

Wang Ming and Li An are college students.

#### 16.1.2 跟 gēn

北京跟上海都是很值得去看的地方。

Běijīng gēn Shànghǎi dōu shì hěn zhíde qù kàn de dìfang.

Beijing and Shanghai are both places worth seeing.

跟 gēn also functions as a preposition.

#### 16.1.3 同 tóng

我同他的关系很不错。

Wǒ tóng tā de guānxi hěn bù cuò.

The relationship between him and me is not bad (really good).

#### 16.1.4 与/與 yǔ

我们对中国的文化与历史都很有兴趣。

Wǒmen duì Zhōngguó de wénhuà yǔ lìshǐ dōu yǒu xīngqù.

We are really interested in Chinese culture and history.

---

**NOTE**

同 tóng is used in southern China and is not common in the north. 与/與 yǔ is used in literary phrases.
Conjunctions that indicate a disjunctive or ‘or’ relationship

16.2 Conjunctions that indicate a disjunctive or ‘or’ relationship

16.2.1 还是/還是 háishi ‘or’

还是/還是 háishi is used in questions that ask the addressee to choose between two alternatives, only one of which can be true or possible. It conveys the sense of ‘either . . . or.’ 还是/還是 háishi questions often end with 呢 ne.

Q: 你是来旅游的还是来学习的？
你來旅遊的還是來學習的？
Did you come for vacation or to study?
Nǐ shì lái lǚyóu de háishi lái xuéxí de?
Wǒ shì lái xuéxí de.

Nǐ yào hē hóng chá háishi hē huā chá ne?
Wǒ yào hē hóng chá.
I want to drink black tea.

(In Chinese: red tea or jasmine tea?)

还是/還是 háishi precedes verb phrases. However, if the second verb phrase begins with 是 shì, is shì is usually omitted.

Q: 你是美国人还是英国人呢？
你是美國人還是英國人呢？
Are you American or British?
Nǐ shì Měiguórén háishi Yīngguórén ne?
Wǒ shì Měiguórén.
I’m American.

还是/還是 háishi is sometimes included in an answer to a 还是/還是 háishi question to mark the preferred alternative. In this usage, 还是/還是 háishi functions as an adverb and not as a conjunction.

Q: 你想这个问题, 是现在讨论好
你想這個問題, 是現在討論好
(Nas for) this question, do you think we should talk about it now or later?
Nǐ xiǎng zhège wèntí, shì xiànzài tǎolùn háishi yǐhòu zài tǎolùn hǎo?
Wǒ xiǎng háishi yǐhòu zài tǎolùn hǎo.
I think we should talk about it later.

16.2.2 或者 huòzhě ‘or’

或者 huòzhě ‘or’ is used in statements to present two alternatives, both of which are possible.

Q: 你要今天去长城还是明天去长城？
你要今天去長城還是明天去長城？
Do you want to go to the Great Wall today or tomorrow?
Nǐ yào jīntiān qù Chángchéng háishi míngtiān qù Chángchéng?
Jǐntiān qù huòzhě míngtiān qù dōu xíng.
Today and tomorrow are both okay.

Mandarin conjunctions are much more restricted than English conjunctions in the grammatical categories that they join. In Mandarin, the ‘and’ conjunctions only join noun phrases. The ‘or’ conjunctions only join verb phrases.

Most Mandarin connecting words are adverbs. They are presented in the relevant chapters on sentence connection.

Aspect

Aspect refers to the way that an action is viewed, either from the outside, as a bounded event, or from the inside, as an ongoing situation. Languages differ as to whether aspectual distinctions are signaled in the grammar. In Mandarin, they are. Mandarin grammar marks three different aspectual distinctions—perfective, durative, and experiential—each signaled by a verb suffix: 了 le perfective, 着/著 zhe durative, and 过/過 guo experiential. These suffixes, often referred to as aspect particles, directly follow the verb (or, for perfective 了 le, either the verb or verb + object phrase). Mandarin also signals progressive aspect with pre-verbal 在 zài or the phrase 正在 zhèngzài. Progressive aspect is discussed section 17.2.1.

17.1

Perfective aspect

The perfective aspect marker 了 le signals that an action is viewed as bounded and complete.

17.1.1

Perfective 了 le in simple sentences

17.1.1.1

The location of perfective 了 le in simple sentences

了 le follows the object of the verb if the object is an unmodified noun, such as the object in the verb phrases 吃饭/吃飯 chī fàn ‘eat,’ 说话/說話 shuō huà ‘speak,’ 写字/寫字 xiě zì ‘write,’ 看书/看書 kàn shū ‘read,’ 洗澡 xǐ zǎo ‘bathe,’ and 看电视/看電視 kàn diànshì ‘watch television.’

我已經吃饭了。
Wǒ yǐjing chī fàn le.
I have already eaten.

他们昨天在宿舍看电视了。
Tāmen zuótiān zài sùshè kàn diànshì le.
They watched television in the dorm yesterday.

了 le directly follows the verb if the object of the verb is a modified noun. Modified nouns are nouns with any kind of modifier, including:

specifier + classifier + noun

我看了那个电影。
Wǒ kàn le nàge diànyǐng.
I saw that movie.
Perfective aspect

(specifier) + number + classifier + noun

我看了(这)两本书。
Wǒ kàn le (zhè) liǎng běn shū.
I read (these) two books.

(number + classifier +) description phrase + noun

我吃了(一碗)牛肉面。
Wǒ chī le (yī wǎn) niúròu miàn.
I ate (a bowl of) beef noodles.

我借了他的车。
Wǒ jiè le tā de chē.
I borrowed his car.

**17.1.1.2 Stating that an action does not or has not happened**

Perfective 了 le only occurs in affirmative sentences, never in negative sentences. This is because it signals that an action is viewed as a complete, bounded event. Actions that do not happen can never be seen as complete or bounded.

To indicate that an action does not happen, negate the action verb with 不 bù.

他不吃早饭。
Tā bù chī zǎofàn.
He does not eat breakfast.

To indicate that an action has not happened, negate the ENTIRE action verb phrase with 没/沒 méi, or 没/沒有 méi yǒu. If the action includes a prepositional phrase, 没/沒 méi precedes the prepositional phrase.

他没吃早饭。
Tā méi chī zǎofàn.
He did not eat breakfast.

我没给他打电话。
Wǒ méi gěi tā dǎ diànhuà.
I did not phone him.

**17.1.3 Asking whether actions are complete**

To ask whether an action is complete, use a 吗/嗎 question or a verb-not-verb yes–no question as follows.

你吃饭了吗?
Nǐ chī fàn le ma?
Have you eaten?

你吃饭了没有?
Nǐ chī fàn le méi yǒu?
Have you eaten?
Perfective 了 le in sequence sentences

Perfective aspect 了 le may be used in narrative sequence sentences that can be translated as ‘after VP₁, VP₂.’ 了 le can co-occur with other markers of sequence in these sentences: the adverb 就 jiù and the noun 以后/以後 yǐhòu ‘after.’

我吃了饭以后就给你打电话。
我吃了飯以後就給你打電話。
Wǒ chī le fàn yǐhòu jiù gěi nǐ dǎ diànhuà.
After I eat I will phone you.

Sometimes, perfective 了 le is the only explicit marker of sequence in a sequence sentence.

你到了宿舍请给我打电话。
你到了宿舍請給我打電話。
Nǐ dào le sùshè qǐng gěi wǒ dǎ diànhuà.
(After) you arrive at the dorm, phone me.

Sequence can also be inferred without perfective 了 le.

我回家以后就给你打电话。
我回家以後就給你打電話。
Wǒ huí jiā yǐhòu jiù gěi nǐ dǎ diànhuà.
After I return home, I will phone you.

To indicate that the entire sequence is a complete bounded event, include perfective 了 le in the second clause, following the guidelines for the placement of perfective 了 le in section 17.1.1.1.

他吃了饭就走了。
他吃了飯就走了。
Tā chī le fàn jiù zǒu le.
After he ate, he left.

学生做完了功课就交给老师了。
學生做完了功課就交給老師了。
Xuésheng zuòwán le gōngkè jiù jiāo gěi lǎoshī le.
After the students finished their work, they handed it to the teacher.

These sentences have two instances of 了 le. The one that follows the first verb indicates sequence. The one that occurs in the second clause indicates that the sequence is a complete event.

Perfective aspect vs. past tense

Aspect is different from tense. While aspect focuses on the internal or external properties of events, tense anchors events to time, marking them as past, present, or future. There is some
Durative aspect

Overlap between perfective aspect in Mandarin and past tense in English, especially in simple affirmative sentences. But there are many times when perfective aspect and past tense do not overlap. Here are the major differences between tense in English and perfective aspect in Mandarin.

- Perfective aspect is only a feature of action verbs. Stative verbs, adjectival verbs, and modal verbs cannot be followed by perfective 了 le. In English, tense is a feature of all verbs.
- Perfective aspect is only a feature of verbs in affirmative form. In English, tense is a feature of verbs in affirmative and negative sentences.
- In narrative sequence sentences, perfective aspect can occur in the first clause to signal sequence. In English, the verbs in sequence sentences are marked for relative tense, not sequence.

Durative aspect

Durative aspect focuses on the internal structure of a situation and signals that it is ongoing. Mandarin marks durative aspect in two ways, with the verb suffix 着/著 zhe, and with pre-verbal 在 zài or 正在 zhèngzài. Sentences with durative aspect often end with the final particle 呢 ne.

着/著 zhe and 在 zài/正在 zhèngzài focus on different types of duration. 着/著 zhe indicates that a verb describes a continuous situation. We will refer to it here as the durative suffix. 在 zài and 正在 zhèngzài focus on the progression of a situation over time. 正在 zhèngzài focuses on the progression of a situation that is happening now, and can often be translated as ‘right now.’ 在 zài and 正在 zhèngzài are sometimes referred to as progressive markers, and we will use that term here. Durative and progressive aspect markers can sometimes occur together to describe a situation, but there are times when only one or the other is appropriate.

Progressive markers

The progressive markers 在 zài and 正在 zhèngzài usually occur with open-ended action verbs, since actions can progress over time. 在 zài can also occur with certain adjectival verbs. See 17.2.3. 在 zài and 正在 zhèngzài immediately precede the verb phrase, including any prepositional phrase associated with the verb, and they can only occur in the main clause of a sentence.

subject 在 zài verb phrase (呢 ne)

他们在学习中文。

她在跟朋友唱歌。
她在跟朋友唱歌。
Tā zài gēn péngyou chàng gē.

To negate sentences with progressive aspect, Beijing Mandarin speakers use 没/沒 (有) méi(yǒu):

他们没在学中文。
他們沒在學中文。
Tāmen méi zài xué Zhōngwén.
They are not studying Chinese.

Speakers from other Mandarin-speaking regions may also negate these sentences with 不 bù.

17.2.2 The durative aspect suffix 着/著 zhe

The durative aspect suffix 着/著 zhe emphasizes the durative nature of the action as an unchanging, ongoing situation.

着/著 zhe may occur as a suffix for open-ended action such as 吃 chī ‘eat,’ 说/說 shuō ‘speak,’ 睡 shuì ‘sleep,’ 洗 xǐ ‘bath,’ 看 kàn ‘look at, read,’ and 写/寫 xiě ‘write.’ When used with open-ended action verbs, it focuses on the ongoing nature of the action.

他们说着话呢。
他們說著話呢。
Tāmen shuō zhe huà ne.
They are (in the middle of the action of) speaking.

他们睡着觉呢。
他們睡著覺呢。
Tāmen shuì zhe jiào ne.
They are (in the middle of the action of) sleeping.

她哭着呢。
她哭著呢。
Tā kūzhe ne.
She’s (in the middle of the action of) crying.

着/著 zhe can also be used as a suffix for change-of-state placement verbs such as 站 zhàn ‘stand,’ 坐 zuò ‘sit,’ 停 tíng ‘stop,’ 掛 guà ‘hang,’ 穿 chuān ‘put on.’ When used with change-of-state action verbs, the verb refers to the resulting state, and not to the action itself.

她穿着高跟鞋。
她穿著高跟鞋。
Tā chuānzhe gāogēnxié.
She is wearing (she is in) high-heeled shoes.

孩子都在屋子里坐着。
孩子都在屋子裡坐著。

The children are all sitting in the room.

墙上挂着一张画儿。
牆上掛著一張畫兒。
Qiángshàng guàzhe yī zhāng huàr.
There is a painting hanging on the wall.
17.2.3 Duration vs. progression

Sometimes, either 着/著 zhe or 在 zài can occur with a verb. The choice of 着/著 zhe or 在 zài changes the sense of the verb in ways that illustrate the difference between the two types of durative aspect markers. Here are some examples.

穿着/穿著 chuānzhe

- 她穿着高跟鞋。
  
  Tā chuānzhe gāogēnxié.
  
  She is wearing (she is in) high-heels.

在穿 zài chuān

- 她在穿高跟鞋。
  
  Tā zài chuān gāogēnxié.
  
  She’s putting on high heels.

The verb 穿 chuān means both ‘put on (clothing on the torso or legs)’ or ‘wear (clothing on the torso or legs).’ When suffixed with 着/著 zhe, which focuses on unchanging, durative situations, the verb must be interpreted as ‘wear.’ When preceded by the aspect marker 在 zài, which focuses on the progression of a situation, the verb must be interpreted as ‘put on.’

Here are additional examples:

挂着/掛著 guàzhe

- 墙上挂着一张画儿。
  
  Qiángshàng guàzhe yī zhāng huàr.
  
  There is a painting hanging on the wall.

在掛 zài guà

- 爸爸在挂画儿呢。
  
  Bāba zài guà huàr ne.
  
  Dad is hanging pictures.

挂 guà means ‘hang (an object on a wall)’ or ‘be hanging (on a wall).’ When someone is performing the action of hanging more than one picture, the action itself involves a progression that takes place over time. Preceding 挂 guà with the progressive aspect marker 在 zài emphasizes that ongoing progression. In contrast, once an item is hung on a wall, it remains hanging there, an unchanging state. Suffixing 挂 guà with 着/著 zhe emphasizes the ongoing, unchanging nature of the situation. The same contrast is illustrated in the following pair of sentences with 写/寫 xiě ‘write.’ When 写/寫 xiě is preceded by 在, the sentence emphasizes the ongoing progression of writing. When 写/寫 xiě is suffixed with 着/著 zhe, the sentence emphasizes the unchanging, ongoing nature of something that is written.

写着/寫著 xiězhe

- 门上写着你的名字。
  
  Ménshang xiězhe nǐ de míngzi.
  
  Your name is written on the door.

在写/在寫 zài xiě

- 弟弟在写汉字。
  
  Dìdì zài xiě Hàn zì.
  
  Younger brother is writing Chinese characters.
Here are two examples, one with an action verb, one with an adjectival verb, that include both the durative suffix 着/著 zhe and the progressive marker 在 zài. In this first example with the open-ended action verb 开/開 kāi ‘drive,’ the suffix 着/著 zhe is acceptable with or without the second clause 不能打电话/不能打電話 bù néng dǎ diànhuà ‘(one) can’t make a phone call.’ But the use of 在 zài is only acceptable when the second clause occurs.

我在开着车呢，不能打电话。
Wǒ zài kāizhe chē ne, bù néng dǎ diànhuà.
I am driving right now and can’t make a phone call.

With or without the second clause, 开/開 kāi ‘drive,’ has duration. But only with the inclusion of the second clause does the situation involve a progression, in this case from driving to driving while making a phone call.

The following sentence, with the adjectival verb 热/熱 rè ‘be hot,’ is acceptable with or without 在 zài. Without 在 zài it means that the soup is in the state of being hot. With the inclusion of 在 zài the sentence means that the soup is ‘becoming hot’ or is ‘being heated.’ In other words, 在 zài adds a sense of progression to the action.

汤在热着呢。
Tāng zài rèzhe ne.
The soup is being heated.

17.2.4 duration of a background event

The durative aspect marker 着/著 zhe is commonly used in complex sentences to indicate that an action is ongoing in the background while some other action occurs. This kind of sentence takes the following form:

subject verb1-着/著 zhe (object1), verb2 (object2)

她听着音乐做作业。
Tā tīngzhe yīnyuè zuò zuòyè.
She is doing homework while listening to music. (background action: listening to music)

他们走着路谈话。
Tāmen zǒuzhe lù tán huà.
They’re chatting while walking. (background action: walking)

她坐着睡觉。
Tā zuòzhe shuì jiào.
She’s sleeping sitting down. (background action: sitting)

Progressive aspect cannot be used in sentences like these.

► 10, 13, 38, 43.2, 43.3
Experiential aspect

Experiential aspect focuses on an action that has occurred in the past and signals that it is relevant to the current discourse. Mandarin marks experiential aspect with the verb suffix 过/過 guo. 过/過 guo immediately follows the verb and typically occurs in neutral tone. It can only be used with action verbs, and conveys the meaning that the subject has done the action before.

我看过那个电影。
Wǒ kànguo nàge diànyǐng.
I have seen that movie before.

我来过这里。
Wǒ láiguō zhèlǐ.
I have been here before.

The experiential suffix 过/過 guo is appropriate in the following circumstances:

- when talking about actions that the subject does not perform on a regular basis:
  
  我去过中国。
  Wǒ qùguo Zhōngguó.
  I’ve been to China before. (I have had the experience of going to China.)

- when talking about actions that happened in the remote past:
  
  我小的时候听过那个故事。
  Wǒ xiǎo de shíhou tīngguo nàge gùshì.
  When I was small (young), I heard that story.

- when talking about actions that are repeatable:
  
  我登过万里长城。
  Wǒ dēngguo Wànli Chángchéng.
  I climbed the Great Wall.

Actions that are not repeatable cannot be suffixed with 过/過 guo.

Say this Do not say this

她高中毕业了。
Tā gāozhōng biyè le.
She graduated high school.

*她高中毕业过。
Tā gāozhōng biyè guo.
She graduated high school.

A verb can be suffixed with both experiential 过/過 guo and perfective 了 le. When it is, 过/過 guo precedes 了 le. The meaning conveyed is that the subject has experienced the action of the verb and that the entire event is viewed in its entirety as closed and bounded.

那部电影我已经看过了，不要再看了。
Nà bù diànyǐng wǒ yǐjìng kànguo le, bù yào zài kàn le.
I’ve already seen that movie before. I don’t want to see it again.
The negation of verb 过/過 guo is 没/沒 (有) méi(yǒu) + verb 过/過 guo.

我没看过那部电影。
Wǒ méi kànguo nà bù diànyǐng.
I have not seen that movie before.

我没来过这里。
Wǒ méi láiguó zhèlǐ.
I have not been here before.

我没登过万里长城。
Wǒ méi dēngguo Wànlǐ Chángchéng.
I have not climbed the Great Wall before.

To ask whether the subject has performed an action before, ask a 吗/嗎 question or a verb-not-verb question as follows:

subject verb 过/過 guo object 吗/嗎 ma?

or

subject verb 过/過 guo object 没有/沒有 méi yǒu?

你看过那个电影吗? 你看過那個電影嗎?
Nǐ kànguo nàge diànyǐng ma? Nǐ kànguo nàge diànyǐng méi yǒu?
Have you seen that movie?

你登过万里长城吗? 你登過萬里長城嗎?
Nǐ dēngguo Wànlǐ Chángchéng ma? Nǐ dēngguo Wànlǐ Chángchéng méi yǒu?
Have you climbed the Great Wall?

A comparison of aspectual distinctions

Aspectual distinctions are part of a system, so they exist in opposition to each other. Perfective aspect looks at the boundaries of events that occur in a time relevant to the present. Durative aspect looks at an action from the inside, focusing on the ongoing nature of the action. Experiential aspect, like perfective aspect, signals bounded events, but only events whose completion took place at a time remote from, or separated from, the present.
18

Resultative verbs

18.1 Structure of resultative verbs

Resultative verbs consist of an action verb ‘head’ and a resultative suffix:

\[ \text{action verb} + \text{resultative suffix} \]

For example, the action verb 听/聽 tīng ‘listen’ + the resultative suffix 见/見 jiàn ‘perceive’ form the resultative verb 听见/聽見 tīngjiàn ‘hear.’ ‘Listen’ and ‘hear’ are related in meaning. ‘Listen’ is an open-ended action. ‘Hear’ is the perception of sounds that results from listening. English typically uses two different verbs to express actions and their results or conclusions. Mandarin uses the same verb for both, adding a resultative suffix to the action to indicate result or conclusion.

Aspect markers occur after the resultative suffix and never between the action verb head and the suffix. For example, to indicate that an action occurred and reached a particular conclusion or result, add perfective 了 le to the end of the resultative verb, and not between the action verb and the resultative suffix.

Say this  Not this
他写完了功课。 *他写了完功课。  
他寫完了功課。 他寫了完功課。  
Tā xiěwánle gōngkè. Tā xiělewán gōngkè.  
He finished doing (writing) his homework.

Similarly, when indicating that an action did not reach a particular result or conclusion, the resultative verb as a whole is negated with 没/沒 méi ‘not.’ 没/沒 méi can only occur at the beginning of a resultative verb, and may never occur between the action verb and resultative suffix.

Say this  Not this
我从来没写错过那个字。  *我从来写没错过那个字。  
我從來沒寫錯過那個字。  
Wǒ cónglái méi xiěcuòguo nàge zì.  Wǒ cónglái xiě méi cuòguo nàge zì.  
I have never written that character incorrectly.

18.2 Action verb heads

The action verb head may be either an open-ended action verb or a change-of-state action verb.

Open-ended action verbs refer to actions that have duration and can be performed for a period of time. They include 说/說 shuō ‘speak,’ 写/寫 xiě ‘write,’ 吃/吃 chī ‘eat,’ 听/聽 tíng ‘listen,’ 唱/唱 chàng ‘sing,’ 睡/睡 shuì ‘sleep,’ and many other verbs. Their meanings do not entail the completion or result of the action. For example, the open-ended action verb 找 zhǎo means
Resultative suffixes contribute one of the following meanings to the resultative verb.

- They indicate the result of the action. These suffixes are often called ‘complements of result’ or ‘result complements.’
  
  For example: 写/寫 xiě ‘write’ 写错/寫錯 xiěcuò ‘write incorrectly’

- They indicate the conclusion of the action.
  
  For example: 写/寫 xiě ‘write’ 写完/寫完 xiěwán ‘finish writing’

Here are common resultative endings, followed by examples of resultative verbs in which the endings occur. The list of resultative verbs is not exhaustive. Action verbs can freely combine with resultative suffixes as long as the action can be concluded in the way that the suffix indicates.

Resultative verbs with idiomatic meanings will be discussed at the end of this chapter.

A third type of suffix, directional suffixes (sometimes called directional complements), also serve as suffixes on action verbs. Action verb + directional suffixes form directional verbs. The properties of directional verbs are very similar to those of resultative verbs.

Suffixes that indicate result: result complements

- 到 dào ‘reach, succeed, attain’

Resultative verbs in affirmative and negative sentences

In affirmative sentences, resultative verbs indicate that an action concludes in a particular way. When talking about actions that have already concluded, affirmative sentences with resultative verbs include the perfective aspect suffix 了 le.

我找到了我的手机。
Wǒ zhǎodàole wǒ de shǒujī.  
I found my cellphone.

我用完了父母给我的钱。
Wǒ yǐjing yòngwánle fùmǔ gěi wǒ de qián.  
I have already spent the money that my parents gave to me.

你猜对了; 我有三块钱。
Nǐ cāiduìle; wǒ yǒu sān kuài qián.  
You guessed it right; I have three dollars.

The object of the resultative verb may be topicalized.

这个字, 你又写错了。
Zhèige zì, nǐ yòu xiěcuòle.  
You wrote this character wrong again.

Resultative verbs can also be used to talk about concluding an action in the future. In situations like these, the perfective aspect marker does not occur.

我明天能把这本书看完。
Wǒ míngtiān néng bǎ zhè běn shū kànwán.  
I can finish reading this book tomorrow.

When a resultative verb is used in a negated sentence, the sentence conveys the information that some action was not or has not been completed. Negation is always 没/没 méi, and it occurs right before the resultative verb.

今天的功课, 我还没做完。
Jīntiān de gōngkè, wǒ hái méi zuòwán.  
Today’s homework, I haven’t yet finished doing it.

还没预备好呢。
Hái méi yùbèihǎo ne.  
I haven’t finished preparing.

Perfective 了 le never occurs in negated sentences, but when talking about some action that has never occurred before, the experiential aspect marker 过/過 guò may occur right after the resultative verb.

她从来没做错过事。
Tā cónglái méi zuòcuòguo shì.  
She’s never done anything wrong before.

You can also ask yes–no questions using one of the following verb-not-verb structures. Native speakers differ in their preferences for these forms. When using the verb + 了 le + 没有/沒有 méi yǒu form, the object is often omitted. 了 le is not used in the 有没有/有沒有 yǒu méi yǒu form.

The potential form of resultative verbs

The potential form of resultative verbs indicates that the subject is able to, or unable to, reach the desired result or conclusion. The potential is created by adding the potential infixes 得 de or 不 bu between the action verb head and the resultative suffix, as follows.

Affirmative potential form

- **action verb + 得 de + resultative suffix**
  - do the action and be able to reach the conclusion or result
  - 找得到 zhǎodedào ‘able to find’
  - 做得完 zuòdewán ‘able to finish doing’
  - 看得懂 kàndedǒng ‘read and be able to understand’

Negative potential form

- **action verb + 不 bu + resultative suffix**
  - do the action but be unable to reach the conclusion or result
  - 找不到 zhǎobudào ‘unable to find’
  - 做不完 zuòbuwán ‘unable to finish doing’
  - 看不懂 kànbudǒng ‘read but be unable to understand’

Aside from the potential infixes 得 de and 不 bu, nothing occurs between the action verb head and the resultative suffix.

Here are sentences with resultative verbs in the affirmative and negative potential form. Notice that the aspectual suffixes 了 le and 过/過 guo never occur when the potential form of a resultative verb is used.

Directional verbs

19.1 Structure of directional verbs

Directional verbs consist of an action verb that involves motion (a motion verb) and a directional suffix.

\[ \text{motion verb} + \text{directional suffix} \]

For example, the motion verb 坐 zuò ‘sit’ + the directional suffix 下 xià ‘down’ form the resultative verb 坐下 zuòxià ‘sit down.’

Directional suffixes are also sometimes referred to as directional complements.

Sentences with directional verbs

19.4

19.4.1 Topicalization of the direct object

In sentences with directional verbs, the direct object is often topicalized, presented at the beginning of the sentence, or, when the conditions for 把 bǎ are met, included in the sentence as the object of 把 bǎ.

Nǐ de dōngxi wǒ dōu dài lái le.

19.4.2 The position of the location phrase in sentences with directional verbs

Sentences with directional verbs with simple directional suffixes cannot include a location phrase. Sentences with directional verbs with complex directional suffixes can include a location phrase. The location phrase occurs between the first part of the suffix (the part that indicates absolute direction) and 来 lái or 去 qù.

verb of motion + direction + location + 来 lái or 去 qù

Tā pá shàng [shān] qù le.
He climbed up the mountain.

Bǎ wǒ de chē kāi huí [jiā] qù!
Drive my car home!
### 19.4.3 Negation with directional verbs

Negation occurs before the directional verb and can be 不 bù or 没 méi depending upon whether the sentence refers to a non-past or habitual action, or an action that has not been completed.

你不可以把车开进公园去。
你不能把自行車騎上山去？

Nǐ bù kěyǐ bǎ chē kāijìn gōngyuán qù.

我还没把东西放下。

Wǒ hái méi bǎ dōngxi fàngxià.

### 19.4.4 Aspectual suffixes with directional verbs

The perfective aspect suffix 了 le can occur with directional verbs. It occurs at the very end of the directional suffix.

他爬上山去了。

Tā páshàng shān qù le.

He climbed up the mountain.

她把书都拿回图书馆去了。

Tā bǎ shū dōu náhuí túshūguǎn qù le.

She took all of the books back to the library.
The potential form of directional verbs

Like resultative verbs, most directional verbs also have a potential form. The potential is formed by the inclusion of the potential infixes 得 de or 不 bu between the motion verb and the directional suffix.

**Affirmative potential form**

\[ \text{motion verb} + \text{得 de} + \text{directional suffix} \]

‘able to perform the motion in the specified direction’

**Negative potential form**

\[ \text{motion verb} + \text{不 bu} + \text{directional suffix} \]

‘unable to perform the motion in the specified direction’

- 穿不上 chuānbushàng ‘unable to wear/put on’
- 那条裤子太小了。我穿不上。

Asking yes–no questions with directional verbs

To ask a yes–no question with 吗/嗎 ma about an action involving a directional verb, simply place 吗/嗎 ma at the end of the sentence.

  她把書都拿回圖書館去了嗎？
  Tā bǎ shū dōu náhuí túshūguǎn qù le ma?
  Did she take all of the books back to the library?
When using a directional verb, verb-not-verb yes–no questions may take one of the following forms. Mandarin speakers differ in their preferences for these forms. When using the affirmative statement + 没有/沒有 méi yǒu form, the destination location (presented here in square brackets) is often omitted. 了 le does not occur in the 有没有/有没有 yǒu méi yǒu form.

affirmative statement + 没有/沒有 méi yǒu

topic (object in sentence initial position) + subject +
affirmative potential + negative potential

這麽高的山，你上得去上不去？

做下去 zuòxiàqù ‘keep doing’
活下去 huóxiàqù ‘go on living’
听下去/聽下去 tīngxiàqù ‘keep listening’
Directional verbs and directional suffixes with figurative or idiomatic meaning

起來 qǐlái (directional suffix). In addition to its literal meaning ‘rise up,’ 起來 qǐlái conveys the meaning ‘begin to do the action of the verb.’

- 唱起來 chángqǐlái ‘begin to sing’
- 哭起來 kūqǐlái ‘begin to cry’
- 打起來 dǎqǐlái ‘begin to fight’

V-起來 qǐlái can also serve on pairs of verbs to indicate contrast.

- 中国菜，吃起来很容易，做起来很难。
- Zhōngguó cài, chīqǐlái hěn róngyì, zuòqǐlái hěn nán.
  Chinese food is easy to eat but hard to cook.
把 bǎ sentences: The ‘disposal’ construction

把 bǎ sentences focus on what happens to the object of a verb as the result of some action. They answer the question: What does/did the subject do to the object? 把 bǎ sentences can always be paraphrased as: the subject takes/took the object and does/did (an action) with it. The structure of 把 bǎ sentences is sometimes called the ‘disposal construction.’

20.1 The structure of 把 bǎ sentences

把 bǎ sentences take the following form:

subject + 把 bǎ object + action verb

他把我的车偷走了。
他把我的車偷走了。
Tā bǎ wǒ de chē tōuzǒu le.
He stole my car away.

The 把 bǎ construction is widely used in Mandarin, but it may only be used when the object and the verb have certain properties.

20.2 Properties of the subject and object in 把 bǎ sentences

20.2.1 Properties of the subject

The subject in a 把 bǎ sentence must be capable of causing something to happen. This includes subjects that are animate such as people, animals, insects, etc., and also inanimate forces of nature such as rain, wind, earthquakes, floods, etc.

把 bǎ sentences with animate subject

我把英文翻成中文了。
Wǒ bǎ Yīngwén fānchéng Zhōngwén le.
I translated the English into Chinese.

谁把烤鸭吃光了。
誰把烤鴨吃光了。
Shéi bǎ kǎoyā chīguāng le.
Who ate (finished eating) the roast duck?

鸡把虫都吃了。
雞把蟲都吃了。
Jī bǎ chóng dōu chī le.
The chicken(s) ate all of the worms.
Properties of the subject and object in 把 bā sentences

### 20.2.2 Properties of the object

- The object must refer to something definite or generic.
  
  Objects are definite if they have already been mentioned in the discourse, or if they are preceded by the specifier 这 zhè ‘this, these’ or 那 nà ‘that, those,’ or are modified by a description phrase.

  我已经把那本书看完了。
  我已經把那本書看完了。
  **Wǒ yǐjīng bǎ nà běn shū kànwán le.**
  I already finished reading that book.

  他把孩子的衣服都洗干净了。
  他把孩子的衣服都洗乾淨了。
  **Tā bǎ háizi de yīfu dōu xǐ gānjìng le.**
  He washed the children’s clothing clean.

  Objects are generic if they refer to a group or class of objects in general rather than to a specific or definite object. When you say ‘I like mustard on hot dogs,’ both ‘mustard’ and ‘hot dogs’ have generic rather than definite or specific reference.

  他经常把花儿送给女朋友。
  他經常把花兒送給女朋友。
  **Tā jīngcháng bǎ huār sòng gěi nǚ péngyou.**
  He regularly sends his girlfriend flowers.

- The object must exist independently of the action of the verb.
  In 把 bā sentences, the verb can do something to the object, but it cannot create the object. Therefore, for example, you can use 把 bā to say that you revised an essay, but not that you wrote it.

  她把文章改了改。
  她把文章改了改。
  **Tā bǎ wénzhāng gǎile gǎi.**
  She revised the essay.
Properties of the verb in 把 bā sentences

The verb in 把 bā sentences must refer to a bounded, complete action that has an endpoint. There are a number of ways to add an endpoint to an action verb.

Adding an endpoint to a change-of-state verb

To add an endpoint to a change-of-state action verb such as 忘 wàng ‘forget,’ 丢 diū ‘lose,’ and 卖/賣 mài ‘sell,’ do one of the following.

- Follow the verb with the perfective aspect particle 了 le.
  
  我把他們的名字都忘了。
  我把他們的名字都忘了。
  Wǒ bǎ tāmen de míngzi dōu wàng le.
  I forgot their names.

- Follow the verb with a resultative ending such as 掉 diào + 了 le, which indicates that the action is complete.
  
  我把襪子給丟掉了。
  我把襪子給丟掉了。
  Wǒ bǎ wàzi gěi diūdiào le.
  I lost my socks.

- For change-of-state verbs that refer to placing an object in a location, such as 放 fàng ‘put, place,’ and 挂/掛 guà ‘hang,’ follow the verb with the location phrase that indicates where the object will be located as a result of the action.
  
  把你的鞋子放在門外。
  把你的鞋子放在門外。
  Bǎ nǐ de xiézi fàng zài mén wài.
  Put your shoes outside the door.

  她把畫兒掛在牆上了。
  她把畫兒掛在牆上了。
  Tā bǎ huàr guà zài qiáng shàng le.
  She hung the picture on the wall.
Properties of the verb in 把 bā sentences

20.3.2 Adding an endpoint to an open-ended action verb

To add an endpoint to an open-ended action verb, do one of the following:

- Follow the verb with a directional suffix.

  你能不能把车开进去？
  你能不能把車開進去？
  Nǐ néng bù néng bǎ chē kāijìnqu?
  Can you drive the car in?

- Follow the verb with a resultative suffix that indicates the result or conclusion of the action.

  你睡觉以前得把功课准备好。
  你睡覺以前得把功課準備好。
  Nǐ shuì jiào yǐqián děi bǎ gōngkè zhǔnbèihǎo.
  Before you go to sleep you should finish preparing your course work.

- Repeat the verb with the phrase V — yī V or V 了 le V.

  请把你的故事说一说。
  請把你的故事說一說。
  Qǐng bǎ nǐ de gùshì shuō yī shuō.
  Please tell your story.

  他把文章改了改。
  Tā bǎ wénzhāng gǎi le gǎi.
  He revised the essay.

- Follow the verb with a frequency phrase.

  我把那部电影看了两次。
  我把那部電影看了兩次。
  Wǒ bǎ nà bù diànyǐng kàn le liǎng cì.
  I saw that movie twice.

- Follow the verb with a manner adverbial.

  把你的东西再放得整齐一点。
  把你的東西再放得整齊一點。
  Bǎ nǐ de dōnxī zài fàng de zhěngqí yīdiǎn.
  Arrange your things a little bit neater.

  请把这条裤子改得短一点。
  請把這條褲子改得短一點。
  Qǐng bǎ zhè tiáo kùzi gǎi de duǎn yīdiǎn.
  Please make these slacks a little shorter.

  她把头发剪得短短的。
  她把頭髮剪得短短的。
  Tā bǎ toufà jiǎn de duǎnduǎn de.
  She cut her hair short.

- Resultative endings that indicate sensory perception, such as 见 jiàn ‘to perceive’ and 懂 dǒng ‘to understand,’ cannot be used as resultative complements in 把 bā sentences.
**Negation in 把 bā sentences**

In 把 bā sentences, negation occurs before 把 bā and not before the action verb.

If a 把 bā sentence refers to a future event, or to general or habitual action, negation is indicated with 不 bù. Prohibitions can be expressed with 别 bié or 不要 bù yào ‘don’t.’

```
不要把你的东西留在外边。
Bù yào bǎ nǐ de dōngxi liú zài wàibian.
Don’t leave your things outside.

你不要把你的名字写错了。
Nǐ bù yào bǎ nǐ de míngzi xiě cuò le.
Don’t write your name incorrectly.
```

If a 把 bā sentence refers to an event that did not occur, negation is 没/mei (有) méi (yǒu).

```
他没把故事说清楚。
Tā méi bǎ gùshì shuō qīngchu.
He didn’t tell the story clearly.
```

**Adverbs and modal verbs in 把 bā sentences**

Adverbs and modal verbs that refer to the entire action occur before 把 bā.

```
我已经把功课交给老师了。
Wǒ yǐjīng bǎ gōngkè jiāo gěi lǎoshī le.
I already gave my homework to the teacher.
```
Adverbs and modal verbs in 把 bā sentences

Nǐ děi bǎ nǐ de fángjiān shōushi shōushi.
You should clean up your room.

When it refers to the entire action, the adverb 都 dōu occurs after 把 bā and its object, before the verb phrase.

He straightened up the room completely.

He finished eating all the dumplings.

他们都把房间整理好了。
They all straightened up the room. (All of them did the action)
The passive

The structure of the Mandarin passive

In active sentences, the subject is typically the agent, the noun phrase that initiates the action, and the object of the verb is the noun phrase affected by the action of the verb.

- Subject + verb + object
- 他偷走了我的车。
- 他偷走了我的車。
- Tā tōuzǒu le wǒ de chē.

He stole my car.

In Mandarin passive sentences, the affected noun phrase occurs as the subject of the verb, and the agent occurs as the object of a passive marking preposition. As is typical with prepositional phrases, the prepositional phrase occurs before the verb:

- Subject + prepositional phrase + verb

The exception is when the prepositional phrase indicates the location of the object as a result of the action of the verb. In that case, the prepositional phrase follows the verb.

Mandarin has three passive marking prepositions (passive markers): 被 bèi, 叫 jiào, and 讓 ràng, all of which may be translated with English ‘by.’

- Subject + passive NP + verb
- 我的车 [被/叫/让] 他 偷走了。
- 我的車 [被/叫/讓] 他 偷走了。
- Wǒ de chē [bèi/jiào/ràng] tā tōuzǒu le.

My car was stolen by him.

In passive structures, the word 给/給 gěi is sometimes placed before the verb.

- 那本字典 [被/叫/让] 小李 给借走了。
- 那本字典 [被/叫/讓] 小李 給借走了。
- Nà běn zìdiǎn [bèi/jiào/ràng] Xiǎo Lǐ gěi jièzǒu le.

That dictionary was borrowed by Little Li.
The passive and negation

The presence of 给/給 gěi before the verb indicates that the sentence is passive, even when the passive markers 被 bèi, 叫 jiào, and 让/讓 ràng do not occur.

那个坏人给抓住了。
Nàge huàirén gěi zhuāzhù le.
That bad person was arrested.

The agent of a passive sentence need not be an animate entity. An inanimate entity, a force, or a situation may also function as the agent. For example:

他们的房子[被/叫/让]火烧了。
Tāmen de fángzi [bèi/jiào/ràng] huǒ shāo le.
Their house was burned by fire.

An agent is obligatory when using the passive markers 叫 jiào and 让/讓 ràng. An agent is optional for the marker 被 bèi.

他被学校撤职了。
Tā bèi xuéxiào chèzhí le.
He was fired by the school.

When the passive marker is followed by an object, all of the passive markers are interchangeable. Therefore, all remaining examples in this chapter will be illustrated with only one passive marker.

The passive and negation

The function of negated passive sentences is to indicate that some action has not occurred in the past. Therefore, negation in passive sentences is typically 没/沒 (有) méi (yǒu). 没/沒 (有) méi (yǒu) must occur before the passive marking preposition, and never before the verb.

Say this
Not this

你的车没有被警察拖走。
Nǐ de chē méi yǒu bèi jǐngchá tuōzǒu.
Your car wasn’t towed away by the police.

The passive form can also be used when expressing prohibitions and warnings.

别被你的朋友给骗了。
Bié bèi nǐ de péngyou gěi piàn le.
Don’t let yourself be cheated by your friend.

我们作的事不要被别人知道。
Wǒmen zuò de shì yào bèi biéren zhīdào.
We shouldn’t let other people know what we did. (lit. ‘What we’ve done shouldn’t be known by others’.)
21.3 Conditions for using the passive in Mandarin

The Mandarin passive is used under the following circumstances:

- To express adversity
  To indicate that the event has negative consequences or is in some way ‘bad news’ for the narrator, addressee, or affected noun:
  
  我的钱被小偷偷走了。
  我的钱被小偷偷走了。
  Wǒ de qián bèi xiǎotōu tōuzǒu le.

  My money was stolen by a thief.

  This association of the passive with bad news, once a signature feature of the passive in Mandarin, is becoming less common.

- To express surprise or astonishment
  
  我们的秘密被政府发现了。
  我們的祕密被政府發現了。
  Wǒmen de mìmì bèi zhèngfǔ fāxiàn le.

  Our secret was discovered by the government.

- To emphasize the affected noun phrase rather than the agent
  
  这儿的树都被人砍了。
  這兒的樹都被人砍了。
  Zhèr de shù dōu bèi rén kǎn le.

  The trees here were all cut down by people.

- To describe an action when the agent is unknown
  
  昨天银行被抢了。
  昨天銀行被搶了。
  Zuótiān yínháng bèi qiǎng le.

  The bank was robbed yesterday.

- To avoid mentioning the agent of an action
  
  我女儿被骗了。
  我女兒被騙了。
  Wǒ nǚ'ér bèi piàn le.

  My daughter was cheated.

21.4 Differences between the passive markers 被 bèi, 叫 jiào, and 让/讓 ràng

- Frequency: 被 bèi occurs more frequently in written or formal contexts than the other passive markers. In colloquial speech, 叫 jiào and 讓/讓 ràng are more commonly used.
- Dialects differ in the preferred passive marker.

21.5 Additional functions of 让/讓 ràng, 叫 jiào, and 给/給 gěi

In addition to their role in passive sentences, 让/讓 ràng, 叫 jiào, and 给/給 gěi have other functions.

- 叫 jiào is also used as a verb meaning ‘call,’ or ‘order.’
- 让/讓 ràng is also used as a verb meaning ‘let’ or ‘allow.’
Other Mandarin structures that highlight the affected object & de-emphasize the agent

• 给/給 gěi is also used as a verb meaning ‘give,’ and as a preposition meaning ‘to’ or ‘for/on behalf of.’

When the verb is not followed by an object noun phrase, 叫 jiào and 让/讓 ràng may sometimes be interpreted as either a passive marker or as a verb, and the sentence may be ambiguous.

教授让学生批评了。

Jiàoshòu ràng xuésheng pīpíng le.
The professor was criticized by the students.  
(让/讓 ràng = passive marker: by the students)

or

The professor now allows the students to criticize.  
(让/讓 ràng = allow: allows the students)

In most cases, however, the context will make clear the function of 叫 jiào, or 让/讓 ràng, or 给/給 gěi, and only one interpretation will make sense. For example, the following sentence only makes sense if 让/讓 ràng is interpreted as ‘allow’ or ‘let’ and not as the passive marker ‘by.’

妈妈让孩子吃饼干。

Māma ràng háizi chī bǐnggān.
Mom let the children eat cookies. (*by the children . . . )

Other Mandarin structures that highlight the affected object and de-emphasize the agent

Mandarin has several different patterns that function to emphasize an affected object or to de-emphasize or avoid mentioning the agent. These include the following:

• Topicalization

支票, 银行已经收到了。

Zhīpiào, yínháng yǐjing shōudào le.  
(As for) the check, the bank has already received it.

• The 把 bǎ construction

朋友把水果送来了。

Péngyou bǎ shuíguǒ sònglai le.  
(A friend took the fruit and sent it as a gift.)

• The 是 shì . . . 的 de construction

这本书是我教授写的。

Zhè běn shū shì wǒ jiàoshòu xiě de.  
(This book was written by my professor.)

Names, kinship terms, titles, and terms of address

22.1 Names: 姓名 xìngmíng

The order of a Chinese name is:

\[
\text{family name} + \text{given name}
\]

姓 xìng 名字 míngzi

王 Wáng 莉花 Lìhuā

张 Zhāng 伟明 Wěimíng

In this book we translate Chinese names using Chinese word order. That is, 王莉花 Wáng Lìhuā is translated as ‘Wang Lihua’ and not ‘Lihua Wang.’

22.1.1 Family names

There are over 3500 Chinese family names. However, of these, only about 100 occur widely. This is probably the basis of the expression 老百姓 lǎobǎixìng ‘the old 100 family names,’ which is used to refer to ‘the people’ or ‘the common man.’

The three most common Chinese family names are 李 Lǐ, 王 Wáng, and 张 Zhāng. The next most common family names, representing the overwhelming majority of Chinese people, are 刘/劉 Liú, 陈/陳 Chén, 杨/楊 Yáng, 赵/趙 Zhào, 黄 Huáng, 周 Zhōu, 吴/吳 Wú, 徐 Xú, 孙/孫 Sūn, 胡 Hú, 朱 Zhū, 高 Gāo, 林 Lín, 何 Hé, 郭 Guō, and 马/馬 Mǎ.

Most family names are a single character/single syllable in length. However, there are a small number of two-character/two-syllable Chinese family names. The most common are 司马 Sīmǎ, 司徒 Sītú, 欧阳/歐陽 Oúyáng, and 皇甫 Huángfǔ.

22.1.2 Given names

A given name consists of one or two characters/syllables. There is no fixed inventory of given names in Chinese as there is in English such as Ruth, Michael, Lisa, and Mark. Instead, names express meaning, and families select as names, words or phrases with positive connotations that they wish to associate with their child. While this method of naming is also used in the West, it is the exception rather than the rule.

In the traditional naming process, the first character of a given name is a generational name: all children in the family who are of the same gender and in the same generation share the same first character in their given name. The second character reflects some other positive
characteristic. Thus, brothers might be named 亦豪 Yi Hao (talent) and 亦强/亦強 Yi Qiang (strength). Sisters might be named 颖怡/穎怡 Ying Yi (joyful) and 颖美/穎美 Ying Mei (beautiful).

Modern naming practice often does not include a generational name. This is especially common in mainland China. Instead, given names reflect positive attributes, and may be one or two syllables in length.

Given names are personal and somewhat private. In general, they are only used as terms of address by good friends and close acquaintances, and in closed settings such as a family, classroom, or office, where people are members of a well-defined group. Often, people use kinship terms and titles rather than names when addressing and referring to others.

### 22.2 Kinship terms

Here are the most commonly used kinship terms and the distinctions that they reflect.

#### 22.2.1 Kinship terms for immediate family

<table>

<th>Female</th>

<tbody>
<tr>
<td>父亲/父親  fùqīn</td>

<tr>
<td>哥哥   gēge</td>
<td>姐姐   jiějie</td>
</tr>
<tr>
<td>弟弟   dìdi</td>
<td>妹妹   mèimei</td>
</tr>
</tbody>
</table>

The reference point for siblings is oneself. For example, an older brother is a brother older than oneself. If you are male and have an older brother and a younger brother, then your younger brother has two older brothers.

**Your family from your perspective**

我有一个哥哥、一个弟弟。
我有一個哥哥、一個弟弟。
Wǒ yǒu yī gè gēge, yī gè dìdi.
I have one older brother and one younger brother.

**Your family from your younger brother’s perspective**

我有两个哥哥，没有弟弟。
我有兩個哥哥，沒有弟弟。
Wǒ yǒu liǎng gè gēge, méi yǒu dìdi.
I have two older brothers and no younger brother.

### Titles

Titles refer to gender and marital status, education, or occupation. When a name includes a title, the order of information is as follows:

*family name (+ given name) + title*

- 王 莉花 博士
  
  Dr. Wang Lihua

Chinese people often use titles when addressing others or when talking about others. Titles may be used alone or with the family name and given name.

**NOTE**

In Taiwan, the title generally follows the family name: family name + title + given name.

---

### Titles that indicate gender and marital status

The most common titles used to reflect gender and marital status are:

- 先生 王先生
  
  Mr. Wang
- 太太 王太太
  
  Mrs. Wang
- 夫人 王夫人
  
  Mrs. Wang
Professional titles

Commonly used professional titles include:

- 医生/醫生 yīshēng doctor
- 护士/護士 hùshì nurse
- 老师/老師 lǎoshī teacher
- 律师/律師 lǜshī lawyer
- 主席 zhǔxí chairperson of a political party, etc.
- 警察 jǐngchá police officer
- 秘书/祕書 mishū secretary
- 主任 zhǔrèn director of a department, chairperson of a department
- 大使 dàshǐ ambassador
- 经理/經理 jǐnglǐ manager
- 博士 bóshì doctor of philosophy (Ph.D.)
- 大夫 dàifu doctor
- 师傅/師傅 shīfu master (skilled person)
- 教授 jiàoshòu professor
- 法官 fāguān judge, justice
- 校长/校長 xiáozhǎng principal
- 公关/公關 gōngguān receptionist
- 秘书长/祕書長 mishǔzhāng secretary general
- 司机/司機 sījī driver; chauffeur
- 总统/總統 zōngtǒng president, chief of state
- 总经理/總經理 zōngjīnglǐ general manager

The titles 先生 xiānshēng 'Mr.,' 太太 tàitai 'Mrs.,' and 小姐 xiǎojie 'Miss' are standard expressions in Taiwan but are not commonly used in mainland China. There is no standardly used expression in mainland China for either Mr. or Mrs. The expression 姑娘 gūniang is gaining popularity as a way of addressing or referring to young women in mainland China, but it is only appropriate when used by those at least one generation older than the young woman. It is not used together with a name.
Addressing others

22.4 Addressing others

22.4.1 Addressing friends

Close friends may address each other using family name and given name together, or, if they are very close, by given name alone.

王莉花，早。
Wáng Lìhuā, zǎo.
Wang Lihua, good morning.

莉花，最近怎么样？
Lìhuā, zuì jìn zěnmeyàng?
Lihua, how have you been recently?

Friends or close acquaintances may also address each other using the prefix 老 lǎo ‘old’ or 小 xiǎo ‘small’ before the family name as follows:

<table>
<thead>
<tr>
<th>老高</th>
<th>Lǎo Gāo</th>
<th>Old Gao</th>
</tr>
</thead>
<tbody>
<tr>
<td>老王</td>
<td>Lǎo Wáng</td>
<td>Old Wang</td>
</tr>
<tr>
<td>小高</td>
<td>Xiǎo Gāo</td>
<td>Little Gao</td>
</tr>
<tr>
<td>小王</td>
<td>Xiǎo Wáng</td>
<td>Little Wang</td>
</tr>
</tbody>
</table>

老 lǎo and 小 xiǎo do not literally mean ‘old’ and ‘little’ here. 老 lǎo is used for those older than oneself, and 小 xiǎo is used for those younger than oneself.

22.4.2 Addressing family and others with kinship terms

In China, people use kinship terms rather than names to address relatives. Kinship terms are also used in informal contexts to address people who are not relatives. The term that is used depends upon the age and gender of the person whom you are addressing. Here are the kinship terms most commonly used when talking with people who are not your relatives.

大哥 dà gē
older brother (title for man near your age but older than you)

大叔 shūshu
uncle (title for man who is about your father’s age)

爷爷/爺爺 yéye
grandfather (title for man who is about your grandfather’s age)

大姐 dà jiě
older sister (title for woman near your age but older than you)

阿姨 āyí
aunt (title for woman who is about your mother’s age or older)

奶奶 nǎinai
grandmother (title for woman who is about your grandmother’s age)

22.4.3 Colloquial terms of address used with strangers

The following terms are used in informal contexts to address strangers

小朋友 xiǎo péngyou
little friend (commonly used to address children)

朋友 péngyou
friend (often used by shopkeepers to address customers)

帅哥/帥哥 shuài gē
handsome guy (used when addressing a young man one does not know, especially in the context of a restaurant or store)

美女 měi nǚ
beautiful girl (used when addressing a young woman one does not know, especially in the context of a restaurant or store)
22.4.4 Using titles as terms of address

Titles are commonly used as terms of address. The titles 先生 xiānshēng ‘Mr.,’ 太太 tàitai ‘Mrs.,’ 小姐 xiǎojie ‘Miss,’ and 师傅/師傅 shīfu ‘master’ are used alone without any additional name to address strangers in a polite way. 师傅/師傅 shīfu ‘master’ is often used in mainland China as a polite way to address a man in relatively informal contexts. 小姐 xiǎojie, 姑娘 gūniáng, and 美女 měi nǚ are used to address young women in service positions such as in restaurants and shops. 帅哥/帥哥 shuài gē is used to address young men in service positions. 夫人 fūrén ‘Mrs.’ and 女士 nǚshì ‘Miss’ are very formal and their use is restricted to formal contexts such as speeches and formal events. The titles presented in 22.3.2 can all be used as terms of address. For occupations that are not used as titles or terms of address, see 23.3

22.5 Addressing new acquaintances and negotiating terms of address

When you meet someone for the first time, you need to determine how to address them. Since given names are not freely used, and family names are generally not used alone, an initial conversation usually includes some negotiation about terms of address. The most common expressions are as follows.

The neutral and most common way to inquire about someone’s family name is:

- 你姓什么? 你姓甚麽?
  Nǐ xìng shénme?
  What is your family name? (neutral question)

A more formal and polite way to inquire about someone’s family name is:

- 你贵姓? / 你贵姓
  Nǐ guì xìng?
  What is your family name? (polite, formal)

The most common way to reply to either of these questions is:

- 我姓(王)。
  Wǒ xìng (Wáng).
  My family name is (Wang).

A very polite and humble response to the formal question is:

- 敝姓(王)。
  Bì xìng (Wáng).
  My humble family name is (Wang).

While the polite form of the question is fairly common, the polite humble form of the response is rarely used.

The neutral and most common way to inquire about someone’s family name and given name is:

- 你姓什么，叫什么名字?
  你姓甚麽，叫甚麽名字?
  Nǐ xìng shénme, jiào shénme míngzi?
  What is your family name and what is your given name?
Addressing new acquaintances and negotiating terms of address

The neutral and most common way to respond to this question is:

我姓（王），叫（莉花）。
Wǒ xìng (Wáng), jiào (Lìhuā).
My family name is (Wang), my given name is (Lihua).

The very polite way to inquire about someone’s family name and given name is:

请问，尊姓大名？
Qǐng wèn, zūnxìng dàmíng?
Excuse me, what is your (honorable) name?

The polite, humble response to this question is:

敝姓（王），小名（建国）。
Bì xìng (Wáng), xiǎo míng (Jiànguó).
My humble family name is (Wang), and my small name is (Jianguo).

People often do not inquire about given names when they first meet. When you have established a friendship, you may inquire about a given name by asking:

你叫什么名字？
Nǐ jiào shénme míngzi?
What is your name?

The reply to this question is either the family name plus the given name, or the given name alone:

我叫（王玫玲）。
Wǒ jiào (Wáng Méilíng).
I am called (Wang Meiling). (My name is Wang Meiling.)

To make a general inquiry about someone’s identity, ask:

你是谁？
Nǐ shì shéi?
Who are you?

你是...？
Nǐ shì...?
Are you...?

你是哪位？
Nǐ shì nèi wèi?
Who are you? (polite)

To learn how someone prefers to be addressed by you, ask:

我应该怎么称呼你？
Wǒ yīnggāi zěnme chēnghu nǐ?
How should I address you?
Name cards and business cards

Name cards and business cards are widely used in China, and people often exchange name cards when they meet for the first time. The information on a person’s name card will help you to determine how to address him or her.

When handing your card to someone, use both hands, and give it to the person so that the writing is facing him or her. Receive a card with both hands, read the card, and thank the person who gave you the card or comment on the information on the card so that it is clear that you have read it. If business cards are exchanged during a meeting or a meal, it is customary to place the cards you receive on the table, arranged according to hierarchy, so that you can refer to them as you talk.

The organization of the Chinese name card or business card is typically as follows:

Addressing letters and envelopes

In mainland China, cards written in Chinese are usually printed horizontally. In Taiwan, cards may also be printed vertically.

**Special terms for the recipient (addressee) and the sender**

The name of the recipient is typically followed by the recipient’s title, or the title plus the expression 收 shōu, 启/啟 qǐ, or 大启/大啟 dà qǐ. 启/啟 qǐ and 大启/大啟 dà qǐ are more formal than 收 shōu. All three expressions mean ‘recipient.’

The name of the sender may be followed by the expression 寄 jì or 鍵/缄 jiān. 鍵/缄 jiān is more formal than 寄 jì. Both expressions mean ‘sender.’

22.7.4 Terms used in addresses and their order of presentation

Addresses in China are presented from the largest unit to the smallest. If the postal code is included in the address, it occurs before the name of the city.

The major regional distinctions used in addresses in order of size are as follows:

The terms used to refer to the units in street addresses differ somewhat in Taiwan and in mainland China. Here is a summary of the most common terms. The term 胡同 hútong ‘alley’ is used in Beijing, though as streets are restructured, alleys are being eliminated.

Greetings and goodbyes

This chapter contains the most common expressions used by Mandarin Chinese speakers when greeting others and saying goodbye in different contexts. The expressions here are those used by the majority of Mandarin speakers, but differences between mainland China and Taiwan are noted where relevant. In Chinese, greetings and goodbyes are typically not accompanied by body contact such as a handshake, hug, or kiss, though handshakes are becoming more common in cities.

Greetings are used to acknowledge the presence of another person. Chinese uses different kinds of greetings depending upon the relationship of speaker and addressee, the time of day in which the greeting is made, and whether or not contact is face-to-face. Greetings that take the form of questions typically need no response.

24.1 Greetings in conversations

24.1.1 Basic greeting

To greet casual acquaintances or to greet others in a shopping or business environment, or when meeting someone for the first time, or when answering the telephone, say:

你好。
Nǐ hǎo.
Hi. (How are you?)

The response to this greeting is:

你好。
Nǐ hǎo.
Hi. (How are you?)

Or, also possible, but less common:

好。谢谢。你呢?
Hǎo. Xièxie. Nǐ ne?
Fine. Thanks. And you?

NOTE

Until recently, the expression 你好 nǐ hǎo was primarily used when greeting foreigners, but in Chinese cities it is now widely used between native speakers of Chinese.

A more formal variation of this greeting uses the polite pronoun 您 nín ‘you’:

毛： 王经理，您好？
Máo: Wáng jīnglǐ, nín hǎo?
Mao: Manager Wang, how are you?

王： 好。
Wáng: Hǎo.
Wang: Fine.
Greetings with reference to time of day

The most common morning greeting is:

早。
Zǎo.
Good morning.

The response is:

早
Zǎo.
Good morning.

An alternative form of this greeting is:

早安。
Zǎo’ān.
Good morning.

or

早上好。
Zǎoshang hǎo.
Good morning.

There is no greeting associated with any other time of day.

Greeting people by calling them (叫 jiào)

In China, it is very common to greet others by making eye contact and calling them by name, title, or appropriate kinship term. To greet others in this way is to call jiào ‘call’ them. This greeting can include 好 hǎo or 你好 nǐ hǎo.

罗老师!/羅老師! 张萌!/張萌!
Lúo lǎoshī! Zhāng Méng!
Professor Ross! Zhang Meng!

王经理!/王經理! 阿姨好!
Wáng jīnglǐ! Āyí hǎo!
Manager Wang! How are you, Auntie!

小王!
Xiǎo Wáng!
Little Wang!

How are you, Old Zhang!

Greeting others by referring to their present activity

Relatives, friends, or close acquaintances may greet each other by referring to their present activity. Here are some examples.

吃饭去。
Chī fàn qù.
(I see that you are) Going off to eat.

吃饭去。
Chī fàn qù.
Upset!

上课吧！
Shàng kè ba!
Going to class, I assume.

回家呢?
Huí jiā ne?
Are you going home?

上班呢。
Shàng bān ne.
Going to work, right?
A variation of this kind of greeting is to ask about present activity.

你上哪儿去？
你去哪儿？
Nǐ shàng nǎr qù?
Nǐ qù nǎr?
Where are you going?

你到哪儿去？
你到哪儿去？
Nǐ dào nǎr qù?
Nǐ dào nǎr qù?
Where are you going?

你去哪儿？
你今天去哪儿玩了？
Nǐ jīntiān qù nǎr wán le?
Where are you heading off to play today?

你去哪儿？
Nǐ qù nǎr?
Nǐ qù nǎr? (informal/casual)
What are you up to?

你今天去哪儿玩了？
Nǐ jīntiān qù nǎr wán le?
忙什么呢？
Máng shénme ne?
What are you busy doing?

干吗(呢)?
Gānmá (ne)?
忙什么哪儿？”
What are you busy doing?

电话 greetings

The most common phone greetings are:

喂？
Wèi/Wéi. (It may be spoken in a rising or falling tone.)
Hello.

喂，你好。
Wéi, nǐ hǎo.
Hello, how are you?

Saying goodbye in conversations

24.2.1 Basic goodbyes

The most general way to say goodbye and to end a conversation is:

再见。
Zài jiàn.
Goodbye. (lit. ‘again see’ → ‘see you again’)

In Taiwan, and increasingly in mainland China, people also say:

拜拜。
Báibái. (also pronounced bàibài)
Bye bye. (borrowed from English ’bye bye’)

If the participants in a conversation expect to see each other in the near future, they may use variations of 再见／再见 zài jiàn to say goodbye. These include:

一会儿见。
Yīhuìr jiàn.
See you in a moment.
Say goodbye to a guest

To say goodbye to a guest, use one of these expressions:

慢走。
Màn zǒu.
Don’t hurry off.

再来玩。
再來玩。
Zài lái wán.
Come again. (informal)

有空再来。
有空再來。
Yǒu kòng zài lái.
Come again when you have time.

走好。
Zǒu hǎo.
Take care.

To respond to a host when taking leave, use one of these expressions:

别送。
Bié sòng.
Don’t see me off.

请留步。
請留步。
Qǐng liú bù.
Please do not bother to see me off. (more formal)

Say goodbye to someone who is leaving on a trip

To say goodbye to someone who is leaving on a trip, say:

一路顺风。
或
Yī lù shùn fēng.
-or
Yī lù píng’ān.
Have a good trip. (lit. ‘Have a smooth wind for the entire road.’)  (lit. ‘Have peace for the entire road.’)
Greetings and goodbyes in letters

24.2.4 Saying goodbye with reference to time of day

晚安。
Wǎn’ān.
Goodnight.

NOTE
晩安 wǎn’ān can only be used as a goodbye, and not as a greeting.

24.3 Greetings and goodbyes in letters

24.3.1 Greetings and salutations in letters

Letters begin with the name of the addressee.

In informal letters to someone with whom you have a close relationship, you may use the recipient’s given name, or family name and given name. Sometimes these are followed by these kinship terms:

兄 xiōng elder brother, a form of address used by males of the same generation
弟 dì younger brother, a form of address used to a younger male
姊 zǐ elder sister, a form of address used by females of the same generation
或
姐 jiě younger sister, a form of address used to a younger female
妹 mèi

建国兄：
建國兄：

王先生：

王校长：

More formal letters may also begin with the name and title of the addressee following by a standard salutation. Note that the use of the family name makes the greeting more formal than the use of the given name alone.

The following phrases may also be used after the name and title of the addressee.

This salutation is used in letters from a government department or organization to an individual.

24.3.2 Goodbyes in letters

The following expressions are used to close a letter. They occur after the body of the letter, before the name of the sender.

Expressions used to extend good wishes to the addressee

These expressions occur immediately after the body of the letter, before any additional greetings.

顺颂/順頌 shùn sòng I take this opportunity to send regards and wish your well-being
祝 zhù expressing good wishes
敬祝 jìng zhù respectfully extending (good) wishes to you
敬颂/敬頌 jìng sòng (I) extend good wishes
敬请/敬請 jìng qǐng (I) respectfully extend (good) wishes
此颂/此頌 cǐ sòng (I) extend good wishes

Wishes for good health and well-being

The following phrases are standard expressions of good wishes. They occur after one of the previous phrases, before the name of the sender. Note that many are linked to a specific season or to the new year.

春安 chūn'ān a peaceful spring
夏安 xià’ān your health, your well-being in the summer season
秋安 qiū’ān your welfare in this autumn season
冬安 dōng’ān your well-being in this winter season

Expressions included with the signature

The following expressions are included after the name of the sender.

For letters written to someone of the same generation as oneself:

Less formal

上 shàng    written by

More formal

敬上 jìng shàng respectfully presented
拜上 bài shàng respectfully yours
拜啟/拜啟 bài qǐ respectfully report
再拜 zài bài    bow twice (a polite closing to a letter)

For very formal letters written to a superior

谨啟/謹啟 jǐn qǐ cautiously and prudently respectfully present
謹禀/謹稟 jǐn bǐng respectfully submitted

In addition, if the addressee is referred to as 兄 xiōng, 弟 dì, 姊 zǐ, or 妹 mèi in the salutation, the writer typically prefixes the reciprocal generation term to his or her name in the closing. In other words, a male writer who greets his addressee with 兄 xiōng typically closes the letter by prefixing his name with 弟 dì. A female writer who greets her addressee with 姊 zǐ typically closes the letter by prefixing her name with 妹 mèi.

In the body of a letter, the name of the sender and the date of the letter are placed at the end of the letter.

Sample letters illustrating the format and the use of these expressions are presented here.

Basic strategies for communication

Languages have specific expressions that speakers use to start conversations and to keep them going. These expressions often reflect the degree of formality of the situation, the relationship of the participants in the conversation, and the attitudes of the speakers. This section presents the most commonly used expressions in Mandarin.

25.1 Attracting someone’s attention

25.1.1 Attracting attention by using a name or title

In Mandarin, the most common way to attract someone’s attention is to address them with their name, a title, or a kinship term.

<table>
<thead>
<tr>
<th>Name/Title</th>
<th>Chinese</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>马教授/馬教授</td>
<td>Mǎ jiàoshòu</td>
<td>Professor Ma</td>
</tr>
<tr>
<td>王玫玲</td>
<td>Wáng Méilíng</td>
<td>Wang Meiling</td>
</tr>
<tr>
<td>先生 小姐</td>
<td>Xiānsheng Xiǎojie</td>
<td>Mr./sir Miss</td>
</tr>
</tbody>
</table>

In mainland China, to politely get the attention of a male whom you do not know, you can say:

师傅/師傅 | shīfu | master (as in, ‘master craftsman’)

Taxi drivers are typically addressed as:

司机/司機 | sījī | driver

An informal way to attract someone’s attention is by using the interjection:

欸 | ēi | hey

25.1.2 Attracting attention by apologizing for the intrusion

<table>
<thead>
<tr>
<th>Chinese</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>麻烦你</td>
<td>máfàn nǐ</td>
</tr>
<tr>
<td>对不起</td>
<td>duìbùqǐ</td>
</tr>
<tr>
<td>劳驾</td>
<td>láojià</td>
</tr>
</tbody>
</table>
Attracting attention by indicating that you want to ask a question

请问 (我想) 打听一下
qǐng wèn (wǒ xiǎng) dǎtīng yí xià
may I ask

I’d like to inquire for a moment

Attracting attention by asking for help

请帮(个)忙。 劳驾
Qǐng bāng (gè) máng. láojià
Please help me.

excuse me (for creating extra work for you)

Asking for help is an appropriate strategy when dealing with friends or acquaintances. It is not a good strategy when speaking with strangers, who may be reluctant to get involved in a troublesome situation. When speaking with strangers, apologizing for or acknowledging an intrusion (麻烦你/麻烦你 máfan nǐ) or beginning your request with a question (请问/請問 qǐng wèn) is more effective.

Responding to a call for attention

The most common way to respond to a call for attention is to use the phrase

什么事?
Shénme shì?
What is the matter?/What do you want?

Other responses include

有事吗? 怎么了?
Yǒu shì ma? Zěnme le?
Is something the matter? What’s the matter?

Checking whether people have understood you

清楚吗? 懂不懂? 懂吗?
Qīngchǔ ma? Dǒng bù dǒng? Dǒng ma?
Is it clear? Do you understand? Do you understand?

Indicating understanding or lack of understanding

好。
Hǎo.
Okay.

(我) 懂(了)。
(Wǒ) dǒng (le).
(I) understand (now).

我不懂。
Wǒ bù dǒng.
I don’t understand.
25.5 Requesting repetition or clarification of spoken language

请你再说。
請你再說。
_Qíng nǐ zài shuō._
Please repeat./Please say it again.

(那是)什么意思？
(那是)甚麼意思？
(Nà shì) shénme yìsi?
What does that mean?

请你说慢一点。
請你說慢一點。
_Qíng nǐ shuō màn yīdiǎn._
Please speak a little slower.

25.6 Asking for assistance in identifying a Chinese character

怎么念？
怎麼唸？
_Zěnme niàn?_
How is it pronounced?

这个字怎么念？
這個字怎麽唸？
_Zhège zi zěnme niàn?_
How is this character pronounced?

怎么写？
怎麼寫？
_Zěnme xiě?_
How do you write it?

那个字怎么写？
那個字怎麼寫？
_Nàge zi zěnme xiě?_
How do you write that character?

The following strategies are commonly used to help a listener identify a character.

- Present a common word in which the character in question occurs

「清楚」的「清」
‘qīngchu’ de ‘qīng’
the ‘qing’ in ‘qingchu’

「朋友」的「友」

the ‘you’ of ‘pengyou’

25.9 Interrupting a speaker

To interrupt a speaker say:

25.10 Using fillers

那么/那麼   nàme       well
嗯，嗯   en, en       yeh

26.4 Telephone etiquette

Telephone calls are answered with the phrase:

喂? Wèi? or Wéi?

喂? Wéi? (in either tone) is the equivalent of ‘Hello’ in English.

NOTE

喂 wèi can be used more broadly as an interjection to attract somebody’s attention. When used in answering a phone call, it is said in second or fourth tone. Second tone is more polite and more commonly used. Fourth tone conveys a sense of impatience.
Increasingly, in the cities of China, the phrase used to answer a phone call is:

喂？你好。
Wèi? Nǐ hǎo.
Hello. How are you?

To ask to speak to someone say:

(张老师)在吗？
(Zhāng lǎoshī) zài ma?
Is (Professor Zhang) in?

或
Wǒ zhǎo (Zhāng lǎoshī). Tā zài ma?
I’m looking for (Professor Zhang). Is she in?

If the party in question is not in, say:

(她)不在。
(Tā) bù zài.
(She) is not in.

If you wish to leave a message say:

我要留言。
Wǒ yào liú yán.
I’d like to leave a message.

To arrange to get together with someone by phone say:

我们通电话。
Wǒmen tōng diànhuà.
Let’s be in touch by phone.

To describe problems reaching someone by phone say:

(我)打不通。
(Wǒ) dǎbutōng.
(I am) unable to get through.

现在占线。
Xiànzài zhàn xiàn.
The line is busy.

26.5 Writing and reciting phone numbers and fax numbers

Phone and fax numbers are recited as a list of single digits. In mainland China, when reciting numbers, the number 1 （一） is pronounced yāo. In Taiwan it is pronounced yī. Phone and fax numbers are typically written with Arabic numerals and not with Chinese characters.
### Sample numbers

**NOTE**

Phone numbers that include the numerals 6 or 8 are considered particularly good and lucky. Those with the numeral 4 are less desirable. In mainland China, cell phone customers select and purchase their numbers from a list. Those with 6s and 8s are more expensive. Those with 4s are less expensive.
Negating information

27.1 Negation of verbs and verb phrases

The words that are used to negate verbs and verb phrases in Mandarin are 不 bù and 没/没 méi. 不 bù and 没/没 méi immediately precede the verb or anything that precedes and modifies the verb, including an adverb, a location phrase, or any other prepositional phrase.

他不喝酒。[negation + verb]  
Tā bù hē jiǔ.  
He doesn’t drink (alcohol).

他不一定考得好。[negation + adverb]  
Tā bù yīdìng kǎodehǎo.  
It is not certain that he will do well on the exam. (He may not do well on the exam.)

他不在家吃饭。[negation + location prepositional phrase]  
Tā bù zài jiā chī fàn.  
He doesn’t eat at home.

她没跟弟弟说话。[negation + prepositional phrase]  
Tā méi gēn dìdi shuō huà.  
She didn’t speak with younger brother.

In addition to the primary role of 不 bù and 没/没 méi as markers of negation, they often serve to identify the aspect and time frame of events.

▶ 10.1, 11.1, 12, 13.3, 17, 37.3

27.1.1 不 bù

不 bù is the marker of negation for:

- adjectival verbs, stative verbs, and modal verbs

妹妹不高。(adjectival verb)  
Mèimei bù gāo.  
Younger sister is not tall.

我不喜欢他。(stative verb)  
Wǒ bù xǐhuan tā.  
I don’t like him.

十六岁的孩子不可以喝酒。(modal verb)  
Shíliù suì de háizi bù kěyǐ hē jiǔ.  
16-year-old children are not allowed to drink.
Negation of verbs and verb phrases

- negated manner adverbial phrases
  他考得不好。
  Tā kǎo de bù hǎo.
  He didn’t do well on the test.

- action verbs describing present, future, or habitual events
  他不吃肉。
  Tā bù chī ròu.
  He does not eat meat.
  我不学法语。
  Wǒ bù xué Fáyǔ.
  I don’t study French.

---

27.1.2 没/ 没 méi and 没有/ 没有 méi yǒu

没/ 没 méi is the negation word that negates the verb 有 yǒu.
  他没有钱。
  他沒有錢。
  Tā méi yǒu qián.
  He doesn’t have any money.
  公园里没有人。
  公園裏沒有人。
  Gōngyuán lǐ méi yǒu rén.
  There are no people in the park.

In addition, 没/ 没 méi (or 没有/ 没有 méi yǒu) negates action verbs under the following conditions:

*The action is not complete*
  我还没看完那本书。
  我還沒看完那本書。
  Wǒ hái méi kànwán nà běn shū.
  I still haven’t finished reading that book.

*The action did not happen in the past*
  我昨天没吃晚饭。
  我昨天沒吃晚飯。
  Wǒ zuótiān méi chī wǎnfàn.
  Yesterday, I didn’t eat dinner.

When negation occurs at the end of the sentence in verb-not-verb questions, 没/ 没 méi must be followed by 有 yǒu.
  你看完了那本书没有？
  你看完了那本書沒有？
  Nǐ kànwán le nà běn shū méi yǒu?
  Have you finished reading that book?
The relative order of negation and adverbs

Here are some general rules for the relative order of negation and adverbs. The adverbs are emphasized in each example.

- Most adverbs occur before negation.
  
  那本書,我還沒看完。
  Nà běn shū, wǒ hái méi kànwán.
  That book, I have not yet finished reading it.
  
  我喜欢吃中國飯,就不喜歡吃海參。
  Wǒ xǐhuan chī Zhōngguó fàn, jiù bù xǐhuan chī hǎishēn.
  I like to eat Chinese food; I just don’t like to eat sea slugs.
  
  他也许不认识你妹妹。
  Tā yěxǔ bù rènshi nǐ mèimei.
  Perhaps he doesn’t know your younger sister.

- A small number of adverbs may occur either before or after negation. The order of negation and adverb influences the meaning of the sentence.
  
  我们都不會開車。
  Wǒmen dōu bù huì kāi chē.
  We all cannot drive (a car).
  
  他也许不认识你妹妹。
  Tā yěxǔ bù rènshi nǐ mèimei.

Asking questions and replying to questions

Questions are used to ask for information. Here are the most common question types in Mandarin.

### 28.1 Yes–no questions

Yes–no questions are questions that can be answered with ‘yes’ or ‘no.’ In Mandarin, there are several ways to ask yes–no questions. Notice that unlike English, the overall phrase order of statements and yes–no questions is the same. In addition, no helping word equivalent to ‘do’ is involved in yes–no questions in Chinese.

#### 28.1.1 Yes–no questions with 吗/嗎 ma

When 吗/嗎 ma is added to the end of a statement, it turns the statement into a yes–no question.

**Identifying things**

Chinese uses yes–no questions and content questions to ask about the identity of things.

### 28.1, 28.6

### 29.2

#### Expressing possession

This section introduces the forms used by Chinese speakers to express possession and to inquire about possession.

#### 29.2.1 Indicating ‘having something’

To say that someone or something has something, use the verb 有 yǒu ‘to have.’

他有女朋友。 Tā yǒu nǚ péngyou. He has a girlfriend.

你有弟弟吗? Nǐ yǒu dìdi ma? Do you have a younger brother?

The negation of 有 yǒu is 没有 méi yǒu.

Expressing possession

To indicate one’s possession, use the following structure:

possessor + 的 de + possessed object

哥哥的车 老师的书
哥哥的車 老師的書
older brother’s car teacher’s book

Mandarin does not have possessive pronouns. A pronoun + 的 de is equivalent in meaning to a possessive pronoun in English.

我的钥匙 谁的书?
我的鑰匙 誰的書?
my key whose book?

A table of English possessive pronouns and their Mandarin equivalents is presented in Chapter 5.

The possessor + 的 de may sometimes occur without the following ‘possessed’ noun. This is often the case when the noun is clear from the context of the sentence. In the following sentences, the noun in parentheses may be omitted.

这本书是你的(书)。
這本書是你的(書)。
This book is yours.

那个学校是他们的(学校)。
那個學校是他們的(學校)。
That school is theirs.

When there is a close relationship between the possessor and the possessed noun, the de may be omitted. 的 de is often omitted if the possessor is a pronoun.

我(的)母亲很忙。
我(的)母親很忙。
My mother is very busy.

他是我们(的)老师。
他是我們(的)老師。
He is our teacher.
29.2.3 Expressing possession in formal written Chinese

属于/屬於 shǔyú ‘belong to, be affiliated with’

这个幼儿园是属于北京大学的。
這個幼兒園是屬於北京大學的。
Zhège yòu’ěryuán shì shǔyú Běijīng Dàxué de.
This kindergarten is affiliated with Beijing University.

之 zhī

之 zhī is the formal written equivalent of 的 de, used in literary Chinese texts. Like 的 de, it occurs after the possessor and before the possessed noun.

钟鼓之声
鐘鼓之聲
zhōnggǔ zhī shēng
the sound of bells and drums

29.3 Expressing existence

There are three verbs that are commonly used to express existence.

29.3.1 有 yǒu ‘to exist’

In addition to its use in expressing possession, the verb 有 yǒu is also used to express existence.

昨天晚上有很大的雾。
昨天晚上有很大的霧。
Zuótiān wǎnshang yǒu hěn dà de wù.
Last night there was a very dense fog.

附近有三个旅馆。
附近有三個旅館。
Fùjìn yǒu sān gè lǘguǎn.
There are three hotels nearby.

To ask about existence, use the question form 有没有/有沒有 yǒu méi yǒu or the yes–no question marker 吗/嗎 ma.

附近有没有旅馆？
附近有沒有旅館？
Fùjìn yǒu méi yǒu lǘguǎn？
Is there a hotel nearby?

昨天晚上有雾吗？
昨天晚上有霧嗎？
Zuótiān wǎnshang yǒu wù ma?
Was there fog last night? (Was it foggy last night?)

To give a negative reply, say 没有/沒有 méi yǒu.

附近没有旅馆。
附近沒有旅館。
Fùjìn méi yǒu lǘguǎn.
There is no hotel nearby.
Expressing existence

The verb 是 shì ‘to express existence’

是 shì can be used to express the existence of some object at a location. 是 shì is often used in this way when the object fills the location.

我们房子的屋顶上都是雪。

我們房子的屋頂上都是雪。

Wǒmen fángzi de wūdǐng shàng dōu shì xuě.
The roof of our house was covered with snow.

地上都是玩具。

Dì shàng dōu shì wánjù.
Toys are all over the floor.

Expressing existence with change-of-state placement verbs

Change-of-state verbs that refer to placement, such as 站 zhàn ‘to stand,’ 坐 zuò ‘to sit,’ 放 fàng ‘to put, to place,’ 躺 tǎng ‘to lie,’ etc. are often used in sentences that refer to existence. In these ‘existential’ sentences the verbs of placement are usually followed by the verb suffix 着/著 zhe to emphasize the ongoing duration of the situation.

街上站着很多人。

街上站著很多人。

Jiēshàng zhànzhe hěn duō rén.
There are a lot of people standing in the street.

公共汽车上坐着很多人。

公共汽車上坐著很多人。

Gōnggōng qìchē shàng zuòzhe hěn duō rén.

Shūzhōu shàng fàngzhe yī píng huā.

Describing people, places, and things

30.1 Equational sentences: identifying or describing the subject with a noun phrase in the predicate

是 shì links the subject with a noun phrase in the predicate that identifies or describes it. Sentences with this form are equational sentences.

subject 是 shì noun or noun phrase

赵玫玲是学生。
Zhào Méilíng shì xuésheng.
Zhao Meiling is a student.

苏州是一个城市。
Sūzhōu shì yī gè chéngshì.
Suzhou is a city.

奔驰是一种车。
Bēnchí shì yī zhǒng chē.
The Mercedes Benz is a type of car.

11.4, 29.1

30.2 Describing the subject with a predicate that is an adjectival verb

Adjectival verbs may serve as the predicate of the sentence to describe the subject. The intensifier 很 hěn often occurs before the adjectival verb, especially if it is a one-syllable adjectival verb. Notice that 是 shì is not used when the predicate is an adjectival verb.

subject (很 hěn) adjectival verb

赵玫玲很聪明。
Zhào Méilíng hěn cōngming.
Zhao Meiling is very smart.

苏州很漂亮。
Sūzhōu hěn piàoliang.
Suzhou is very beautiful.

192
Asking questions about the attributes of a person, place, or thing

奔馳很貴。
Bēnchí hěn guì.
The Mercedes Benz is very expensive.

30.3
Identifying or describing a noun with a modifying phrase

Phrases that describe or ‘modify’ the noun always occur before the noun. The particle 的 de typically occurs right after the modifier and before the noun that is being described. In the following examples, the modifier + 的 de is emphasized.

很聪明的女孩
hěn cōngming de nǚháizi
a very intelligent girl

很贵的车
hěn guì de chē
a very expensive car

很有名的大学
hěn yǒu míng de dàxué
a very famous university

很安静的地方
hěn ānjìng de difang
a very peaceful place

30.4
Asking questions about the attributes of a person, place, or thing

30.4.1 Asking what someone or something is like

To ask what someone or something is like, say:

person/place/thing 怎么样?

Nàge nǚ háizi zěnmeyàng?
What about that girl? (What is that girl like?)

那个大学怎么样?
Nàge dàxué zěnmeyàng?
What is that university like?
**30.5 Describing People, Places, and Things**

苏州怎么样？
苏駿怎麼样？
Sūzhōu zěnmeyàng?
What is Suzhou like?

### 30.4.2 Asking for more information

To ask for more information about a person, place or thing, say:

**什么/甚麼 shénme noun?**
what person/place thing?

- 这是什么书？
  这是甚麼書？
  Zhè shì shénme shū?
  What book is this?

or

**什么样的/甚麼樣的 shénme yàng de noun?**
what kind of noun?

- 这是什么样的地方？
  这是甚麼樣的地方？
  Zhè shì shénme yàng de difang?
  What kind of place is this?

### 30.5 Describing an item in terms of the material that it is made of

#### 30.5.1 Describing what an item is made of

To describe an item in terms of the material that it is made of, say:

- (noun) 是 (用) NP做的
  shì (yòng) NP zuò de
  (noun) is made of _______

  - 那个桌子是用木头做的。
    那個桌子是用木頭做的。
    Nàge zhuōzi shì yòng mùtou zuò de.
    That table is made of wood.

  - 这个花瓶是 (用) 玻璃做的。
    這個花瓶是 (用) 玻璃做的。
    Zhège huāpíng shì (yòng) bōli zuò de.
    This vase is made of glass.

  - 我的耳环是 (用) 金子做的。
    我的耳環是 (用) 金子做的。
    Wǒ de ěrhuán shì (yòng) jīnzi zuò de.
    My earrings are made of gold.
30.5.2 **Asking what an item is made of**

To ask what an item is made of, say:

(noun) 是用什么做的？
是用甚麽做的？

ší yòng shénme zuò de?
What is (this object) made of?

这个花瓶是用什么做的？
這個花瓶是用甚麼做的？

Zhègè huāpíng shì yòng shénme zuò de?
What is this vase made of?

你的耳环是用什么做的？
你的耳環是用甚麼做的？

Nǐ de ěrhuán shì yòng shénme zuò de?
What are your earrings made of?

30.6 **Describing nouns in terms of attributes that imply comparison**

In Mandarin, adjectival verbs imply comparison, even when they are not used in a comparison structure. This is especially true when the adjectival verb is not preceded by an intensifier. Here are examples. The context usually makes it clear whether a simple description or a comparison is intended.

那本书贵。

Nà běn shū guì.
That book is expensive.

or

王老师忙。

Wáng láoshī máng.
Professor Wang is busy.

or

Wáng Ming (shi) èrshísān suì.
Wang Ming is 23 (years old).

If it is clear from the context, 岁/歲 suì ‘years of age’ may be omitted:

Wáng Ming (shi) èrshísān.
Wang Ming is 23.
The verb 是 shì is optional and is usually absent in statements in which the predicate is an age, or, in fact, any number + classifier (+ noun) phrase.

Wǒ de dìdi shíbā suì.
My younger brother is 18 (years old).

However, when negation or an adverb occurs in the sentence, 是 shì must also occur.

Tā bù shì shíbā suì. Tā zhǐ shì shíwǔ suì.
He is not 18 (years old). He is only 15 (years old).

When the adverb 已经/已經 yǐjing ‘already’ occurs, is shì may be absent.

Tā yǐjing (shì) liǎng suì le.
He is already two (years old).

30.7.2 Asking about age

To ask the age of an adult, say:

Nǐ duō dà niánjì?
How old are you?

or

Nǐ duō dà suìshu?
How old are you?

or

Nǐ suìshu duō dà?
How old are you?

To ask the age of a young person, say:

Nǐ duō?
How old are you?

To ask the age of a child (up to ten years of age), you can say:

Nǐ jǐ suì?
How old are you?
Describing the weather

A formal and very polite way to inquire about the age of an older person is:

您今年高寿？
您今年高壽？
Nín jīnnián gāoshòu？
How old are you?

几/幾 jǐ is a classifier that is used to ask about small numbers. Therefore, it is appropriate to use when asking the age of young children, but not when asking the age of older people.

Statements that describe the weather

Here are common Mandarin expressions used when discussing the weather. Notice that there is no word in Mandarin that is equivalent to the ‘it’ used in weather descriptions in English. Mandarin weather descriptions often begin with the verb and do not have a subject.

Describing how actions are performed

31.1 Describing the general or past performance of an action with a manner adverbial phrase

To describe how an action is generally performed or how it was performed in the past, use the following structure:

*action verb* 得 *de adjectival verb*

Phrases that describe the performance of an action are often referred to as *manner complements* or *manner adverbial phrases*. The word *adverbial* means they describe the verb.

- 他说得快。
  他說得快。
  Tā shuō de kuài.
  He speaks fast.

- 她开得慢。
  她開得慢。
  Tā kāi de màn.
  She drives slowly.

**NOTE**

The suffixes 了 le, 过/過 guo, and 着/著 zhe do not occur after the action verb or the adjectival verb in manner adverbial phrases.

31.1.1 Describing the performance of an action when the verb takes an object

If the action verb takes an object, the verb is said twice, the first time followed by the object, and the second time followed by 得 *de adjectival verb*:

* [action verb + object] [action verb 得 *de adjectival verb]*

- 他说话说得快。
  他說話說得快。
  Tā shuō huà shuō de kuài.
  He speaks fast.
31.12 Modifying the description of the action

31.1.2.1 Modifying with intensifiers

In manner adverbial phrases, the adjectival verb may be preceded by an intensifier:

He doesn’t speak fast.

你们都考得不好。

### 31.3 Describing the performance of an entire action with an adverbial modifier

To describe how an entire action is performed on a specific occasion, precede the verb phrase (or prepositional phrase + verb phrase if there is a prepositional phrase) with an *adverbial verb modifier* + 地 de as follows. Note the tone changes on the second syllable of the modifier:

Indicating result, conclusion, potential, and extent

32.1 Indicating the result or conclusion of an action with resultative verbs

In Mandarin, action verbs refer to open-ended processes and not to their conclusions or results. For example, the verb 买/買 mǎi refers to ‘shopping,’ not ‘buying.’ The verb 找 zhǎo refers to ‘looking for’ something, not ‘finding’ it.

English sometimes uses two entirely different verbs to refer to a process and its result or conclusion. In Mandarin, processes and results are always expressed using the same verb. The process is expressed with an open-ended action verb. The result or conclusion is expressed by adding a resultative suffix to the open-ended action verb. Verbs that are formed by an action verb and a resultative suffix are often referred to as resultative verbs.

Resultative verb structure: action verb + resultative ending

Note: Some grammars refer to the resultative suffix as a complement of result.

Indicating the result or conclusion of an action with resultative verbs

Here are example sentences with resultative verbs.

Q: 你听到了那个声音吗?
    你聽到了那個聲音嗎?
    Nǐ tīngdào le nàge shēngyīn ma?
    Did you hear that sound?

A: 没听到。
    Méi tīngdào.
    I didn’t hear it.

Q: 你吃饱了吗?
    你吃飽了嗎?
    Nǐ chībǎo le ma?
    Did you eat until full? (Are you full?)

A: 吃饱了。
    Chībǎo le.
    I ate until full. (I’m full.)

我把我自己的名字写错了。
我把自己的名字寫錯了。
Wǒ bǎ wǒ zìjǐ de míngzi xiěcuò le.
I wrote my own name wrong.

Directional suffixes may also indicate the result of movement.

我们走进来了。
我們走進來了。
Wǒmen zǒu jǐnlái le.
We walked in.

猫跳上沙发去了。
貓跳上沙發去了。
Māo tiào shàng shāfā qù le.
The cat jumped onto the sofa.

Using the verb suffix 了 le with resultative verbs to indicate completion

The verb suffix 了 le occurs at the end of resultative verbs, after the resultative suffix, to indicate that the action is complete or the desired result has been attained.

我做完了功课。
我把自己的名字写错了。
Wǒ zuòwán le gōngkè.
I finished my homework.

我吃饱了。
Wǒ chībǎo le.
I am full. (I’ve eaten until full.)

了 le never occurs between the action verb and the resultative ending.

Say this          Not this

你找到了你的皮包吗?
你找了到你的皮包吗?
Nǐ zhǎodào le nǐ de píbāo ma?
Nǐ zhǎo le dào nǐ de píbāo ma?
Have you found your wallet?
32.1.4 Using 没/没 méi with resultative verbs to indicate lack of completion or result

The negative marker 没/没 méi is used to indicate that an action has not been completed or that the desired result has not been attained. 没/没 méi occurs before the entire resultative verb.

我没看完。
我沒看完。
Wǒ méi kànwán.
I haven’t finished reading.

我没听懂。
我沒聽懂。
Wǒ méi tīngdǒng.
I didn’t understand (by listening).

没/没 méi never occurs between the action verb and resultative suffix.

Say this Not this

我没念错。
我念没错。
我没念錯。
我唸沒錯。
Wǒ méi niàncuò. Wǒ niàn méi cuò.
I didn’t read (it) wrong.

32.2 Indicating the ability to reach a conclusion or result: the potential infixes 得 de and 不 bu

得 de and 不 bu may occur between an action verb and a resultative or directional suffix to indicate that it is possible or not possible to reach the result. When 得 de and 不 bu are used in this way, we refer to them as potential infixes and the form of the resultative or directional verb as the potential form.

32.2.1 The potential infix 得 de

To indicate that it is possible to perform an action and reach a conclusion or result, add the potential infix 得 de into the middle of the resultative verb, between the action verb and the resultative suffix:

action verb + 得 de + resultative suffix

我听得懂中国电影。
我聽得懂中國電影。
Wǒ tīngdedǒng Zhōngguó diànyǐng.
I can understand (by listening) Chinese movies.

你吃得完那么多东西吗?
你吃得完那麼多東西嗎?
Nǐ chīdewán nàme duō dōngxi ma?
Can you finish eating that many things?

32.2.2 The potential infix 不 bu

To indicate that it is not possible to reach a conclusion or result, add the potential infix 不 bu into the middle of the resultative or directional verb, between the action verb and the resultative suffix:

32.3

action verb + 不 bu + resultative suffix

王老师的话我都听不懂。

Wáng lǎoshī de huà wǒ dōu tīngbudǒng.
I can’t understand (by listening) what Professor Wang says.

我找不到我的皮包。

Wǒ zhǎobudào wǒ de píbāo.
I can’t find my wallet.

The infixes 得 de and 不 bu are the only things that can occur between an action verb and a resultative suffix.

32.2.2.1 Using resultative verbs to indicate that a result cannot be achieved no matter what

Resultative verbs in the negative potential form occur with the question word 怎么/怎麼 zěnme to indicate that a result cannot be achieved no matter what the subject does.

我怎么学也学不会。

Wǒ zěnme xué yě xuébuhuí.
No matter how I study I can’t learn (it).

他怎么找也找不到。

Tā zěnme zhǎo yě zhǎobudào.
No matter how I look I can’t find (it).

Note: The infixes 得 de and 不 bu are the only things that can occur between an action verb and a resultative suffix.
32.4 Indicating the ability to perform the verb: the potential suffixes 得了 deliǎo and 不了 buliǎo

Resultative suffixes indicate the result or conclusion of an action. To indicate that the subject is able to or unable to perform the action, add one of the following potential suffixes to the verb:

-得了 deliǎo able to perform the action
-不了 buliǎo unable to perform the action

32.4.1 The potential suffix 得了 deliǎo

Use this suffix to say that the subject is able to perform the action of the verb or that the subject is able to finish the action. In the latter sense, it is similar to the resultative suffix 完 wán ‘to finish.’

他很聪明，一定做得了这件事情。
他很聰明，一定做得了這件事情。

Tā hěn cōngming, yīdìng zuòdeliǎo zhèjiàn shìqing.
He is very smart. He is certainly able to take care of this matter.

今天的功课这么多，我做不了。
今天的功課這麼多，我做不了。

Jīntiān de gōngkè zhème duō, wǒ zuòbuliǎo.

你点了这么多菜，我们吃得了吗?
你點了這麼多菜，我們吃得了嗎?

Nǐ diǎn le zhème duō cài, wǒmen chīdeliǎo ma?
You’ve ordered so many dishes. Will we be able to eat them? (finish eating them?)

32.4.2 The potential suffix 不了 buliǎo

Use this suffix to say that the subject is not able to do some action.

我用不了筷子。
Wǒ yòngbuliǎo kuàizi.
I am unable to use chopsticks.

他一定走不了那么远。
他一定走不了那麼遠。

Tā yídǐng zǒubuliǎo nàme yuǎn.
He is certainly unable to walk that far.

这是他的个性，他改不了。
這是他的個性，他改不了。

Zhè shì tā de gèxing, tā gǎibuliǎo.
This is his nature. He can’t change.
32.4.3 Asking about the ability to perform an action

To ask about the ability of a subject to perform an action, form a yes–no question with 吗/嗎 ma or with the verb-not-verb structure.

• 吗/嗎 ma

你吃得了这么多菜吗？
你吃得了這麼多菜嗎？
Nǐ chīdéliǎo zhème duō cài ma?
Are you able to eat this many dishes?

• Verb-not-verb structure: verb 得了 deliǎo verb 不了 buliǎo

他做得了做不了这件事情？
他做得了做不了這件事情？
Tā zuòdéliǎo zuòbuliǎo zhè jiàn shìqing?
Is he able to take care of this matter or not?

这么多菜，你吃得了吃不了？
這麼多菜，你吃得了吃不了？
Zhèmé duō cài，nǐ chīdéliǎo chībuliǎo?
This many dishes, are you able to eat them or not?

To answer ‘yes,’ say verb 得了 deliǎo:

做得了。
Zuòdéliǎo.
He can do it.

吃得了。
Chīdéliǎo.
I can eat them.

To answer ‘no,’ say verb 不了 buliǎo:

做不了。
Zuòbuliǎo.
He can’t do it.

吃不了。
Chībuliǎo.
I can’t eat them.

18.6.1

Resultative suffixes with special meanings or properties

32.6 Indicating the extent or result of a situation

Resultative verbs indicate the result of actions. To indicate the result or extent of a situation, use the following structure:

verb 得 de verb phrase/clause

For adjectival verbs, 得 de introduces the extent of the situation, adding the meaning: so adjectival verb that verb phrase/clause.

他累得抬不起头来了。
Tā lèi de tāibaquítou lái le.
He was so tired that he could not pick up his head.

她高兴得说不出话来了。
Tā gāoxìng de shuōbuchū huà lái le.
She was so happy that she was unable to speak.

他冷得发抖了。
Tā lěng de fādǒu le.
He was so cold that he was shivering.

When the verb is an action verb, 得 de introduces the result of the action, adding the meaning: performed the action until verb phrase/sentence.

妈妈哭得眼睛都红了。
Māma kū de yǎnjing dōu hóng le.
Mom cried until her eyes were red.

他走得精疲力尽了。
Tā zǒu de jīngpí lìjìn le.
He walked so much that he was exhausted.

If the action verb takes an object, the sentence takes the following form:

[action verb + object] action verb 得 de verb phrase/clause

他[走路]走得精疲力尽了。
Tā [zǒu lù] zǒu de jīngpí lìjìn le.
He walked so much that he was exhausted.
Making comparisons

Comparison structures are used to indicate that things are similar to or different from each other, or to indicate that something is more than or less than another thing in some way.

This chapter presents the structures used to make comparisons in Mandarin. It uses the following grammatical terms and abbreviations. Refer to the relevant chapters for more information about each grammatical category.

- noun phrase (NP) Chapter 9
- adjectival verb (AV) and adjectival verb phrase (AVP) Chapter 10
- stative verb (SV) and stative verb phrase (SVP) Chapter 11
- modal verb (MV) Chapter 12
- action verb (V) and action verb phrase (VP) Chapter 13

33.1 Similarity

33.1.1 Indicating that noun phrases are identical

To indicate that two noun phrases are similar or equal, say:

\[
\begin{align*}
\text{NP}_1 \text{ 跟/和 } \text{ NP}_2 \text{ 一样} \\
\text{NP}_1 \text{ 跟/和 } \text{ NP}_2 \text{ 一樣} \\
\text{NP}_1 \text{ 跟 } \text{ NP}_2 \text{ 一}\text{gèn}/\text{hé} \text{ NP}_2 \text{ yīyàng} \\
\text{NP}_1 \text{ and NP}_2 \text{ identical/same}
\end{align*}
\]

这本书跟/和那本书一样。
這本書跟/和那本書一樣。
Zhè běn shū gēn/hé nà běn shū yīyàng.
This book and that book are the same.

今天的天气跟/和昨天的一样。
今天的天氣跟/和昨天的一樣。
Jīntiān de tiānqì gēn/hé zuótiān de yīyàng.
Today’s weather is the same as yesterday’s.

The words 跟 gèn and 和 hé are equivalent in meaning. In all of the structures in this chapter in which they occur, 跟 gèn and 和 hé are interchangeable. In some dialects, 同 tóng occurs in this structure instead of 跟 gèn or 和 hé.

When a noun phrase refers to multiple entities (for example, ‘houses,’ ‘dogs,’ ‘two books,’ etc.), use this pattern to say that all of the entities are the same.

```
NP 一样/一樣 yīyàng
NP identical/same
```

These two books are identical.

```
Zhè liǎng běn shū yīyàng.
```

These two books are identical.

```
Zhè sān gè cài yīyàng ma?
```

Are these three dishes the same?

**33.2.2**

**33.1.3 Indicating that noun phrases share a property**

To indicate that two noun phrases are alike in a particular property, say the following:

```
NP1 跟/和 NP2 一样 AV
NP1 跟/和 NP2 一樣 AV
NP1 gēn/hé NP2 yīyàng AV
```

My son and my daughter are the same height. (equally tall)

```
Wǒ érzi gēn/hé wǒ nǚ’ér yīyàng gāo.
```

```
Xiǎogǒu hé xiǎomāo yīyàng kě’ài.
```

Puppies and kittens are equally cute.

**33.2.3**

**33.1.4 Indicating resemblance**

To indicate that one noun phrase resembles another noun phrase, say:

```

```
Tā xiàng tā bàba.
```

He resembles his dad.

```
他像法國人嗎?
```

He looks like a French person?

```
Tā xiàng Fǎguórén ma?
```

### Similarity

NP₁ 跟/和 NP₂ 很像

你儿子跟/和你女儿很像吗？
你兒子跟/和你女兒很像嗎？

Nǐ érzi gēn/hé nǐ nǚ'ér hěn xiàng ma?

NP are very similar/very much alike.

他们很像。
他們很像。

Tāmen hěn xiàng.
They look very much alike.

#### 33.1.5 Indicating similarity in some property

To indicate that two noun phrases are similar enough to be considered equivalent, say:

Tā yǒu nǐ zhème gāo.
He is as tall as you.

**Note**

这么/這麼 zhème ‘this/so’ and 那么/那麼 nāme ‘that/so’ are used frequently in comparison structures. They may occur before an adjectival verb. It is often not necessary to translate 这么/這麼 zhème and 那么/那麼 nāme into English.
Indicating identical performance of an action

To indicate that two noun phrases perform an action in a similar way, say:

- \( NP_1 \) 跟/和 \( NP_2 \) [verb得] 一样 AV
- \( NP_1 \) 跟/和 \( NP_2 \) [verb得] 一樣 AV
- \( NP_1 \) 跟/和 \( NP_2 \) [verbde] yīyàng AV

Wǒ gēn tā chī de yīyàng duō.

I eat as much as him.

弟弟跟妹妹写得一样快。

Dìdi gēn mèimei xiě de yīyàng kuài.

Younger brother and younger sister write equally fast.

If the object of the action verb is included in the sentence, the action verb is said twice, once followed by the object, and once followed by 得一样 de yīyàng (AV).

- \( NP_1 \) 跟/和 \( NP_2 \) [action verb + object] [action verb得] 一样 AV
- \( NP_1 \) 跟/和 \( NP_2 \) [action verb + object] [action verb得] 一樣 AV

弟弟跟妹妹写字写得一样快。

Dìdi gēn mèimei xiě zì xiě de yīyàng kuài.

Younger brother and younger sister write characters equally fast.

Here are several variations in this pattern. They differ in the order of the phrases. In all of these variations, [action verb + object] occurs before [action verb得 de], and 一样/一樣 yīyàng AV occurs at the end of the sentence.

**Variation 1**

- \( NP_1 \) [action verb + object] [action verb得] 跟/和 \( NP_2 \) 一样 AV

NP₁ and NP₂ perform the action verb equally AV

我吃饭跟他吃得一样多。
我吃饭跟他吃得一樣多。

indicating that one noun phrase does not resemble another

To indicate that one noun phrase does not resemble another noun phrase, say:

\[
\begin{align*}

More than

‘More than’ comparisons indicate that some noun phrase has more of some property than another noun phrase. The property can be expressed as an adjectival verb, a stative verb, or a verb phrase with a modal verb.
### 33.3.1 Comparing noun phrases in terms of adjectival verbs

<table>
<thead>
<tr>
<th>NP₁</th>
<th>比</th>
<th>NP₂</th>
<th>AV</th>
</tr>
</thead>
<tbody>
<tr>
<td>NP₁</td>
<td>bǐ</td>
<td>NP₂</td>
<td>AV</td>
</tr>
</tbody>
</table>

NP₁ is more AV than NP₂.

- 中国比日本大。 (Zhōngguó bǐ Riběn dà.) China is bigger than Japan.
- 我的身体比以前好了。 (Wǒ de shēntǐ bǐ yǐqián hǎo le.) My health is better than before.
- 吃饭比做饭容易。 (Chī fàn bǐ zuò fàn róngyì.) Eating is easier than cooking.

#### Note

In the third and fourth example sentences in this section, the phrases that are being compared are a verb + object. In these sentences, the verb + object together function as a noun phrase, serving as the subject of the sentence or as the object of 比 bǐ.

### 33.3.2 Comparing noun phrases in terms of stative verbs

Stative verbs such as 愛 ‘to love’ and 喜欢 ‘to like to, ‘to prefer’ take noun phrase objects or verb phrase complements. The stative verb and its object or complement is a stative verb phrase (SVP). When comparing two noun phrases in terms of a stative verb phrase, say:

<table>
<thead>
<tr>
<th>NP₁</th>
<th>比</th>
<th>NP₂</th>
<th>SVP</th>
</tr>
</thead>
<tbody>
<tr>
<td>NP₁</td>
<td>bǐ</td>
<td>NP₂</td>
<td>SVP</td>
</tr>
</tbody>
</table>

NP₁ is more SVP than NP₂.

- 他比我爱吃中国饭。 (Tā bǐ wǒ ài chī Zhōngguó fàn.) He loves to eat Chinese food more than I.
- 張先生比張太太喜歡買書。 (Zhāng xiānsheng bǐ Zhāng tàitai xǐhuan mǎi shū.) Mr. Zhang likes to buy books more than Mrs. Zhang.

### 33.3.3 Comparing noun phrases in terms of modal verb phrases

To compare noun phrases in terms of verb phrases that begin with a modal verb, say:

<table>
<thead>
<tr>
<th>NP₁</th>
<th>比</th>
<th>NP₂</th>
<th>MVP</th>
</tr>
</thead>
<tbody>
<tr>
<td>NP₁</td>
<td>bǐ</td>
<td>NP₂</td>
<td>MVP</td>
</tr>
</tbody>
</table>

NP₁ is more MVP than NP₂.

- 我姐姐比我哥哥会唱歌。(MV) My older sister can sing better than my older brother.

### 33.3.4 Indicating quantity in ‘more than’ comparisons

When comparing noun phrases, it is possible to indicate how much more one noun phrase is than the other. The phrase that indicates the quantity occurs at the end of the sentence, after the adjectival verb or stative verb.

- 中国比日本大。 (Zhōngguó bǐ Riběn dà.) China is bigger than Japan.
- 我的身体比以前好了。 (Wǒ de shēntǐ bǐ yǐqián hǎo le.) My health is better than before.
- 吃饭比做饭容易。 (Chī fàn bǐ zuò fàn róngyì.) Eating is easier than cooking.

#### Note

In the third and fourth example sentences in this section, the phrases that are being compared are a verb + object. In these sentences, the verb + object together function as a noun phrase, serving as the subject of the sentence or as the object of 比 bǐ.
3.3.4.1 Indicating a specific quantity

When the quantity is a specific number, say:

\[
\begin{align*}
\text{NP}_1 & \quad \text{比} \quad \text{NP}_2 \quad \text{AV [number + classifier (+ noun)]} \\
\text{NP}_1 & \quad \text{bǐ} \quad \text{NP}_2 \quad \text{AV [number + classifier (+ noun)]} \\
\text{NP}_1 & \quad \text{is more AV than NP}_2 \quad \text{by [number + classifier (+ noun)]}
\end{align*}
\]

  這個旅館比那個旅館貴九十塊錢。  
  Zhège lǚguǎn bǐ nàge lǚguǎn guì jiǔ shí kuài qián.  
  This hotel is ninety dollars more expensive than that one.

The adjectival verbs 早 zǎo ‘early,’ 晚 wǎn ‘late,’ 多 duō ‘more,’ and 少 shǎo ‘less’ may be followed by an action verb. The number + classifier and optional noun sequence occurs after the adjectival verb + action verb.

\[
\begin{align*}
\text{NP}_1 & \quad \text{比} \quad \text{NP}_2 \quad \text{AV action verb [number + classifier (+ noun)]} \\
\text{NP}_1 & \quad \text{bǐ} \quad \text{NP}_2 \quad \text{AV action verb [number + classifier (+ noun)]} \\
\text{NP}_1 & \quad \text{does verb more AV than NP}_2 \quad \text{by [number + classifier (+ noun)]}
\end{align*}

  I earned two hundred dollars more this year than last year.

3.3.4.2 Noun phrase 1 is much more AV than noun phrase 2

To indicate that one noun phrase is much more AV than another noun phrase, say the following.

\[
\begin{align*}
\text{NP}_1 & \quad \text{比} \quad \text{NP}_2 \quad \text{AV 得多} \\
\text{NP}_1 & \quad \text{bǐ} \quad \text{NP}_2 \quad \text{AV de duō} \\
\text{NP}_1 & \quad \text{is much more AV than NP}_2
\end{align*}
\]

Jīntiān bǐ zuótiān lěng de duō.
Today is a lot colder than yesterday.

他比我用功得多。

3.3.5 **Comparing the performance of an action**

Tā bǐ wǒ chī de duō.

He *eats more than* me.

弟弟比妹妹写得快。

弟弟比妹妹寫得快。

Dìdi bǐ mèimei xiě de kuài.

Younger brother *writes faster than* younger sister.

If the object of the action verb is included in the sentence, the action verb must be said twice, once followed by the object, and once followed by 得 + AV.

NP₁ 比 NP₂ [action verb + object] [action verb 得] AV

NP₁ bǐ NP₂ [action verb + object] [action verb de] AV

NP₁ performs the action verb more AV than NP₂

My voice is not as good as my younger sister’s.

弟弟不如哥哥用功。
Didi bùrú gēge yònggōng.
Younger brother is not as hardworking as older brother.

走路不如骑自行车快。
走路不如騎自行車快。
Zǒu lù bùrú qí zìxíngchē kuài.
Walking is not as fast as riding a bike.
33.4.3 Indicating performance that is less than another's in some way

To indicate that one noun phrase does not perform some action as AV as another noun phrase, say:

\[ \text{NP}_1 \text{ 没有/沒有} \text{ NP}_2 \text{ [action verb 得]} \text{ AV} \]
\[ \text{NP}_1 \text{ méi yòu} \text{ NP}_2 \text{ [action verb de]} \text{ AV} \]
\text{NP}_1 \text{ does not perform the action verb as AV as NP}_2.

我没有他吃得多。
我沒有他吃的多。
Wǒ méi yǒu tā chī de duō.
I don’t eat as much as him.

妹妹没有弟弟写得快。
妹妹沒有弟弟寫得快。
Mèimei méi yōu diìdi xiě de kuài.
Younger sister doesn’t write as fast as younger brother.

那么/那麼 nàme and 这么/這麼 zhème optionally occur before the AV.

我没有他吃的那么多。
我沒有他吃飯吃的那麼多。
Wǒ méi yǒu tā chī de nàme duō.
I don’t eat as much as him.

妹妹没有弟弟写得这么快。
妹妹沒有弟弟寫得這麼快。
Mèimei méi yōu diìdi xiě de zhème kuài.
Younger sister doesn’t write as fast as younger brother.

If the object of the action verb is included in the sentence, the action verb is said twice, once followed by the object, and once followed by 得 + AV.

\[ \text{NP}_1 \text{ 没有/沒有} \text{ NP}_2 \text{ [action verb + object] [action verb 得]} \text{ 没有/沒有} \text{ NP}_2 \text{ (那么/那麼) AV} \]
\[ \text{NP}_1 \text{ méi yòu} \text{ NP}_2 \text{ [action verb + object] [action verb de] (nàme) AV} \]
\text{NP}_1 \text{ does not perform the action verb as AV as NP}_2.

我没有他吃饭吃得没有他多。
我沒有他吃飯吃得沒有他多。
Wǒ chī fàn chī de méi yǒu tā duō.
I don’t eat as much food as he does.

妹妹没有弟弟写字写得(那么)快。
妹妹沒有弟弟寫字寫得(那麼)快。
Mèimei méi yōu diìdi xiě zì xiě de (nàme) kuài.
Younger sister doesn’t write characters as fast as younger brother.

Here are several variations in this pattern. They differ in the order of the phrases. In all of them, [action verb + object] occurs before [action verb 得 de], and AV occurs at the end of the sentence.

Variation 1

\[ \text{NP}_1 \text{ [action verb + object] [action verb 得]} \text{ 没有/沒有} \text{ NP}_2 \text{ (那么/那麼) AV} \]
\[ \text{NP}_1 \text{ [action verb + object] [action verb de] méi yòu} \text{ NP}_2 \text{ (nàme) AV} \]
\text{NP}_1 \text{ does not perform the action verb as AV as NP}_2.

我吃饭吃得没有他多。
我吃飯吃得沒有他多。
Wǒ chī fàn chī de méi yǒu tā duō.
I don’t eat as much food as he does.
Comparative degree

妹妹写字写得没有弟弟(那么)快。
Mèimei xiě zì xiě de méi yǒu dìdi (nàme) kuài.
Younger sister doesn’t write characters as fast as younger brother.

Variation 2

object, NP₁ [action verb 得] 没有/沒有 NP₂ (那么/那麼) AV
object, NP₁ [action verb de] méi yǒu NP₂ (nàme) AV
As for the object, NP₁ does not perform the action verb as AV as NP₂

中国字，妹妹写得没有弟弟那么快。
中國字，妹妹寫得沒有弟弟那麼快。
Zhōngguó zì, mèimei xiě de méi yǒu dìdi nàme kuài.
(As for) Chinese characters, younger sister doesn’t write them as fast as younger brother.

Be careful to repeat the action verb if you include its object.

Say this  Not this

我没有他吃饭吃得多。 *我没有他吃饭得多。
Wǒ méi yǒu tā chī fàn chī de duō. Wǒ méi yǒu tā chī fàn de duō.
Older brother likes to watch movies. Younger sister likes to even more.

日本车很贵。德国车更贵。
日本車很貴。德國車更貴。
Rìběn chē hěn guì. Déguó chē gèng guì.
Japanese cars are very expensive. German cars are even more expensive.

Japanese cars are very expensive. German cars are even more expensive.

更 gèng and 还要/還要 hái (yào) may be used in 比 bǐ comparison sentences.

German cars are even more expensive than Japanese cars.
天气预报说明天比今天还要冷。
天氣預報說明天比今天還要冷。

The weather report says tomorrow will be even colder than today.

### 33.6 Superlative degree

The intensifier 最 zuì indicates a superlative degree: most stative verb/most adjectival verb. Sentence final 了 le is sometimes used at the end of the sentence to emphasize that the information is new for the addressee. The superlative form is also used for exaggeration.

万里长城是世界上最长的城了。(AV)
萬里長城是世界上最長的城了。

Wànlǐ Chángchéng shì shìjiè shàng zuì cháng de chéng le.
The Great Wall is the longest wall in the world.

我妹妹最喜欢吃冰激凌了。(SV)
我妹妹最喜歡吃冰激淩了。

Wǒ mèimei zuì xǐhuan chī bīngjìlíng le.
My younger sister loves to eat ice cream the most.

### 33.7 Relative degree

The following intensifiers may occur before a stative verb or adjectival verb to indicate relative degree.

| 比较/比較 | bǐjiào | relatively |
| 相当/相當 | xiāngdāng | relatively, quite |

今天比较热。(AV)
Jīntiān bǐjiào rè.

Today is relatively hot.

那个女孩子相当高。(AV)

People from Sichuan prefer to eat spicy food.
Talking about the present

Here are the expressions and structures most often used to indicate that a state exists at the present time or that an action is occurring at the present time.

### 34.1 Time expressions that indicate present time

**现在/現在 xiànzài ‘now’**

你現在去哪兒？
Nǐ xiànzài qù nǎr?
Where are you going now?

**目前 mùqián ‘at present’**

他目前在學中文。
Tā mùqián zài xué Zhōngwén.
He is presently studying Chinese.

**今天 jīntiān ‘today’**

他今天很忙。
Tā jīntiān hěn máng.
He is very busy today.

**这个星期/這個星期 zhège xīngqī ‘this week’**

**今年 jīnnián ‘this year’**

今年是二零一四年。
Jīnnián shì èr líng yī sì nián.
This year is 2014. (It’s 2014.)
34.2 Using 在 zài and 正在 zhèngzài to indicate ongoing actions in present time

在 zài or 正在 zhèngzài can occur before action verbs that have duration to indicate that the action is ongoing at the present time.

- 哥哥在打球。
  Gēgē zài dǎ qiú.
  Elder brother is playing ball.
- 他正在洗澡，不能接电话。
  他正在洗澡，不能接電話。
  Tā zhèngzài xǐ zǎo, bù néng jiē diànhuà.
  He’s bathing right now (and) can’t get the phone.

在 zài and 正在 zhèngzài are only used when talking about actions. They are not used when the main verb of the sentence is an adjectival verb, a stative verb, or a modal verb. 现在/現在 xiànzài ‘now’ can be used when talking about states or actions that occur in the present time.

Say this

汽油现在贵了。(AV)
Qíyóu xiànzài guì le.
Gasoline is expensive now.

他现在很高兴。(AV)
Tā xiànzài hěn gāoxìng.
He is happy right now.

她现在喜欢那个男的。(SV)
Tā xiànzài xǐhuan nàge nán de.

*他正在很高兴。
Tā zhèngzài hěn gāoxìng.

*她正在喜欢那个男的。
Tā zhèngzài xǐhuan nàge nán de.

34.3 Using the final particle 呢 ne to indicate ongoing situations in present time

The final particle 呢 ne may be used at the end of a sentence when an action is ongoing in the present time. 呢 ne often co-occurs with 在 zài and 正在 zhèngzài.

- 他跳舞呢。
  Tā tiào wǔ ne.
  He is dancing.
- 你在想什么呢?
  Nǐ zài xiǎng shénme ne?
  What are you thinking?
- 他们正在开会呢。
  Tāmen zhèng zài kāi huì ne.
  They are having a meeting now.
Using 着/著 zhe to emphasize ongoing duration or an ongoing state in the present time

Open-ended action verbs may be suffixed with 着/著 zhe to emphasize ongoing duration at the present time. 着/著 zhe often co-occurs with 在 zài, 正在 zhèngzài, and/or 呢 ne.

他在说着话呢。
他在說著話呢。
Tā zài shuōzhe huà ne.
He is speaking.

Change-of-state verbs that describe posture or placement such as 站 zhàn ‘to stand,’ 坐 zuò ‘to sit,’ 躺 tāng ‘to lie,’ 存 cún ‘to save/to deposit,’ 放 fàng ‘to put/to place,’ 挂/掛 guà ‘to hang,’ and 停 tíng ‘to park’ may be suffixed with 着/著 zhe to indicate that the state is ongoing in the present time. 呢 ne may occur at the end of the sentence.

谁在门口站着?
誰在門口站著?
Shéi zài ménkǒu zhànzhe?
Who is standing at the door?

客人在客厅里坐着呢。
客人在客廳裏坐著呢。
Kèrén zài kètīng lǐ zuòzhe ne.
The guests are sitting in the living room.

病人在床上躺着。

我的车在停车场停着呢。
我的車在停車場停著呢。
Wǒ de chē zài tíngchēchǎng tíngzhe ne.
My car is parked in the parking lot.

► 25.3.3, 17.2, 39.2
34.5 Indicating present time by context

Time expressions are optional when the context makes it clear that the sentence refers to a present time situation. For example, in the following conversation, 现在/現在 xiànzài ‘now’ can be included, but it is not necessary, because the question and response clearly refer to the present time.

妈妈：你(现在)做什么功课？
妈妈：你(現在)做甚麼功課？
Māma: Nǐ (xiànzài) zuò shénme gōngkè?
Mom: What homework are you doing (now)?

孩子：我(现在)做数学。
孩子：我(現在)做數學。
Háizì: Wǒ (xiànzài) zuò shùxué.
Child: I am doing math (now).

34.6 Negation in present time situations

Present time situations are negated with 不 bù, with one exception: the verb 有 yǒu is always negated with 没 méi.

他今天不来上课。
他今天不來上課。
Tā jīntiān bù lái shàng kè.
He is not coming to class today.

我没有钱。
我沒有錢。
Wǒ méi yǒu qián.
I don’t have money.

Action verbs may be negated with 没/沒有 méi yǒu, but when so negated, they do not refer to present time. Instead, they indicate that the action did not happen in the past.

你为什么没来上课？
你為甚麼沒來上課？
Nǐ wèi shénme méi lái shàng kè?
Why didn’t you come to class?

34.7 Talking about actions that begin in the past and continue to the present

To indicate that an action began in the past and continues to the present, end the sentence with sentence final 了 le. If the verb is followed by an object or a duration expression, the sentence will have two instances of 了 le, one following the verb, and the other at the end of the sentence. Sentences like these are sometimes described as having ‘double 了 le.’ Sentence final 了 le is sometimes described as indicating the ‘present relevance’ of the situation.

我看了两本书了。
我看進兩本書了。
Wǒ kàn le liǎng běn shū le.
I’ve read two books (so far).

他在美国住了十年了。
他在美國住了十年了。
Tā zài Měiguó zhù le shínián le.
He has lived in America for ten years (and is still there).
The adverb 已经/已經 yǐjing ‘already’ often occurs in these sentences to emphasize the fact that the situation has been ongoing from some time in the past up to the present time.

她已经学了三年的中文了。
她已經學了三年的中文了。
Tā yǐjing xué le sān nián de Zhōngwén le.
She has already studied three years of Chinese.

我教中文已经有二十多年了。
我教中文已經有二十多年了。
Wǒ jiào Zhōngwén yǐjing yǒu èrshí duō nián le.
I’ve already taught Chinese for over twenty years.

To indicate that a situation is generally true, the verb is presented without any modifiers that indicate time phrase: no time phrases, no adverbs, no verb suffixes.

中国人口很多。
中國人口很多。
Zhōngguó rénkǒu hěn duō.
China has a very large population.

这儿的天气很热。
這兒的天氣很熱。
Zhèr de tiānqì hěn rè.
The weather is very hot here.
Talking about habitual actions

Habitual actions are actions that occur regularly. The following time expressions and adverbs are used to express habitual actions in Chinese.

### 35.1 Expressing habitual time with the word 每 měi ‘every/each’

Time expressions that indicate habitual action include the word 每 měi ‘every/each.’ As with other expressions that indicate the time when an action occurs, these expressions occur right after the subject, at the beginning of the predicate. Commonly used time expressions include:

- 每个小时/每個小時 měi gè xiǎoshí every hour
- 每个钟头/每個鐘頭 měi gè zhōngtóu every hour
- 每天 měitiān every day
- 每天晚上 měitiān wǎnshang every evening
- 每个礼拜/每個禮拜 měi gè lǐbài every week
- 每个星期/每個星期 měi gè xīngqī every week
- 每个月/每個月 měi gè yuè every month
- 每年 měi nián every year

The adverb 都 dōu may also occur with these expressions, right before the verb or, if there is a prepositional phrase, right before the prepositional phrase.

- 我每天八点半都去上班。 Wǒ měitiān bādiǎn bàn dōu qù shàng bān. I go to work every day at 8:30.
- 她每个礼拜都回家看父母一次。 Tā měi gè lǐbài dōu huí jiā kàn fùmǔ yīcì. She goes home once every week to see her parents.
- 我每个月都跟朋友去看电影。 Wǒ měi gè yuè dōu gēn péngyou qù kàn diànyǐng. Every month I go with my friends to see a movie.

### 35.2 Expressing habitual time with 天天 tiāntiān and 年年 niánnián

天天 tiāntiān and 年年 niánnián may also occur in the following phrases to indicate habitual action.

- 天天 tiāntiān every day
- 年年 niánnián every year

- 大学生天天都很忙。 Dàxuéshēng tiāntiān dōu hěn máng. University students are busy every day.

NOTE 向来/向來 xiànglái and 从来/從來 cónglái are opposites.

• 向来/向來 xiànglái is used to indicate that an action habitually occurred in the past.
• 从来/從來 cónglái indicates that an action does not happen or has not happened.

从来/從來 cónglái always occurs with negation:

从来/從來 cónglái + 不 bù indicates that an action never occurs.
从来/從來 cónglái + 没 méi indicates that an action has never occurred in the past.

他从来不喝酒。

他從來不喝酒。

我从来没给他打过电话。

我從來沒給他打過電話。

Wǒ cónglái méi gěi tā dǎguó diànhuà.

► 27.3.1
Talking about the future

Mandarin has no distinct future tense. Instead, future time is expressed by words and phrases that refer to the future.

The neutral position for ‘time when’ expressions is after the subject, at the beginning of the predicate. To emphasize the time when a situation occurs, put the ‘time when’ expression at the beginning of the sentence, before the subject.

我们今天晚上去看电影。  
我們今天晚上去看電影。  
Wǒmen jīntiān wǎnshāng qù kàn diànyǐng.  
We are going to see a movie tonight.

36.2 Adverbs that refer to future time

Common adverbs that refer to the future include the following. (Note that adverbs always occur before the [prepositional phrase +] verb phrase.)

就要 jiù yào ‘soon will’

他就要结婚了。  
他就要結婚了。  
Tā jiù yào jiéhūn le.  
He is going to get married soon.
再 zài ‘(do) again in the future’

可能 kěnéng ‘possible’

她可能不学中文了。
她可能不學中文了。
Tā kěnéng bù xué Zhōngwén le.
She may not study Chinese any more.

Notice that the adverb 再 zài is closely related to the adverb 又 yòu. The adverb 再 zài means (to do) again in the future, and the adverb 又 yòu means (to do) again in the past. Sentences with 又 yòu ‘(to do) again in the past’ always end with 了 le.

你前天迟到了。昨天又迟到了。
你前天遲到了。昨天又遲到了。
Nǐ qiántiān chídào le. Zuótiān yòu chídào le.
You were late the day before yesterday. Yesterday you were late again.

可能 kěnéng ‘possible’

她可能不学中文了。
她可能不學中文了。
Tā kěnéng bù xué Zhōngwén le.
She may not study Chinese any more.

Indicating future time with the modal verb 会/會 huì

The modal verb 会/會 huì can be used to indicate future time. The meaning of ‘future’ is associated with the meanings of ‘possibility’ and ‘prediction’ conveyed by 会/會 huì.

我想他不会来了。
我想他不會來了。
Wǒ xiǎng tā bù huì lái le.
I don’t think he will come.

Sometimes, 会/會 huì simply indicates future.

天气预报说，明天一定会下雨。

Tiānqì yùbào shuō, míngtiān yīdìng huì xià yǔ.
The weather report says tomorrow it will definitely rain.
Verbs involving thinking or planning refer to events that will take place in the future. The most common include the following:

要 *yào* ‘to want’

- 我要出去买东西。
- 我要出去買東西。

_Wǒ yào chūqu mǎi dōngxi._
I want to go out to buy some things.

I am willing to marry him.

准备/準備 *zhǔnbèi* ‘to prepare to, to get ready to’

- 请你准备下车。
- 請你準備下車。

_Qǐng nǐ zhǔnbèi xià chē._

- 我将来打算住在日本。
- 我將來打算住在日本。

_Wǒ jiānglái dǎsuàn zhù zài Rìběn._
I plan to live in Japan in the future.
Indicating completion and talking about the past

Mandarin has no grammatical structure that is entirely equivalent to past tense in English. Instead, it has structures that signal the completion of an event or that indicate that an event occurred or did not occur at some time in the past, or that a situation existed at some time in the past. The primary strategies for indicating completion and talking about the past are presented in this chapter.

37.1 Marking an action as complete: perfective aspect 了 le

Mandarin uses the verb suffix 了 le to mark an action as bounded and complete. When an action is marked as complete with respect to now (speech time), completion also indicates that the action happened in the past.

Only action verbs can be marked as complete. If a stative verb, adjectival verb, or modal verb is followed by 了 le, the meaning is one of change rather than completion.

In the main clause of a sentence, perfective 了 le follows the verb or the verb + object phrase, depending upon the properties of the object.

When the object is an unmodified noun, perfective 了 le follows the object.

他昨天晚上唱歌了。

Tā zuótiān wǎnshang chàng gē le.

He sang last night.

When the object of the verb is a modified noun – that is, a noun preceded by a specifier, number, and classifier, and/or any other description phrase – perfective 了 le ordinarily follows the verb.

她昨天晚上唱了几首歌。

Tā zuótiān wǎnshang chàng le jǐ shǒu gē.

She sang a few songs last night.

她今天穿了她姐姐的衣服。

Tā jīntiān chuān le tā jiějie de yīfu.

She wore her older sister’s clothes today.

In some contexts, Mandarin speakers may put perfective 了 le after the object whether the object noun is modified or not. When in doubt about where to put 了 le, consult your Chinese teacher or a native speaker of Mandarin.

The adverb 已经/已經 yǐjīng already often occurs before an action has been marked as complete.
Indicating that an action did not occur in the past

To indicate that an action did not occur in the past, negate the verb with 没/沒 méi or 没有/沒有 méi yǒu. Do not use 不 bù as the marker of negation, and do not use 了 le after the verb when talking about an action that did not occur.

我寒假没回家。
我寒假沒回家。
Wǒ hánjià méi huí jiā.
I didn’t go home for winter break.

我昨天一天都没看见他。
我昨天一天都沒看見他。
Wǒ zuótiān yī tiān dōu méi kànjian tā.
I didn’t see him at all yesterday.

Talking about sequence with perfective 了 le

To indicate that two actions occur in sequence, follow the first action verb with 了 le.

他吃了饭就走。
他吃了飯就走。
Tā chī le fàn jiù zǒu.
He will eat and then leave. (After he eats, he will leave.)

As the translation of this sentence indicates, this sentence refers to a sequence that will take place in the future: 了 le indicates that 吃 chī ‘eat’ occurs before 走 zǒu ‘leave.’

To indicate that a sequence of events is complete, follow the second verb or the object of the second verb with 了 le.

他吃了饭就走了。
他吃了飯就走了。
Tā chī le fàn jiù zǒu le.
After he ate, he left.

学生做完了功课就交给老师了。
學生做完了功課就交給老師了。
Xuéshēng zuòwán le gōngkè jiù jiāo gěi lǎoshī le.
After the students finished their work they handed it to the teacher.

These sentences have two instances of 了 le. The one that follows the first verb indicates sequence. The one that follows the second verb or its object indicates that the sequence is complete, and by implication, past.

Indicating that an action did not occur in the past

To indicate that an action did not occur in the past, negate the verb with 没/沒 méi or 没有/沒有 méi yǒu. Do not use 不 bù as the marker of negation, and do not use 了 le after the verb when talking about an action that did not occur.

我寒假没回家。
我寒假沒回家。
Wǒ hánjià méi huí jiā.
I didn’t go home for winter break.

我昨天一天都没看见他。
我昨天一天都沒看見他。
Wǒ zuótiān yī tiān dōu méi kànjian tā.
I didn’t see him at all yesterday.

Talking about sequence with perfective 了 le

To indicate that two actions occur in sequence, follow the first action verb with 了 le.

他吃了饭就走。
他吃了飯就走。
Tā chī le fàn jiù zǒu.
He will eat and then leave. (After he eats, he will leave.)

As the translation of this sentence indicates, this sentence refers to a sequence that will take place in the future: 了 le indicates that 吃 chī ‘eat’ occurs before 走 zǒu ‘leave.’

To indicate that a sequence of events is complete, follow the second verb or the object of the second verb with 了 le.

他吃了饭就走了。
他吃了飯就走了。
Tā chī le fàn jiù zǒu le.
After he ate, he left.

学生做完了功课就交给老师了。
學生做完了功課就交給老師了。
Xuéshēng zuòwán le gōngkè jiù jiāo gěi lǎoshī le.
After the students finished their work they handed it to the teacher.

These sentences have two instances of 了 le. The one that follows the first verb indicates sequence. The one that follows the second verb or its object indicates that the sequence is complete, and by implication, past.
Asking whether an action has occurred

To ask whether an action has occurred, use a yes–no question:

Yes–no questions with 吗/嗎 ma

Q: 你买飞机票了吗?
     你買飛機票了嗎?
     Nǐ mǎi fēijī piào le ma?
     Did you buy the airplane ticket?

Verb-not-verb yes–no questions

verb 了 le (object) 没有/沒有 méi yǒu

Q: 你买了飞机票没有?
     你買了飛機票沒有?
     Nǐ mǎi le fēijī piào méi yǒu?
     Have you bought (the) airplane ticket yet?

Yes–no questions with 有没有/有沒有 yǒu méi yǒu (Taiwan usage)

有没有/有沒有 yǒu méi yǒu + [prepositional phrase +] verb phrase

Q: 你有没有买飞机票?
     你有沒有買飛機票?
     Nǐ yǒu méi yǒu mǎi fēijī piào?
     Have you bought the airplane ticket?

To answer ‘yes’ to 吗/嗎 ma or verb-not-verb yes–no questions, reply with V 了:

A: 买了。
    Mǎi le.
    [I] bought [it].

To answer ‘yes’ to 有没有/有沒有 yǒu méi yǒu questions, say:

A: 有。
    Yǒu.
    Yes.
Talking about past experience: verb suffix 过/過 guo

To answer ‘no’ to any form of these yes–no questions, say:

A: 没有。
   没有。
   Méi yǒu.
   No.

37.5 Indicating that an action occurred again in the past: 又 yòu verb 了 le

To indicate that an action occurred again in the past, precede the [prepositional phrase +] verb phrase with the adverb 又 yòu and follow the verb with 了 le.

他前天来了。今天早上又来了。
他前天來了。今天早上又來了。
Tā qiántiān lái le. Jīntiān zǎoshang yòu lái le.
He came the day before yesterday. This morning he came again.

Notice that the adverb 又 yòu (to do) again in the past’ is closely related to the adverb 再 zài ‘(to do) again in the future.’

我昨天晚上又吃饺子了。明天不要再吃了。
我昨天晚上又吃餃子了。明天不要再吃了。
Wǒ zuótiān wǎnshang yòu chī jiǎozi le. Míngtiān bù yào zài chī le.
I ate dumplings again last night. I don’t want to eat them again tomorrow.

NOTE 又 yòu ... 又 yòu ... means ‘both ... and ...’ and can be used to link stative verbs or adjectival verbs.

他们又饿又渴。
他們又餓又渴。
Tāmen yòu è yòu kě.
They are hungry and thirsty.

37.6 Talking about past experience: verb suffix 过/過 guo

To indicate that an action has been experienced at least once in the indefinite past, follow the verb with the verb suffix 过/過 guo.

我吃过中国饭。
我吃過中國飯。
Wǒ chīguo Zhōngguó fàn.
I’ve eaten Chinese food (before).

The verb suffix 过/過 guo is appropriate in the following circumstances:

• when talking about actions that the subject does not perform on a regular basis,
• when talking about actions that happened in the remote past,
when talking about actions that are repeatable. Actions that are not repeatable cannot be suffixed with 过/過 guo.

Do not say
*她大学毕业过。
她大學畢業過。
Tā dàxué biyè guò.
intended: She has graduated from university before.

The suffix 过/過 guo and perfective 了 le can sometimes occur together in the same sentence. When they do, 过/過 guo always occurs before 了 le.

今天的報我已经看过了。
今天的報我已經看過了。
Jīntiān de bào wǒ yǐjing kànguo le.
I’ve already read today’s paper.

长城我已经登过了。
长城我已經登過了。
Chángchéng wǒ yǐjing dēngguo le.
I have already climbed the Great Wall.

To indicate that an action has never been experienced before, precede the [prepositional phrase +] verb phrase with 没/沒 méi or 没有/沒有 méi yǒu and follow the verb with 过/過 guo as follows:

没/沒(有) méi (yǒu) + verb 过/過 guo

我没吃过中国饭。
我没吃过中國飯。
Wǒ méi chīguo Zhōngguó fàn.
I have never eaten Chinese food before.

他没坐过飞机。
他沒坐過飛機。
Tā méi zuòguo fēijī.
He has never ridden on a plane before.

When talking about events that have never been experienced before, the adverb 从来/從來 cónglái ‘in the past’ often occurs before the verb for additional emphasis:

我从来没吃过中国饭。
我從來沒吃過中國飯。
Wǒ cónglái méi chīguo Zhōngguó fàn.
I have never eaten Chinese food before.

NOTE 从来/從來 cónglái is only used in negative sentences.
Comparing the aspect markers 过/過 guo and 了 le

The aspect markers 过/過 guo and 了 le overlap in meaning, but they are not identical. As illustrated in Section 37.6, they may sometimes be used together. However, in many contexts, only 过/過 guo or 了 le is appropriate.

Here is a table that summarizes the meanings associated with 过/過 guo and 了 le, and illustrates their differences.

Focusing on a detail of a past event with 是...的 shì...de

To focus on a specific detail of an event, such as the time or place of the event, use 是...的 shì...de.

是 shì occurs right before the phrase that is being focused on.

的 de occurs right after the verb or at the end of the sentence.

是...的 shì...de is used to focus on:

• the time when an event occurred:

他是一年以前去中国的。
Tā shì yīnián yǐqián qù Zhōngguó de.
He went to China a year ago.

你的新车是什么时候买的?
Nǐ de xīn chē shì shénme shíhòu mǎi de?
When did you buy your new car?

• the one who performed the activity:

Mandarin has a number of ways to indicate that a situation represents a change from the past or that it is in the process of change. 38.1 and 38.3 present grammatical patterns that are used to talk about change. 38.4 presents words that are used to talk about change.

### Indicating that a situation represents a change

To indicate that a situation represents a change, add the particle 了 le to the end of the sentence that describes the situation. We refer to this use of 了 le as ‘sentence final 了 le.’ Here are the most common types of change associated with sentence final 了 le. Notice that in English this sense of change is sometimes expressed with the word ‘become’ (verb) or (verb) ‘now’ or ‘gotten’ (verb).

#### 38.1.1 New information for the addressee

他们订婚了！
They have become engaged!

他有女朋友了。
He has a girlfriend now. (He didn’t have one before.)

#### 38.1.2 Change of state

When the main verb of a sentence is a stative verb, sentence final 了 le indicates a change of state.

东西都贵了。
Things have become expensive.

他有女朋友了。
He has a girlfriend now. (He didn’t have one before.)
38.1.3 Actions that continue into the future: double 了 le sentences

Sentence final 了 le can be used with the perfective aspect suffix 了 le to signal that a certain portion of an action is complete but that the action is continuing into the future. Sentences like these are sometimes described as having ‘double 了 le,’ and the function of the sentence final 了 le is sometimes described as indicating the ‘present relevance’ of the situation.

他已经睡了十个钟头了。
他已經睡了十個鐘頭了。
Tā yǐjing shuì le shí gè zhōngtóu le.
He has already slept for ten hours.

38.1.4 Situations that do not exist anymore

To indicate that a situation does not exist anymore, add sentence final 了 le to the end of a negated sentence:

negated sentence + sentence final 了 le

她不吃肉了。
Tā bù chī ròu le.
She doesn’t eat meat anymore.

太阳出来了。不冷了。
太陽出來了。不冷了。
Tàiyáng chūlái le. Bù lěng le.
The sun has come out. (It) isn’t cold anymore.

38.1.5 Imminent occurrences and imminent change

Sentence final 了 le can be used to indicate that a situation will happen soon. Often, an adverb or adverbial phrase such as 快 kuài, 快要 kuài yào, or 就要 jiù yào occurs before the [prepositional phrase +] verb phrase to emphasize the fact that the situation will happen soon.

我们快到了。
Wǒmen kuài dào le.
We will be arriving soon.

我快要做完了。
Wǒ kuài yào zuòwán le.
I’m just about done.

38.2 Comparing sentences with and without sentence final 了 le

Notice how sentence final 了 le changes the meaning of the sentence. Without sentence final 了 le, the sentence is a description of a situation. With sentence final 了 le, the sentence focuses on a change.

No sentence final 了 le  
我会看中文报。
Wǒ huì kàn Zhōngwén bào.
I can read Chinese newspapers.

Sentence final 了 le  
我会看中文报了。
Wǒ huì kàn Zhōngwén báo le.
I can read Chinese newspapers now.
### Indicating change over time

#### More and more of some situation

<table>
<thead>
<tr>
<th>More and more</th>
<th>Sentence final 了 le</th>
</tr>
</thead>
<tbody>
<tr>
<td>东西越来越贵了。</td>
<td>汽油很贵了。</td>
</tr>
<tr>
<td>东西越来越贵了。</td>
<td>汽油很贵了。</td>
</tr>
<tr>
<td>Dōngxi yuè lái yuè guì le.</td>
<td>Qiyóu hěn guì le.</td>
</tr>
<tr>
<td>Things are getting more and more expensive.</td>
<td>Gasoline has become very expensive.</td>
</tr>
<tr>
<td>天气越来越冷了。</td>
<td>我不喜欢吃肉了。</td>
</tr>
<tr>
<td>天气越来越冷了。</td>
<td>我不喜欢吃肉了。</td>
</tr>
<tr>
<td>Tiānqì yuè lái yuè lěng le.</td>
<td>Wǒ bù xǐhuan chī ròu le.</td>
</tr>
<tr>
<td>The weather is getting colder and colder.</td>
<td>I don’t like to eat meat anymore.</td>
</tr>
</tbody>
</table>

This pattern is used to indicate that something is becoming *more and more* adjectival verb (AV), stative verb (SV), or modal verb (MV) over time.

Sentence final 了 le can optionally occur with this pattern to emphasize the sense of change that the pattern conveys.

#### ‘more and more’ adjectival verb

| 东西越来越贵了。 | 汽油很贵了。 |
| Dōngxi yuè lái yuè guì le. | Qiyóu hěn guì le. |

Talking about duration and frequency

When we talk about duration, we can specify the length of an action (‘we walked for an hour’), or we can focus on the ongoing duration of the action without reference to its length (‘while we were walking, it started to rain’). When we talk about frequency, we indicate how often an action occurs. This chapter will show you how to express both duration and frequency in Mandarin.

39.1 Specifying the length of an action with a duration phrase

Duration phrases can be used to indicate how long an action occurs. To indicate the duration of an action, follow the verb with a time phrase:

subject + verb + duration

Only open-ended actions have duration. Open-ended actions include 买/買 mǎi ‘to shop,’ 学/學 xué ‘to study,’ 看 kàn ‘to look at,’ ‘to watch,’ ‘to read,’ 吃 chī ‘to eat,’ 睡 shuì ‘to sleep,’ 唱 chàng ‘to sing,’ 洗 xǐ ‘to wash,’ etc.

39.1.1 Indicating duration when there is no object noun phrase

When the action verb does not have an object noun phrase, the duration phrase simply follows the verb. If the verb is suffixed with 了 le, the duration phrase follows 了 le.

我想在中国住一年。
Wǒ xiǎng zài Zhōngguó zhù yīnián.
I plan to live in China for a year.

他病了三天。
Tā bìng le sāntiān.
He was sick for three days.

39.1.2 Indicating duration when the verb takes an object

When the verb takes an object noun phrase, duration may be indicated using the following sentence patterns. In all of these patterns, the verb is followed by its object or by a duration phrase. A single verb is never followed directly by both an object and a duration phrase, with one exception. If the object is a pronoun, the pronoun may occur after the verb and before the duration phrase.
I’ve been waiting for him for three hours.

Pattern 1: verb + object verb + duration

The verb occurs twice in the verb phrase. First it is followed by the object, then it is followed by the duration phrase.

Say this Not this

我每天晚上看书看四个小时。 *我每天晚上看书四个小时。

我每天晚上看書看四個小時。

Every night I read (books) for four hours.

If the sentence refers to a past event, the second occurrence of the verb is followed by 了 le.

我睡觉睡了八个钟头。

我睡覺睡了八個鐘頭。

I slept for eight hours.

Pattern 2: verb + object 有 yǒu + duration

The verb and its object are stated first, followed by 有 yǒu and the duration phrase. 有 yǒu is not directly followed by 了 le, though 了 le may occur at the end of the sentence.

我等王明有三个小时了。

Wǒ děng Wáng Míng yǒu sān gè xiǎoshí le.

I have been waiting for Wang Ming for three hours.

Pattern 3: verb + duration 的 de object noun phrase

The duration phrase plus 的 de occurs immediately before the object noun phrase. This pattern cannot be used when the object noun phrase is a pronoun.

我学了两年的中文。

Wǒ xué le liǎng nián de Zhōngwén.

I studied Chinese for two years.

的 de is sometimes omitted.

那个学生已经学了两年(的)中文了。

Nàge xuésheng yǐjīng xué le liǎng nián (de) Zhōngwén le.

That student has been studying Chinese for two years already.
Pattern 4: object noun phrase, verb + duration

The object noun phrase may occur at the beginning of the sentence, before the subject, as a topic. The verb is then directly followed by the duration phrase. This pattern cannot be used when the object noun phrase is a pronoun or a default object.

这个，我已经想了很多了。
Zhè ge wèntí, wǒ yǐjǐng xiǎng le hěn jiǔ le.
This problem, I have already thought about (it) for a long time.

中文，我已经学了四年了。
Zhōng wén, wǒ yǐjǐng xué le sì nián le.
Chinese, I’ve already studied (it) for four years.

中文，我至少会学两年。
Zhōngwén, wǒ zhìshǎo huì xué liǎng nián.
Chinese, at the very least I will study (it) for two years.

Duration vs. time when

Note the difference between phrases that indicate duration and those that indicate time when.

Time phrases that indicate the duration of a situation always occur after the verb.

我学了两个小时了。
Wǒ xué le liǎng gè xiǎoshí le.
I studied for two hours.

Time phrases that indicate the time when a situation takes place always occur before the verb:

我昨天学了中文。
Wǒ zuó tiān xué le Zhōng wén.
I studied Chinese yesterday.

A sentence may include both a time when phrase and a duration phrase.

我昨天学了两个小时。
Wǒ zuó tiān xué le liǎng gè xiǎoshí.
Yesterday I studied for two hours.

Indicating how long it has been that something has not occurred

In Mandarin, only situations that occur can be described in terms of their duration. If a situation does not occur, the duration pattern cannot be used to describe it. To indicate the length of time that something has not occurred, put the time phrase before the [prepositional phrase +] verb or verb phrase.

我两天没睡觉。
Wǒ liǎng tiān méi shuì jiào.
I haven’t slept for two days.
Emphasizing ongoing duration

39.2 Emphasizing the ongoing duration of an action

To emphasize the ongoing duration of an action without specifying the length of the duration, follow the verb with the suffix 着/著 zhe. To indicate that an action is ongoing at the moment of speaking, 在 zài or 正在 zhèngzài may also precede the verb. 呢 ne may occur at the end of the sentence.

他在说着话呢。
他在說著話呢。
Tā zài shuōzhé huà ne.
He is speaking.

她正在吃着早饭呢。
她正在吃著早飯呢。
Tā zhèngzài chīzhé zǎofàn ne.
She is eating breakfast right now.

在 zài before the verb may also mark duration without the verb suffix 着/著 zhe.

他在说话呢。
他在說話呢。
Tā zài shuō huà ne.
He is speaking.

我们在吃饭呢。
我們在吃飯呢。
Wǒmen zài chī fàn ne.
We are eating right now. (We are right in the middle of eating.)

The duration suffix 着/著 zhe is often used with verbs that refer to the placement or location of an object.

街上站着很多人。
街上站著很多人。
Jiēshàng zhànzhe hěn duō rén.
There are a lot of people standing in the street.

公共汽车上坐着很多人。
公共汽車上坐著很多人。
Gōnggōng qìchē shàng zuòzhe hěn duō rén.
There are a lot of people sitting on the bus.

This use of 着/著 zhe is similar to the use of the present progressive verb suffix ‘-ing’ in English in its focus on ongoing actions. However, 着/著 zhe and ‘-ing’ are not always equivalent. For example, 着/著 zhe can be used in Mandarin to emphasize the duration of an adjectival verb. The English equivalent does not typically use ‘-ing.’
Indicating the ongoing duration of a background event

The face is red. (Not ‘Her face is being red.’)

The soup is hot. (Not ‘The soup is being hot.’)

In Mandarin, 着/著 zhe may also be suffixed to certain verbs in commands. The English equivalent does not ordinarily involve ‘-ing.’

- Názhe! Hold it!/Take it!
- Jízhe! Remember!
- Děngzhe! Wait!
- Zuòzhe! Sit!

Emphasizing the ongoing duration of a situation or state

To emphasize the ongoing duration of a situation or state, use the adverb 还/還 hái before the [prepositional phrase +] verb or verb phrase. In affirmative sentences and questions, this use of 还/還 hái can often be translated into English with the word ‘still.’

He is still in China.

Do you still like him?

In negative sentences, this use of 还/還 hái can often be translated into English with the phrase ‘not yet.’

He has not yet married. (He still hasn’t married.)

I have not yet seen that movie. (I still haven’t seen that movie.)

Indicating the ongoing duration of a background event

When two events occur at the same time, we sometimes consider one event to be the main event and the other to be the background event. To signal that a background event is ongoing as the main event occurs, follow the verb of the background event with the verb suffix 着/著 zhe.
**TALKING ABOUT DURATION AND FREQUENCY**

**Indicating frequency**

**Words used to indicate frequency**

The classifiers 次 cì ‘number of times’ and 遍 biàn ‘a time’ are used to indicate frequency. They are always preceded by a number or the question words 几/幾 jǐ or 多少 duōshǎo ‘how many.’ 次 cì can be used to refer to the frequency of any kind of action. 遍 biàn is more restricted in its use and refers only to actions that have been performed from beginning to end.

**The grammar of the frequency expression**

To indicate the frequency of an action, follow the action verb with number + 次 cì or 遍 biàn ‘times’ to indicate the ‘number of times’ that the action occurs. If the verb is suffixed with 了 le or 过/過 guo, the frequency phrase occurs after the verb suffix.

我已經说了三次, 你怎么还不懂?
Wǒ yǐjing shuō le sān cì, nǐ zěnme hái bù dǒng?
I’ve already said it three times, how can you still not understand? (遍 biàn can be used instead of 次 cì in this sentence.)

A verb may be followed by both a frequency expression and an object. The frequency expression always precedes the object.

There are several ways to indicate frequency.

**Pattern 1: verb + object, verb + frequency**

If the verb takes an object, the verb may be repeated, once followed by the object, and once followed by the frequency expression.

我去年坐飞机坐了三次。(遍 biàn cannot be used here.)
Wǒ qùnián zuò fēijī zuò le sān cì.
Last year I rode airplanes three times.
Pattern 2: verb + frequency + object noun phrase

The frequency expression can occur between the verb and its object.

- 她坐过一次飞机。(遍 biàn cannot be used here.)
  她坐過一次飛機。
  She’s ridden on a plane once.

- 我给他打了两次电话。(遍 biàn cannot be used here.)
  我給他打了兩次電話。
  I called him on the phone twice.

Pattern 3: object noun phrase, verb + frequency

If the verb takes an object, the object may be topicalized and presented first in the sentence:

- 那个电影, 我看过两次。(遍 biàn can be used here.)
  那個電影, 我看過兩次。
  That movie, I have seen it twice.

- 西安, 我去过一次。(遍 biàn can be used here)
  西安, 我去過一次。
  Xi’an, I’ve been there once.

Expressing contrast

41.1

Expressing contrast with paired connecting words

Mandarin uses the following paired connecting words to express contrast.

- 虽然...可是  or  虽然...但是  or  虽然...不过
- 雖然...可是  or  雖然...但是  or  雖然...不過

suīrán...kěshì  suīrán...dànshì  suīrán...bùguò

although...but  although...but  although...however

可是 kěshì and 但是 dànshì are identical in meaning and are interchangeable. 不过 bùguò conveys a slightly stronger sense of contrariness to expectation.

The Chinese connecting words occur at the beginning of their clauses or right before the predicate. Both members of the pair can occur in the same sentence. Although English permits only a single contrast connector in a sentence, in order to best illustrate the usage of the Mandarin words, the English translations in this section translate each connector in the Mandarin sentences.

虽然他是中国人，可是他还喜欢吃日本菜。
Although he is Chinese, but he still likes to eat Japanese food.

虽然他是中国人, 但是他没去过北京。
Although he is Chinese, but he hasn’t been to Beijing.

虽然他很有钱, 可是我还不愿意嫁给他。
Although he has a lot of money, but I’m still not willing to marry him.

41.1.1

The placement of connecting words

If the subjects of the two clauses are identical in reference and the second one is not omitted, 虽然 suīrán typically occurs before the subject.

虽然我哥哥已经三十岁了，但是他还没结婚。
Although my older brother is already 30 years old, but he still hasn’t married.

When subjects of the two clauses in contrast sentences are identical in reference, the second one is sometimes omitted. When this is the case, the connecting word 虽然 suīrán typically occurs after the subject of the first clause.
Adverbs that indicate contrast

41.1.2 Relative order of the clauses in contrast sentences

The position of the clauses is fixed. The 虽然/雖然 suīrán clause comes first. The 可是 kěshì, 但是 dànshì, or 不过/不過 bùguò clause comes second.

*Say this*  
虽然是他认识很多人，可是他没有很好的朋友。
Suīrán tā rènshi hěn duō rén, kěshì tā méi yǒu hěn hǎo de péngyou.
Although he knows a lot of people, he doesn’t have any very good friends.

*Not this*  
虽然他很小不过他胆子很大。
Suīrán tā hěn xiǎo bùguò tā dǎnzi hěn dà.
Although he is little, he is very brave (his courage is big).

41.1.3 Omission of the connecting words

虽然/雖然 suīrán can be freely omitted:

虽然他很有钱，可是我还是不愿意嫁给他。
Suīrán tā hěn yǒu qián, kěshì wǒ hái bù yuàn yì jiàgěi tā.
Although he has a lot of money, I’m still not willing to marry him.

可是 kěshì, 但是 dànshì, or 不过 bùguò can be omitted when the second clause contains the adverb 还/還 hái or an adverb that indicates contrast. Adverbs that indicate contrast are presented in 41.2.

41.2 Adverbs that indicate contrast

41.2.1 Adverbs that must occur before the [prepositional phrase +] verb or verb phrase

却 què ‘in contrast’

却 què may occur with other contrast connectors.

虽然他很有钱，可是我不愿意嫁给他。
Suīrán tā hěn yǒu qián, kěshì wǒ què bù yuàn yì jiàgěi tā.
Although he is rich, I am not willing to marry him.

**EXPRESSING CONTRAST**

他很有钱，我却不愿意嫁给他。

He is rich, but I am still not willing to marry him.

倒是 dǎoshì ‘contrary to one’s expectations’
房孑不大，布置得倒是很讲究。
Fángzi bù dà, bùzhì de dǎoshì hěn jiǎngjiū.
The house isn’t big, but it is fixed up really nicely.

### 41.2.2 Contrast adverbs that can occur at the beginning of a sentence or before a verb or verb phrase

不过/不過 bùguò ‘however, nevertheless’
中国字很难写，不过语法比较简单。
Zhōngguó zì hěn nán xiě, bùguò yǔfǎ bǐjiào jiǎndān.
Chinese characters are very difficult to write, but the grammar is relatively easy.

吃四川菜可以，不过不能太辣。
Chī Sìchuān cài kěyǐ, bùguò bù néng tài là.
It is okay (with me) to eat Sichuan food, but it can’t be too hot.

然而 rán’ér ‘however, nevertheless’
他虽然没考上大学，然而他并不灰心。
Tā suīrán méi kǎoshàng dàxué, rán’ér tā bìng bù huīxīn.
Although he didn’t pass the college entrance exam, he did not lose heart.

他小的时候体弱多病，然而长大后却非常强壮。
Tā xiǎo de shíhòu tǐruò duō bìng, rán’ér zhǎng dà hòu què fēicháng qiáng zhuàng.
When he was young he was weak and sickly, but after he grew up he was extremely strong.

反而 fǎn’ér ‘on the contrary, in contrast’
难的字他都记住了，容易的反而忘了。
Nán de zì tā dōu jìzhù le, róngyì de fǎn’ér wàng le.
He remembers all of the difficult characters; the easy characters he forgets.

你不但不帮我忙，反而批评我。
Nǐ búdàn bù bāng wǒ máng, fǎn’ér pīpíng wǒ.
Not only don’t you help me, but on the contrary you criticize me.

反过来/反过来 fǎnguólái ‘conversely’
有的人认为学数学快的人学语言学也快，反过来也一样。
Yǒu de rén rènwéi xué shùxué kuài de rén xué yǔyánxué yě kuài, fǎnguólái yě yǐyàng.
Some people think that people who learn math quickly also learn linguistics quickly. The converse is also true. (The converse is the same.)
Qualifying a statement with an adjectival verb or stative verb

To qualify a statement involving an adjectival verb or stative verb, use this pattern:

AV/SV 是 shì AV/SV, 可是 kěshì...
但是 dànshì
不过/不過 bùguò
就是 jiù shì

‘AV/SV all right, but...’

那个电影好是好, 就是太长。(AV)
Nàge diànyǐng hǎo shì hǎo, jiù shì tài cháng.
That movie is good all right, but it is too long.

那双鞋子贵是贵, 可是我还想买。(AV)
Nà shuāng xiézi guì shì guì, kěshì wǒ hái xiǎng mǎi.
That pair of shoes is expensive all right, but I still want to buy them.

我喜欢是喜欢他, 就是他有一点太无聊。(SV)
Wǒ xǐhuan shì xǐhuan tā, jiù shì tā yǒu yīdiǎn tài wúliáo.
I like him all right, he’s just a little boring.
Expressing sequence

42

Expressing the relationship ‘before’

The structure of the 以前 yǐqián ‘before’ sentence

以前 yǐqián is used to indicate the relationship ‘before one event occurs, another event occurs.’

event₁ 以前 yǐqián, event₂
before event₁, event₂

我上大学以前，想去澳大利亚旅游。
我上大學以前，想去澳洲利亞旅遊。
Wǒ shàng dàxué yǐqián, xiǎng qù Aòdàliyà lǚyóu.
Before I attend university, I want to go to Australia to travel.

妈妈上班以前，都吃早饭。
媽媽上班以前，都吃早飯。
Māma shàng bān yǐqián, dōu chī zǎofàn.
Before Mom goes to work, she always eats breakfast.

To indicate that a sequence occurred in the past, follow the verb of the second clause with perfective 了 le.

我来中国以前，在日本住了一年。
我來中國以前，在日本住了一年。
Wǒ lái Zhōngguó yǐqián, zài Rìběn zhù le yīnián.
Before I came to China, I lived in Japan for a year.

The more literary form of 以前 yǐqián is 之前 zhǐqián.

42.1.2 Comparing 以前 yǐqián with ‘before’

以前 yǐqián signals the same relationship of sequence as the English word ‘before.’ However, there are important differences between 以前 yǐqián and ‘before.’

• 以前 yǐqián occurs at the end of the first clause:

妈妈上班以前
妈妈上班以前
Māma shàng bān yǐqián

‘Before’ occurs at the beginning of the first clause:

before Mom goes to work
• In Mandarin, the clause that ends with 以前 yǐqián must come first in the sentence. In English, the order of the clauses in the ‘before’ sentence is not fixed. Either can come first in the sentence. Compare the following sentences.

<table>
<thead>
<tr>
<th>Good English</th>
<th>Good Mandarin</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before Mom went to work she ate breakfast.</td>
<td>妈妈上班以前吃了早饭。</td>

</tr>
<tr>
<td></td>
<td>*妈妈吃了早饭上班以前。</td>
</tr>
<tr>
<td></td>
<td>*媽媽吃了早飯上班以前。</td>

</tbody>
</table>

42.2 Expressing the relationship ‘after’ in a single sentence

In Mandarin, the relationship of ‘after’ is expressed using some combination of the word 以后/以後 yǐhòu ‘after,’ perfective 了 le, and adverbs, usually 就 jiù or 才 cái.

These markers of sequence can occur together in a single sentence to express the relationship of sequence, or they can occur independently.

Native speakers of Mandarin differ in their preference for the use of these markers of sequence.

42.2.1 Indicating sequence with 以后/以後 yǐhòu ‘after’

以后/以後 yǐhòu ‘after’ is used to express the following relationship: ‘after an event occurs, another event occurs.’

<table>
<thead>
<tr>
<th>event₁, 以后/以後 yǐhòu, event₂ after event₁, event₂</th>
</tr>
</thead>
<tbody>
<tr>
<td>我们吃了饭以后，就去看电影。</td>

To signal that a sequence occurred in the past, follow the verb of the second clause with 了 le, using the guidelines for the placement of perfective 了 le presented in Chapter 17.
If the verb takes a one-syllable object, 了 le may also follow the object.

他吃了饭以后就看电视了。
他吃了飯以後就看電視了。

他吃了晚饭以后就喝了一杯茶。
他吃了晚飯以後就喝了一杯茶。

After he ate, he watched television.
After he ate dinner, he drank a cup of tea.

以后/以後 yǐhòu signals the same relationship of sequence as the English word ‘after.’ However, there are important differences between 以后/以後 yǐhòu and ‘after.’

• 以后/以後 yǐhòu occurs at the end of the first clause:

我下了课以后
我下了課以後

‘After’ occurs at the beginning of the clause:

after I get out of class

• In Mandarin, the clause that ends with 以后/以後 yǐhòu must come first in the sentence. In English, the order of the clauses in the ‘after’ sentence is not fixed. Either can come first in the sentence. Compare the following sentences.

Good English

After I get out of class, I go home.

我下了课以后回家。

Good Mandarin

After I get out of class

Wǒ xià le kè yǐhòu huí jiā.

Good English

I go home after I get out of class.

*我回家下了课以后。

Bad Mandarin

I go home after I get out of class.

Wǒ huí jiā xià le kè yǐhòu.

The more literary form of 以后/以後 yǐhòu is 之后/之後 zhīhòu.

Adverbs that occur in sequence sentences

就 jiù

The adverb 就 jiù has several functions. One function is to signal a relationship of sequence between events that occur in a series. The relationship of sequence indicated by 就 jiù reinforces the meaning of sequence indicated by 以后/以後 yǐhòu. Therefore, 就 jiù often occurs with 以后/以後 yǐhòu in sequence sentences.

我学了中国历史以后就想去中国。
我學了中國歷史以後就想去中國。

Wǒ xué le Zhōngguó lìshǐ yǐhòu jiù xiǎng qù Zhōngguó.

After I studied Chinese history, I wanted to go to China.

The meaning of 就 jiù is related to the meaning of 以后/以後 yǐhòu, but the two words are independent. 就 jiù may occur without 以后/以後 yǐhòu, and 以后/以後 yǐhòu may occur without 就 jiù.
The following two sentences, one with 就 jiù and the other with 以后/以後 yǐhòu, are equivalent in meaning. Compare them to the sentence above in which 就 jiù and 以后/以後 yǐhòu both occur.

我学了中国历史就想去中国。
I studied Chinese history I wanted to go to China.

Wǒ xué le Zhōngguó lìshí jiù xiǎng qù Zhōngguó.

After I studied Chinese history I wanted to go to China.

我学了中国历史以后想去中国。
I studied Chinese history I wanted to go to China.

Wǒ xué le Zhōngguó lìshí yǐhòu xiǎng qù Zhōngguó.

After I studied Chinese history I wanted to go to China.

42.2.4

Indicating that one event happens ‘only after’ another event: sequence with the adverb 才 cái

To indicate that some event happens ‘only after’ another event, use the adverb 才 cái before the second verb of a sequence. 才 cái can occur with 以后/以後 yǐhòu and 了 le. 才 cái and 就 jiù cannot both occur before the same verb.

她在中国住了两年才会说中国话。
She lived in China for two years and only then was able to speak Chinese.

Tā zài Zhōngguó zhù le liǎng nián cái huì shuō Zhōngguó huà.

(After she lived in China for two years, only then was she able to speak Chinese.)

你长大了以后才懂这种事情。
After you grow up, only then will you understand this kind of situation.

Nǐ zhǎng dà le yǐhòu cái dǒng zhè zhǒng shìqing.

(He grew up and only then understood this kind of situation.)

Pay attention to the difference between the adverbs 才 cái and 就 jiù in the following sentences. Since 就 jiù indicates simple sequence, it is used much more frequently than 才 cái. For many speakers of Mandarin, a verb phrase with 才 cái cannot include 了 le.

42.2.6

就 jiù

他吃了药就好了。
After he ate the medicine, he recovered.

Tā chī le yào jiù hǎo le.

他吃了药就好了。
He ate the medicine and only then recovered.

Tā chī le yào jiù hǎo le.

他吃了药就好了。
He ate the medicine and only then recovered.

才 cái

他吃了药才好(了)。
He ate the medicine and only then recovered.

Tā chī le yào cái hǎo (le).

才 cái

(He ate the medicine and only then recovered.)

他开了空调就舒服了。
After he turned on the air conditioner, he was comfortable.

Tā kāi le kōngtiáo jiù shūfu le.

他开了空调就舒服了。
He turned on the air conditioner and only then was comfortable.

Tā kāi le kōngtiáo jiù shūfu le.

他开了空调才舒服。
He turned on the air conditioner and only then was comfortable.

Tā kāi le kōngtiáo cái shūfu.
**Expressing Sequence**

42.2.3 便 biàn

便 biàn, like 就 jiù, is used to reinforce a relationship of sequence between two events.

```
Měitiān yī xià kè tā biàn dào tǔshūguǎn qù gōngzuò.
```

Every day, as soon as he gets out of class he goes to the library to work.

便 biàn is largely restricted to formal, literary contexts.

```
Zhìrén bièyì, wǒmen biàn méi yǒu láiwǎng.
```

Since we’ve graduated, we haven’t had any contact.

42.2.3 Indicating sequence with perfective 了 le

Like the adverbs 就 jiù, 才 cái, and 便 biàn, the verb suffix 了 le can be used to signal a relationship of sequence between two events. 了 le is optional, but when it occurs, it normally follows the first verb in a series of verb phrases. Notice that 就 jiù or 才 cái often occurs with 了 le and 以后/以後 yǐhòu in sequence sentences that indicate the relationship ‘after.’

```
Tā mǎi le zhàoxiàngjī yǐhòu jiù zhào le hěn duō zhàopiàn.
```

After she bought a camera, she took a lot of pictures.

```
Wǒ zuòwán le gōngkè yǐhòu cái shuì jiào.
```

Only after I finish my homework will I go to sleep.

(I will finish my homework and only then go to sleep.)

Follow the guidelines for the placement of perfective 了 le presented in Chapter 17.

42.2.4 Indicating ‘after’ in a single sentence: a summary of the use of 以后/以後 yǐhòu, 了 le, and sequence adverbs

• 以后/以後 yǐhòu, 了 le, and sequence adverbs all signal a sequence of events within a single sentence.
• Sequence sentences can contain any combination of 以后/以後 yǐhòu, 了 le, and sequence adverbs.
• None of these markers of sequence is obligatory, and native speakers of Mandarin differ in their preferences in using them.
• Events that are related in terms of sequence need not have any of these sequence markers.

```
Wǒ měitiān xià kè huí jiā.
```

Every day, after I get out of class I return home.

(Every day I get out of class and return home.)
42.3 Indicating that one event happens first and another event happens afterwards

The following pairs of adverbs are used to indicate that one event happens first and another event happens afterwards. The adverbs always occur before [prepositional phrases +] verb phrases. The order of the adverbs and their following verb phrases is fixed. They are often used when giving instructions and describing processes.

42.3.1 Indicating the relationship ‘first . . . then . . .’

The following pairs of adverbs are commonly used to indicate the relationship ‘first . . . then . . .’

先 xiān VP1 再 zài VP2
first VP1 then VP2

你先买票，再上公共汽车。
你先買票，再上公共汽車。
Nǐ xiān mǎi piào, zài shàng gōnggōng qì chē.
You first buy a ticket, then get on the bus.

先 xiān VP1 然后/然後 ránhòu VP2
first VP1 then/afterwards VP2

我们得先去换钱，然后去买东西。
我們得先去換錢，然後去買東西。
Wǒmen děi xiān qù huàn qián, ránhòu qù mǎi dōngxi.
We have to first change money and then go shopping.

先 xiān VP1 以后/以後 yǐhòu VP2
first VP1 then/afterwards VP2

我们先吃饭，以后讨论那件事情。
我們先吃飯，以後討論那件事情。
Wǒmen xiān chī fàn, yǐhòu tǎolùn nà jiàn shìqing.
We will eat first and discuss this matter afterwards.

42.3.2 Indicating the relationship ‘first . . . only then . . .’

To indicate that some event occurs ‘only after’ another event, say:

先 xiān VP1 才 cái VP2
first VP1 only then VP2

你先买票，才上公共汽车。
你先買票，才上公共汽車。
Nǐ xiān mǎi piào, cái shàng gōnggōng qì chē.
You first buy a ticket and only then get on the bus.
**Expressing Sequence**

### 42.3.3 Indicating the relationship ‘as soon as . . . then . . .’

To indicate that some event occurs ‘as soon as’ another event occurs, say:

\[
- yī \text{ } \text{VP}_1 \text{ 就 } \text{ } \text{jiù } \text{ } \text{VP}_2
\]

as soon as \( \text{VP}_1 \) then \( \text{VP}_2 \)

- 我们一到北京，就去爬长城。
- 我們一到北京，就去爬長城。
- Wǒmen yī dào Běijīng, jiù qù pá chángchéng.
- As soon as we get to Beijing we will go climb the Great Wall.

When \( - yī \) occurs immediately before a [prepositional phrase +] verb or verb phrase, it always means ‘as soon as.’ When \( - yī \) occurs immediately before a classifier, it is always the number ‘one.’

### 42.4 Indicating ‘afterwards’ in a separate sentence

Mandarin has a number of sentence adverbs, adverbs that occur at the beginning of a sentence, to introduce an event that happens afterwards. The most common are 以后/以後 yǐhòu, 然后/然後 ránhòu, and 后来/後來 hòulái.

- 以后/以後 yǐhòu ‘afterwards, later’
  - 请先喝点茶吧！以后我们出去吃晚饭。
  - 請先喝點茶吧！以後我們出去吃晚餐。
  - Qǐng xiān hē diǎn chá ba! Yǐhòu wǒmen chūchù chī wǎnfàn.
  - Drink a little tea first. Afterwards we will go out to eat dinner.

- 然后/然後 ránhòu ‘afterwards/after that’
  - 我们看了电影。然后我们去了咖啡店喝咖啡。
  - 我們看了電影。然後我們去了咖啡店喝咖啡。
  - Wǒmen kàn le diànyǐng. Ránhòu wǒmen qù le kāfēi diàn hē kāfēi.
  - We saw a movie. Afterwards, we went to a coffee shop and drank coffee.

- 后来/後來 hòulái ‘afterwards’
  - 我昨天早上考了中文。后来我回宿舍睡觉了。
  - 我昨天早上考了中文。後來我回宿舍睡覺了。
  - Wǒ zuótiān zǎoshang kǎo le Zhōngwén. Hòulái wǒ huí sùshè shuì jiào le.
  - Yesterday morning I had a Chinese test. Afterwards I went back to the dormitory and went to sleep.

### 42.5 Comparing 以前 yǐqián ‘before’ with 以后/以後 yǐhòu ‘after’

In some ways, the uses of 以前 yǐqián ‘before’ and 以后/以後 yǐhòu ‘after’ are parallel. Both must occur in the first clause of a sequence sentence, and both words occur at the end of their clause.

However, the words are different in their occurrence with perfective 了 le. The perfective 了 le may occur in the 以后/以後 yǐhòu clause but it may not occur in the 以前 yǐqián clause. Compare these sentences.
Comparing 以前 yǐqián ‘before’ with 以后 yǐhòu ‘after’

Say this

我去中国以前学了两年的中文。
Wǒ qù Zhōngguó yǐqián xué le liǎng nián de Zhōngwén.
Before I went to China I studied two years of Chinese.

他考试以前复习功课了。
Tā kǎo shì yǐqián fùxí gōngkè le.
Before he took the test he reviewed the lessons.

Not this

*我去了中国以前学了两年的中文。
Wǒ qù le Zhōngguó yǐqián xué le liǎng nián de Zhōngwén.

*他考试了以前复习了功课。
Tā kǎo shì le yǐqián fùxí le gōngkè.

For many Mandarin speakers, the sequence use of 就 jiù is also not acceptable in 以前 yǐqián sentences. For these speakers, if 就 jiù occurs in an 以前 yǐqián sentence, it has the sense of ‘only,’ and not of sequence.

我去中国以前学了两年的中文。
Wǒ qù Zhōngguó yǐqián jiù xué le liǎng nián de Zhōngwén.
Before I went to China I only studied two years of Chinese.
Expressing simultaneous situations

43.1 Indicating that one situation is the background for another situation

To indicate that one situation is the background for another situation, say:

\[ S_1 \text{ 的时候 } S_2/S_1 \text{ 的时候 } S_2 \]
\[ S_1 \text{ de shíhou } S_2 \]
while/when \( S_1, S_2 \)

\( S_1 \) and \( S_2 \) can be actions or states.

\( S_1 \) and \( S_2 \) are states

我小的时候，生活很苦。
我少的时候，生活很苦。
\[ Wǒ xiǎo de shíhou, shēnghuó hěn kǔ. \]
When I was young, life was very hard (bitter).

\( S_1 \) and \( S_2 \) are actions

我看书的时候，常听音乐。
我看書的時候，常聽音樂。
\[ Wǒ kàn shū de shíhou, cháng tīng yīnyuè. \]
When I read, I often listen to music.

的时候/的时候 de shíhou can be used when one situation overlaps with the start of another one.

你来的时候，我们正在上课。
你來的時候，我們正在上課。
\[ Nǐ lái de shíhou, wǒmen zhèngzài shàng kè. \]
When you arrived, we were in class.

However, 的时候/的時候 de shíhou cannot be used when the relationship between \( S_1 \) and \( S_2 \) is that of sequence. When \( S_1 \) and \( S_2 \) are related in terms of sequence, use 以后/以後 yǐhòu.

42.2

The events in the following sentence are related in terms of sequence. Therefore, they should be connected by 以后/以後 yǐhòu ‘after’ and not 的时候/的時候 de shíhou ‘when.’ Notice that in English, ‘when’ can be used with sequential situations or with simultaneous situations.

\begin{align*}
\text{Say this} & \quad \text{Not this} \\
你吃(完)了晚饭以后请给我打电话。 & *\text{你吃完了晚饭的时候请给我打电话。} \\
你吃(完)了晚饭以後請給我打電話。 & \text{你吃完了晚飯的時候請給我打電話。} \\
Nǐ chī(wán) le wǎnfàn yǐhòu qǐng gěi wǒ dǎ diànhuà. & Nǐ chīwán le wán fàn de shíhou qǐng gěi wǒ dǎ diànhuà. \\
\end{align*}

After (when) you finish dinner, please call me.
Describing a subject in terms of two qualities that exist at the same time

43.2 Indicating that two actions occur at the same time

43.2.1 Focusing on each action separately

(subject) 一边/邊 VP₁ 一边/邊 VP₂
(subject) yībiān VP₁ yībiān VP₂
subject does both VP₁ and VP₂ at the same time

一边/邊 yībiān must occur before each verb phrase:

我儿子一边听音乐，一边作功课。
我兒子一邊聽音樂，一邊作功課。
Wǒ érzi yìbiān tīng yīnyuè, yìbiān zuò gōngkè.
My son listens to music and does homework at the same time.

43.2.2 Focusing on the shared time

(subject) 同时/同時 VP₁ VP₂
(subject) tóngshí VP₁ VP₂
subject simultaneously does VP₁ and VP₂

同时/同時 tóngshí occurs before the list of actions that occur at the same time:

你为什么同时听音乐作功课？
你為甚麼同時聽音樂作功課？
Nǐ wèi shénme tóngshí tīng yīnyuè zuò gōngkè?
Why do you listen to music and do your homework at the same time?

43.3 Indicating that two actions occur in the same time frame

To indicate that two actions occur in the same time frame, though not necessarily at the same time, say:

又 action VP₁ 又 action VP₂
yòu VP₁ yòu VP₂
(subject) does both VP₁ and VP₂

他特别忙，又念书，又做事。
Tā tèbié máng, yòu niàn shū, yòu zuò shì.
He is really busy. He both studies and has a job.

43.4 Describing a subject in terms of two qualities that exist at the same time

(subject) 又 AV/SV₁ 又 AV/SV₂
(subject) yòu AV/SV₁ yòu AV/SV₂
(subject) is both AV/SV₁ and AV/SV₂

那个男的又高又大。
那個男的又高又大。
Nàge nán de yòu gāo yòu dà.
That guy is both tall and big.
43.6 Presenting simultaneous situations

To present two parallel circumstances that exist at the same time and describe the same situation, say:

一方面 S1, 一方面 S2, 
yī fāngmiàn S1, yī fāngmiàn S2
on the one hand S1, on the other hand S2

她一定考得上大学。一方面她很聪明，一方面她很用功。
She will certainly pass the college entrance exam. On the one hand, she is very smart; on the other hand, she is very hardworking.

他的体重不会减轻。一方面，他吃得太多，一方面他不愿意运动。
His weight will not decrease. On the one hand, he eats too much; on the other hand, he isn’t willing to exercise.
44

Expressing cause and effect or reason and result

44.1 Expressing cause and effect or reason and result in a single sentence

Mandarin uses the paired connecting words 因为/因為 yīnwei ‘because/since’... 所以 suǒyǐ ‘therefore’... to express cause and effect or reason or result. 因为/因為 yīnwei and 所以 suǒyǐ occur at the beginning of their clauses or right before the predicate. They can occur in the same sentence.

因为他没有很多钱，所以他不随便买东西。
Yīnwei tā méi yǒu hěn duō qián, suǒyǐ tā bù suíbiàn mǎi dōngxi.
Because he doesn’t have a lot of money, therefore he doesn’t casually buy things.

44.1.1 Omission of subjects in 因为/因為 yīnwei... 所以 suǒyǐ... sentences

When the subjects of the 因为/因為 yīnwei clause and the 所以 suǒyǐ clause are identical, the subject is often omitted in the second (所以 suǒyǐ) clause. In that case, 因为/因為 yīnwei is usually placed after the subject of the first clause.

我最近因为忙，所以没给你打电话。
Wǒ zuìjìn yīnwei máng, suǒyǐ méi gěi nǐ dǎ diànhuà.
Because I have been busy recently, I haven’t called you.

When the subjects of the two clauses are identical, the subject may also be omitted from the first clause. This sentence is acceptable with or without 所以 suǒyǐ.

因为有事，(所以)王先生请假了。
Yīnwei yǒu shì, (suǒyǐ) Wáng xiānsheng qǐng jià le.
Because he had business to attend to, Mr. Wang asked for time off.

44.1.2 Relative order of the 因为/因為 yīnwei and 所以 suǒyǐ clauses

The position of the 所以 suǒyǐ clause is fixed. It must come second in the sentence, after a clause that introduces the cause.

Say this  Not this

因为他是中国人，所以他学会说中国话。
Yīnwei tā shì Zhōngguó rén, suǒyǐ tā huì shuō Zhōngguó huà.
*所以他学会说中国话，因为他他是中国人

Because he is Chinese, (therefore) he can speak Chinese.
However, the 因为/因為 yīnwei clause may occur either first or second in the sentence. As the sentences above illustrate, when 因为/因為 yīnwei occurs in the second clause, 所以 suǒyǐ cannot be included in the first clause.

他会说中国话，因为他是中国人。
他會說中國話，因為他是中國人。
Tā huì shuō Zhōngguó huà, yīnwei tā shì Zhōngguó rén.
He can speak Chinese because he is Chinese.

王先生请假了，因为他有事。
王先生請假了，因為他有事。
Wáng xiānsheng qǐng jià le, yīnwei tā yǒu shì.
Mr. Wang asked for time off because he had a matter (to attend to).

Omission of the connecting words

Although you can include 因为/因為 yīnwei and 所以 suǒyǐ in the same sentence, it is often possible to have only 因为/因為 yīnwei or only 所以 suǒyǐ in a cause and effect sentence.

所以 suǒyǐ and not 因为/因為 yīnwei

我最近很忙，所以没给你打电话。
我最近很忙，所以沒給你打電話。
Wǒ zuì jìn hěn máng, suǒyǐ méi gěi nǐ dǎ diànhuà.
I have been very busy recently, so I haven’t called you.

因为/因為 yīnwei and not 所以 suǒyǐ

他因为病了，没来上课。
他因為病了，沒來上課。
Tā yīnwei bìng le, méi lái shàng kè.
Because he was sick, he didn’t come to class.

Introducing the cause or reason

The following expressions introduce a cause or reason for some situation.

因为 (noun phrase) 的关系,
因為 (noun phrase) 的關係,
yīnwei (noun phrase) de guānxi,
because of/due to (noun phrase),

因为他朋友的关系，汽车的价格减少了。
因為他朋友的關係，汽車的價格減少了。
Yīnwei tā péngyou de guānxi, qìchē de jiàgé jiǎnshǎo le.
Because of his friend, the price of the car was reduced.

(noun phrase)（之）所以 situation₁, 是因为 situation₂
(noun phrase)（之）所以 situation₁, 是因為 situation₂
(noun phrase)(zhī) suǒyǐ situation₁, shì yīnwei situation₂
(nouns phrase’s) reason for situation₁ is situation₂

有些人之所以对工作不认真，是因为缺乏责任感。
有些人之所以對工作不認真，是因為缺乏責任感。
Yǒu xiē rén zhī suǒyǐ dui gōngzuò bù rènzhēn, shì yīnwei quēfá zérèngánh.
The reason why some people don’t work conscientiously is because they lack a sense of responsibility.
Introducing the cause or reason

由于/由於 (situation)

The reason why I am not going to America is that my health isn’t good.

由于/由於 (situation)
yǒu yú (situation)

owing to, due to, because of, as a result of (situation)

由于/由於 yǒu yú may be placed before or after the subject.

由于/由於 (situation1), 所以 (situation2)
yǒu yú (situation1), suǒyǐ (situation2)

or

由于/由於 (situation1), 因而 (situation2)
yǒu yú (situation1), yīn’ér (situation2)
due to/because of (situation1), therefore (situation2)

The result may be stated first in the sentence. The reason is then introduced with 由于/由於 yǒu yú. 由于/由於 yǒu yú must be preceded by 是 shì:

(situation2) 是由于/由於 (situation1)

(situation2) shì yǒu yú (situation1)

situation2 is because of situation1

碰到一点儿困难就退缩, 这都是由于你缺乏信心。
碰到一點兒困難就退縮，這都是由於你缺乏信心。
Pèngdào yídiǎnr kùnnán jiù tuìsuō, zhè dōu shì yǒuyú yǔ quēfá xìnxīn.
(If) you retreat when you meet a little difficulty, this is because of your lack of confidence.
为了/為了 wéi le can be used to identify some noun phrase as the reason for performing some action.

为了/為了 (noun phrase)
wéi le (noun phrase)
because of/for the sake of (noun phrase)

我这样做，完全是為了你。
我這樣做，完全是為了你。
Wǒ zhèyàng zuò, wánquán shì wéi le nǐ.
My doing this is completely for you. (I’m doing this all for you.)

44.3 Introducing the effect or result

In this pattern, 为了/為了 wéi le introduces a desired effect or result.

为了 situation 起見...
為了 situation 起見...
wéi le situation qǐjiàn...
in order to, for the purpose of (obtaining the situation)

为了安全起見，绝对禁止司机酒后开车。
為了安全起見，絕對禁止司機酒後開車。
Wéi le ānquán qǐjiàn, juéduì jìnzhǐ sījī jiǔ hòu kāi chē.
For the sake of safety, drivers are absolutely forbidden to drink and drive.

44.4 Inquiring about cause or reason

To inquire about the cause or reason for something, use the following expressions:

为什么/為甚麼? wèi shénme? ‘why?’
为什么/為甚麼 wèi shénme is the most common and neutral expression used to inquire about the cause or reason for something.

你昨天为什么没来上课?
你昨天為甚麼沒來上課?
Nǐ zuótiān wèi shénme méi lái shàng kè?
Why didn’t you come to class yesterday?

你为什么还在这儿?
你為甚麼還在這兒?
Nǐ wèi shénme hái zài zhèr?
Why are you still here?

怎么/怎麼 zěnme is used to inquire about the reason for something, at the same time conveying surprise or disapproval. It may not require an answer.

他说今天来，怎么没来?
他說今天來，怎麼沒來?
Tā shuō jīntiān lái, zěnme méi lái?
He said he was coming today. Why hasn’t he come?

你不说明天?
你不說，我怎麼知道?
Nǐ bù shuō, wǒ zěnme zhīdào?
If you don’t say (if you don’t tell me), how can I know?
Inquiring about cause or reason

什么理由? / 甚麼理由? *shénme lǐyóu?* ‘what is the reason?’

什么理由/甚麼理由 *shénme lǐyóu* is used to inquire about the reason for something. When the speaker uses this expression, he or she expects an answer.

- 你有什么理由要跟我离婚?
  Nǐ yǒu shénme lǐyóu yào gēn wǒ lí hūn?
  *What is the reason why you want to divorce me?*

- 什么理由你不给我们工钱?
  Shénme lǐyóu nǐ bù gěi wǒmen gōngqian?
  *What is the reason why you haven’t given us our wages?*

凭什么? / 憑甚麼? *píng shénme?* ‘on what basis?’ ‘by what right?’

凭什么/憑甚麼 *píng shénme* is a colloquial expression, most often used in speaking.

- 你凭什么打人?
  Nǐ píng shénme dǎ ren?
  *What right do you have to hit people?*

- 你凭什么逮捕我?
  Nǐ píng shénme dàibǔ wǒ?
  *On what grounds are you arresting me?*

何故 *hégù?* and 为何/為何 *wéi hé?* ‘for what reason?’ ‘why?’

何故 *hégù* and 为何/為何 *wéi hé* are used only in formal (usually written) language.

- 他何故杀人?
  Tā hégù shā rén?
  *Why did he kill someone?*

- 为何惊慌?
  Wéi hé jīnghuāng?
  *Why are (you) so frightened?*
Expressing conditions

45

45.1 ‘If . . . then’ conditional sentences

Mandarin uses the following words to express ‘if’ in conditional sentences.

要是 yàoshi
如果 rúguó
假如 jiànrú
假使 jiǎshǐ
倘若 tǎngruò
倘使 tǎngshǐ

要是 yàoshi and 如果 rúguó are commonly used in formal and informal speech or writing. 假如 jiànrú is used in more formal speech or writing. 假使 jiǎshǐ, 倘若 tǎngruò, and 倘使 tǎngshǐ are most commonly used in formal, written Chinese.

The ‘if’ word is placed before or after the subject in the first clause of a sentence.

Mandarin does not have a word that specifically corresponds to ‘then’ in conditional sentences. Instead, the adverb 就 jiù typically occurs in the second clause, immediately before the [prepositional phrase +] verb phrase.

NOTE
便 biàn or 则/則 zé are sometimes used instead of 就 jiù before the [prepositional phrase +] verb phrase of the second clause.

Here are examples of conditional sentences.

Expressing ‘both,’ ‘all,’ ‘every,’ ‘any,’ ‘none,’ ‘not any,’ and ‘no matter how’

46.1 Expressing ‘both’ and ‘all’ with 都 dōu

Mandarin does not have separate words for ‘both’ and ‘all.’ It uses the same word, 都 dōu, to indicate that a situation is true for the entire plural subject or object. 都 dōu is an adverb and always occurs before the verb. When the sentence occurs in neutral subject-verb-object form, 都 dōu usually indicates ‘both’ or ‘all’ of the subject.

Wǒmen dōu xǐhuan tā.  
We all like him.

To indicate ‘both’ or ‘all’ of the object noun phrase using 都 dōu, ‘topicalize’ the object noun phrase by placing it before the subject.

Nà yàng de yīnyuè, wǒ dōu xǐhuan tīng.  
That kind of music, I like to listen to all of it.

Zhōngguó cài wǒ dōu xǐhuan chī.

1. In traditional characters, the character 裏 lǐ is also written as 裏 lǐ.
2. The choice of suffix is determined by the region of China and the personal preference of the speaker.
3. Mandarin has a second word for ‘in,’ 内 nèi. 内 nèi does not occur with suffixes and is very restricted in usage. It is used in fixed expressions such as:
   - 国内/國內 guónèi domestic (vs. 国外/国外 guówài foreign)
   - 内bu nèibù internal
   - 内人 nèiren my wife
**Compass direction**

The words for north, east, south, and west are also formed with a base form and a suffix. The suffix can be 面 miàn or 边/邊 biān.

The combination compass direction words (northeast, southwest, etc.) usually occur without a suffix. If a suffix occurs, it is 面 miàn or 边/邊 biān.

Location phrases may also be used to describe a noun. When used as a description, the location phrase precedes the noun, as follows:

location phrase 的 de noun
the noun at this location [or] the noun in this direction

To help you to understand this structure, the location phrase in each of the following examples is presented in square brackets. Notice that the words ‘that,’ ‘who,’ and ‘which’ that occur in the description in English are not translated into Mandarin. In Mandarin, the noun can be understood as singular or plural.

[沙发上] 的猫
[沙發上] 的貓
[shāfā shàng] de māo
the cat [(that is) on the sofa]

[房子里] 的人

Calendar time

China uses two different calendar systems. The Western calendar, called 阳历/陽曆 yánglì, is used in nearly all official and public contexts, such as school, business, publishing, civil administration, military affairs, and politics. The 阴历/陰曆 yīnlì (lunar calendar), sometimes called 农历/農曆 nónɡlì (agricultural calendar), is used to mark birthdays, and traditional Chinese holidays such as the Chinese New Year, the Dragon Festival, the Mid-Autumn festival, etc. Until the nineteenth century, the lunar calendar was the primary calendar. Nowadays, the Western calendar is more widely used than the lunar calendar, especially in urban China.

Commands

Making a command

There is no specific command form in Mandarin, but there are several ways to make a command.

The simplest way is simply to state the verb:

- 吃！ Chī! Eat!
- 说！/說！ Shuō! Speak!
- 坐！ Zuò! Sit!

The verb may sometimes be suffixed with 着/著 zhe:

- 吃着！/吃著！ Chīzhe! Eat!

Commands may also take the form of a statement followed by 吧 ba.

- 给我吧！ Gěi wǒ ba! Give (it) to me!
- 坐吧！ Zuò ba! Sit!

Note that the particle 吧 ba at the end of the sentence may also convey suggestion:

- 我们看电影吧！ Wǒmen kàn diànyǐng ba!
  Let's see a movie!

or supposition:

- 你是王老师吧。 Nǐ shì Wáng lǎoshī ba.

Context will make the function of 吧 ba clear in any given sentence.

Expressing speaker attitudes and perspectives

Mandarin uses interjections at the beginning of the sentence and syllables at the end of the sentence (sentence final particles) to indicate the attitude of the speaker toward the situation expressed in the sentence. Attitudes expressed by interjections and sentence final particles include surprise, disgust, agreement, pity, etc.

Interjections and sentence final particles stand outside of the grammar of the sentence. Their omission or inclusion never affects the grammatical status of the sentence. However, their appropriate use contributes to the naturalness of the sentence, making it sound more authentically Mandarin.

Interjections

Syllables serving as interjections always have tones. Here are some common interjections and their associated meanings.

哈 hā satisfaction

哈！还是我对！
哈！還是我對！
Hā hā! Hái shì wǒ duì ba!

TOPIC, FOCUS, AND EMPHASIS

57.1.2 Structures that identify the topic of a sentence

57.1.2.1 Topicalization

In Mandarin, a noun phrase may be identified as the topic of a sentence when it occurs at the beginning of the sentence. If another noun phrase in the sentence has the same reference as the topic, it is typically omitted. In the following sentences, the first noun phrase is the topic. The omitted phrase is indicated as ( ).

- 那个饭馆，服务不好。（）
  Nàge fànguǎn, fúwù bù hǎo. (That restaurant, the service is not good.)

- 美国大学，学费很贵。（）
  Měiguó dàxué, xuéfèi hěn guì. (In) American universities, tuition is very expensive.

- 中国长城，我听说（）冬天最美。（）
  Zhōngguó Chángchéng, wǒ tīngshuō ( ) dōngtiān zuì měi. (The Great Wall of China, I hear (it) is prettiest in the winter.)

- 汉字，我怎么写（）也写不好。（）
  Hàn zì, wǒ zěnme xiě ( ) yě xiě bù hǎo. (Chinese characters, no matter how I write them I don’t write (them) well.)

English also topicalizes noun phrases in this way, but topicalization is much more common in Mandarin than in English.

57.1.2.2 Noun phrase omission

In English, when a series of noun phrases refer to the same entity, all instances after the first reference typically occur as pronouns. In Mandarin, noun phrase omission is more common than pronounalization as a way to mark identity of reference. Noun phrase omission is one way that Mandarin identifies a noun phrase as a topic. As we saw in the previous section, noun phrases are typically omitted if they refer to the topic of the discourse.

Noun phrases are omitted when they occur in the same grammatical role as the first noun phrase.

In this example, the first reference and the omitted noun phrases are subjects of the verb:

- 张美丽每天都很忙。（）早上六点起床，（）七点出门，（）晚上九点才回家。（）
  Zhāng Měilì měitiān dōu hěn máng. (She) gets up at 6 o’clock, (she) leaves the house by 7 o’clock, and (she) doesn’t get home at night until 9 o’clock.
In this example, the first reference and the omitted noun phrase are objects of the verb:

她买了裙子，到家以后马上穿上了(_)。

她買了裙子,到家以後馬上穿上了(_).

Tā mǎi le qúnzi, dào jiā yǐhòu máshàng chuānshàng le ( _ ).
She bought a skirt; when she got home she immediately put it on.

When a noun phrase with identical reference occurs in a different grammatical role from the first instance, it occurs as a pronoun and is not omitted. In this example, the first reference is the object of 喜欢/喜歡 xǐhuàn ‘to like.’ In the second reference, it is the subject of the sentence.

我们都喜欢那个孩子。她又可爱又乖。

我們都喜歡那個孩子。她又可愛又乖。

Wǒmen dōu xǐhuān nàge háizi. Tā yòu kě'ài yòu guāi.
We all like that child. She is both cute and well behaved.

Focus

Mandarin uses the following expressions to focus or highlight a phrase. This section presents the structure and purpose of the most common focusing constructions in Mandarin.

57.2.1 把 bǎ

把 bǎ is used to indicate what a subject does to some object, while focusing on the object. 把 bǎ sentences can always be used to answer the question: ‘What did the subject do to the object?’ 把 bǎ sentences are sometimes called the ‘disposal construction.’ The structure of 把 bǎ sentences is as follows.

subject 把 bǎ object [prepositional phrase +] verb phrase

弟弟把饺子吃完了。
弟弟把餃子吃完了。

Dìdì bǎ jiǎozi chīwán le.
Younger brother ate up the dumplings.
(Younger brother took the dumplings and ate them up.)

他把桌子擦干净了。
他把桌子擦乾淨了。

Tā bǎ zhuōzi cā gānjìng le.
He wiped the table clean.
(He took the table and wiped it clean.)

The object of 把 bǎ must refer to something specific and definite.

The action must have a conclusion or completion. Therefore, 把 bǎ is often used with change-of-state verbs and verbs with resultative or directional endings.

我把他的地址忘了。(change-of-state verb)

Wǒ bǎ tā de dìzhǐ wàng le.
I forgot his address.
(I took his address and forgot it.)

他把窗户打破了。(verb with resultative ending)

Tā bǎ chuānghu dǎpò le.
He broke the window.
(He took the window and broke it.)
Mandarin often uses 把 bā when English would use a passive sentence.

For a more detailed discussion of 把 bā, see

57.2.2 Indicating exception or addition with 除了 chúle ... 以外 yǐwài

除了 chúle noun phrase 以外 yǐwài except for (noun phrase); in addition to (noun phrase)

This expression introduces an exception to a situation or an additional example of a situation. The structure itself is the same whether it focuses on an exception or an example. The context of the sentence makes it clear whether the sentence is providing an exception or an additional example.

• The noun phrase that follows 除了 chúle may be the subject, a ‘time when’ expression, or the object of the verb.
• The full expression includes both 除了 chúle and 以外 yǐwài. However, either phrase may be omitted.
• 也 yě or 都 dōu typically occurs in the predicate.

除了 chúle . . . 以外 yǐwài marking exception: ‘except for noun phrase’

除了 chúle + subject

除了爷爷以外, 我们全家都去中国旅游。
除了爺爺以外, 我們全家都去中國旅遊。

Except for bitter melon, my younger brother eats everything.
除了 chúle 等 marking an additional example: ‘in addition to noun phrase’
In this use of 除了 chúle 等 yǐwài, the adverb 也 yě usually occurs in the predicate.

In addition to the evening, he also surfs the web during the day.

除了 chúle + object

除了苦瓜以外，我弟弟也吃辣椒。

Chúle kǔguā yǐwài, wǒ dìdi yě chī làjiāo.
Besides bitter melon, my younger brother also eats hot peppers.

57.2.3 indicating inclusion with 连/連 lián

连/連 lián noun phrase 也/都 yě/dōu [+ prepositional phrase +] verb phrase
even noun phrase does verb phrase [+ prepositional phrase]

连/連 lián is used to indicate that a noun phrase is included in the situation described by the verb phrase. The noun phrase that follows 连/連 lián may be the subject, a ‘time when’ expression, or the object of the verb. 也 yě or 都 dōu typically occurs in the predicate.

连/連 lián + subject noun phrase

人人都喜欢吃中国饭。连外国人也喜欢。
人人都喜歡吃中國飯。連外國人也喜歡。

Rén rén dōu xǐhuan chī Zhōngguó fàn. Lián wàiguórén yě xǐhuan.
Everyone likes to eat Chinese food. Even foreigners like to (eat Chinese food).

连/連 lián + ‘time when’ expression

我弟弟甚麼都吃。連苦瓜也吃。

Wǒ dìdi shénme dōu chī. Lián kǔguā yě chī.
My younger brother eats anything. He even eats bitter melon.
Focusing with 是 shì or 是...的 shì...de

是 shì, or 是...的 shì...de together, focus on some detail of an event: the time, the place, the actor, etc.

The phrase that is focused occurs immediately after 是 shì.

If the sentence refers to a situation in past time, 的 de occurs at the very end of the sentence, or immediately after the verb. In the following examples, the phrase that is focused is emphasized.

Focus on the subject

是他给我们介绍的。
是 héi gěi wǒmen jièshào de.
It was he who introduced us.

Focus on the place

我是在中国学中文的。
Wǒ shì zài Zhōngguó xué Zhōngwén de.
It was in China where I studied Chinese.

Focus on the ‘time when’

他是去年买的那本书。
Tā shì qùnián mǎi de nà běn shū.
It was last year when he bought that book.

Focus on the prepositional phrase

我是跟朋友看电影的。
Wǒ shì gēn péngyou kàn diànyǐng de.
It was with friends that I saw the movie.

是 shì may be omitted, unless it is negated.

这双鞋(是)在王府井买的。
Zhè shuāng xié (shì) zài Wángfǔjǐng mǎi de.
These shoes were bought in Wangfujing.

这双鞋不是在王府井买的。
Zhè shuāng xié bù shì zài Wángfǔjǐng mǎi de.
These shoes were not bought in Wangfujing.
Emphasis

If the object of the verb is a pronoun, the de can only occur after the pronoun, at the end of the sentence.

Say this

你是在哪儿认识他的?
Nǐ shì zài nǎr rènshi tā de?
Where did you meet him?

Not this

*你是在哪儿认识的他?
Nǐ shì zài nǎr rènshi de tā?

When the sentence refers to a non-past event, the shi alone can be used to focus a phrase.

我是明年毕业, 不是今年毕业。
Wǒ shì míngnián bìyè, bù shì jīnnián bìyè.
It is next year when I graduate, not this year.

是 shì and the de are often used to indicate contrastive focus. They contrast some situation with another situation. Is shi or not bù shi occurs before each of the phrases that is being contrasted.

这件衣服, 我不是在西班牙买的。我是在法国买的。
Zhè jiàn yīfu, wǒ bù shì zài Xībānyá mǎi de. Wǒ shì zài Fǎguó mǎi de.
This article of clothing, I didn't buy it in Spain. I bought it in France.

这个字不是我写的。是王老师写的。
Zhège zì bù shì wǒ xiě de. Shì Wáng lǎoshī xiě de.
This character, it wasn't I who wrote it. It was Professor Wang who wrote it.

Emphasis

57.3

Using 是 shì for emphasis

Mandarin uses the word is shì to emphasize words or phrases in the sentence, especially when the sentence is used to confirm some previously mentioned situation. Is shi may be added before a ‘time when’ phrase, a location phrase, or a [prepositional phrase +] verb phrase to emphasize the following phrase.

In English, words that are emphasized usually receive heavy stress and falling pitch. Because Mandarin is a tone language, pitch contour cannot be used for emphasis. However, is shi often receives heavy stress when it is used for emphasis, and the emphasis used in the following examples is intended to convey heavy stress.

Neutral

那本书很贵。
Nà běn shū hěn guì.
That book is expensive.

我明天走。
Wǒ míngtiān zǒu.
I'm leaving tomorrow.

他很会唱歌。
Tā hěn huì chàng gē.
He can sing well.

With emphasis

那本书是很贵。
Nà běn shū shì hěn guì.
That book is expensive. (just like you said)

我是明天走。
Wǒ shì míngtiān zǒu.
I am going tomorrow.

他很会唱歌。
Tā shì hěn huì chàng gē.
He really can sing.
**57.3**

### Emphasizing the time when a situation occurs

To emphasize the time when a situation occurs, you can also put the ‘time when’ expression before the subject. This phrase order is typically used to contrast one time phrase with another time phrase.

昨天他很忙。今天他不忙。  
Zuótiān tā hěn máng. Jīntiān tā bù máng.  
Yesterday he was very busy. Today he is not busy.
The present-day roles of guest and host are based on centuries of tradition. In their simplest form, the roles are as follows: the host must take care of the guest, and the guest must accept the hospitality of the host without being a burden to the host. In practice, this means that the host must offer food and drink to the guest, must make the guest comfortable, and must escort the guest when he/she departs, and the guest must reject the hospitality of the host several times before eventually accepting it. Here are some general rules of behavior for guest and host.

- When visiting a Chinese host, the guest should bring a small gift. Items such as tea, fruit, flowers, and candy are usually appropriate. The host does not ordinarily open a gift in the presence of the guest.
- When a host invites a guest to participate in an activity for which there is a fee (dinner in a restaurant, coffee or ice cream in a café, attendance at a movie or show, transportation by taxi or train, etc.), it is understood that the host pays the bill.
- In most social situations, one of the participants typically assumes the role of host, paying the bill, ordering food or drink, paying for transportation, etc. It is expected that today’s guest will be tomorrow’s host, and the obligations (financial and otherwise) associated with the host will be reciprocated on later occasions by other members of the group. This creates a network of mutual obligations among participants and solidifies their identity as a group. It is rare for people to split the bill in China, or for individuals to pay for themselves when participating in some entertainment as part of a group. It is common for individuals to have a good-natured fight over a bill to establish the host for the occasion. The custom of ‘splitting the check’ is new and practiced only by young people, mostly in mainland China. It is called AA 制 AA zhì, the ‘algebraic average.’

Many common interactions between guest and host are conducted using ritual expressions and behavior. The most common of these are presented here. Expressions used in welcoming a guest and in saying goodbye are also used toward customers in restaurants.

### Welcoming the guest

To welcome a guest, say:

欢迎！

**Huānyíng!**

Welcome!
58.2 Offering food and drink

When the host offers the guest something to eat or drink, he or she either serves something or gives the guest a choice of beverages or food. For example:

请喝茶。
Qǐng hé chá.
Have some tea.

or

你喝可乐喝茶?
Nǐ hē kělè hē chá?
Do you drink cola or tea?

It is not polite to ask the guest whether he or she wants something to eat or drink (Would you like something to drink?), or if he or she is thirsty (Are you thirsty?). These kind of questions allow a response of ‘no,’ and imply that the host does not wish to provide food. A good Chinese host does not give the guest the opportunity to refuse hospitality.

58.3 Inviting the guest to get comfortable

To invite a guest to get comfortable, say:

请坐。
Qǐng zuò.
Have a seat.

休息一会儿。
Xiūxi yīhuìr.
Rest for awhile.

58.4 Saying goodbye and seeing the guest off

When it is time for guests to leave, the host has a ritual obligation to encourage them to stay. Guests have a ritual obligation to insist upon leaving. Expressions used in this ritual are presented below.

When guests leave, the host is expected to 送 sòng the guests, that is, to see them off. When you see guests off, you are expected to walk them a portion of the way home. Modern day interpretation requires accompanying guests at least to the doorway if not to their car or bus or train, and staying with them until they depart. Even if the host does not accompany the guest beyond the doorway, he or she does not close the door when guests walk out of the house. Instead, the host stands in view of the guests, waving, until they are out of sight.

58.4.1 Expressions that the host can say to the guest at the end of a visit

再来玩。
Zài lái wán.
Come again. (informal)
Additional expressions involving guest and host

有空再来。
有空再来。
Yǒu kòng zài lái.
Come again when you have time.
慢走。
Màn zǒu.
Don’t hurry off.
走好。
Zǒu hǎo.
Take care.

Expressions that guests can say to the host at the end of a visit

请留步。
請留步。
Qǐng liú bù.
Don’t bother to see me out.
别送。
Bié sòng.
There’s no need to see me off.

Additional expressions involving guest and host

The opposite of seeing a guest off is picking a guest up. The verb used is 接 jiē.

我今天晚上到机场去接白经理。
我今天晚上到機場去接白經理。

Giving and responding to compliments

59.1 Cultural conventions regarding praise

Traditionally, Chinese people do not say 谢谢 / 謝謝 xièxiè ‘thank you’ in response to a personal compliment of any kind. In Chinese culture, accepting a personal compliment can be interpreted as showing conceit. Thus, it is customary in China for people to reject rather than to accept compliments. To a Westerner, 谢谢 / 謝謝 xièxiè is merely thanks for the compliment. However, in Chinese culture, it is often interpreted as a boastful agreement with someone’s assessment of the quality of your abilities or possessions.

59.2 Expressions used in deflecting praise

You are expected to reject compliments and deflect praise of your accomplishments, abilities, and possessions, and to deflect praise of the accomplishments and abilities of those close to you. The following expressions are commonly used to deflect praise:

I have done nothing to deserve your compliments. (lit. ‘where? where?’)

Expressing gratitude and responding to expressions of gratitude

61.1 Expressing gratitude

In Chinese culture, you thank others for actions that benefit you or show you respect. Such actions include doing something for you, taking the time to visit or write you, or helping you in some way. In Chinese culture, you do not thank others for compliments or invitations.

61.1.1 Direct expressions of thanks

Gratitude is expressed in Chinese with the following expressions:

谢谢/謝謝 *xièxiè* ‘thank you’

谢谢你帮我忙。
谢谢您帮我忙。
*Xièxiè nǐ bāng wǒ máng.*
*Thank you for helping me.*

感谢/感謝 *gǎnxiè* ‘gratefully thank; appreciate’

非常感谢您的建议。
非常感謝您的建議。
*Fēicháng gǎnxiè nín de jiànyì.*
*I greatly appreciate your suggestions.*

表示感谢/表示感謝 *biǎoshì gǎnxiè* ‘to express thanks’

这点小礼物表示我们的感谢。请笑纳。
這點小禮物表示我們的感謝。請笑納。
*Zhè diǎn xiǎo lǐwù biǎoshì wǒmen de gǎnxiè.* *Qǐng xiàonà.*
*This little gift expresses our thanks. Please accept our humble gift.*

道谢/道謝 *dàoxiè* ‘to thank, to express thanks’

我代表我们公司向您道谢。
我代表我們公司向您道謝。
*Wǒ dàibiǎo wǒmen gōngsi xiàng nín dàoxiè.*
*I represent our company in expressing our thanks to you.*
**Indirect expressions of gratitude**

To express gratitude without saying ‘thank you,’ use the following expressions:

- 太麻烦你了。
  - Tàimáfānníle.
  - This caused you too much trouble. (I’ve troubled you too much.)

- 太辛苦了。
  - Tàixīnkǔle.
  - or
  - 辛苦你了。
  - Xīnkǔnǐle.
  - This was really a lot of work for you.

- 真不好意思。
  - Zhēnhùhǎoyìsi.
  - I’m really embarrassed (to have caused you trouble).

**Replying to expressions of gratitude**

In Chinese, it is considered presumptuous or rude to accept compliments, praise, and expressions of gratitude. Chinese does not have an expression equivalent to ‘you’re welcome’ in English. Common appropriate responses to expressions of gratitude include the following:

- 不谢。 没事。 没什么。  
  - Don’t thank me. It wasn’t anything. (It was nothing.)

- 不客气。 不必客气。 你太客气了。  
  - Don’t be polite. Don’t be polite. You are too polite.

- 哪里。 哪儿的话？  
  - Nǎlǐ. Nárdehuà  
  - It was nothing. What kind of talk is that?
In Chinese culture, people are connected through a web of obligations and mutual social debt often referred to as 关系/關係 guānxi ‘relationships’ or ‘connections.’

This social debt is created by invitations, favors, and requests, big and small, that have been offered and accepted by others. They include buying small items for someone such as coffee, soft drinks, or ice cream, helping someone complete a task, inviting someone to dinner, or facilitating an introduction. By accepting an invitation or favor, or by making or agreeing to a request, you enter into a relationship that obliges you to reciprocate at some time in the future.

The Chinese expression that captures this social obligation is 来往/來往 lái wǎng, as in the expression:

有来有往。
有來有往。
Yǒu lái yǒu wǎng.
To have give and take.

A friendship is based on giving and taking, and one expects a regular exchange of giving and receiving favors and assistance with a Chinese friend. When taking is not balanced with giving, the behavior is described by the Chinese expression:

有来无往，非礼也。
有來無往，非禮也。
Yǒu lái wú wǎng, fēi lǐ yě.
Taking without giving is ill-mannered and uncivil.

In many Western cultures, the relationship between favors and social obligations is not so strong. One may accept favors without creating any obligation toward the giver. English has an expression that captures this: ‘no strings attached.’ The expression means that a gift or favor comes with no obligations to the recipient. In Chinese, where relationships are built on give and take, favors often come with the expectation of reciprocation. A Chinese friend may be more generous with you than a Western friend, but will expect more from you in return.

This chapter provides the basic strategies for negotiating invitations and requests in Chinese and for forming socially acceptable refusals.

62.1 Invitations

62.1.1 Offering invitations

In English, invitations are often expressed in terms of a choice about whether or not to participate:

Would you like to have coffee with me?
In Chinese, giving the listener a choice about whether or not to participate is considered rude. It implies that the speaker does not want the listener to accept the invitation. Therefore, invitations are often worded as suggestions.

我们去喝咖啡吧！
我們去喝咖啡吧！
Wǒmen qù hē kāfēi ba!
Let’s go drink some coffee!

An invitation may also imply that the speaker will assume the role of ‘host’ and pay for any expenses involved in the activity. If the speaker specifically invites the addressee with the word 请/請 qǐng ‘please’ (lit. ‘invite’), he or she expects to pay for the activity.

我请你喝咖啡，好吗？
我請你喝咖啡，好嗎？
Wǒ qǐng nǐ hē kāfēi, hǎo ma?
Please have coffee with me.
(lit. ‘I invite you to drink coffee, okay?’)

### Accepting and refusing invitations

Words and phrases used to accept invitations include:

- 好。  行。  可以。  
  Hao.  Xing.  Keyi.  
  Okay.  Okay.  I can.

Invitations between friends are accepted or rejected without ceremony. However, in more formal circumstances, it is often not considered polite to accept an invitation at its first offer. Typically, people refuse an invitation once or twice before accepting, even if they intend to accept all along. In the same way, the one who gives an invitation does not give up after an initial refusal, but offers a second or a third time before being certain that the refusal is genuine. This cycle of refusal and re-invitation is a social ritual in which you are expected to participate.

Expressions that are commonly used for the ritual refusal of an invitation to eat or drink include:

- 不要客气。  你太客气了。  我不(吃)/(喝)。
  Bu yao keqi.  Ni tai keqi le.  Wo bu (chi)/(he).
  Don’t be polite.  You are too polite.  I am not (eating)/(drinking).

If you are a guest, you cannot ultimately refuse an offer of a snack or a non-alcoholic drink. After the ritual refusal, you must accept it, though you need not eat or drink it. If you accept an invitation for a meal, however, you must eat.

It is acceptable to provide a direct refusal to an invitation to drink an alcoholic beverage or to smoke. If you do not or cannot drink, say:

- 我不喝酒。
  Wǒ bu he jiǔ.
  I do not drink alcohol.

If you do not smoke, you can refuse a cigarette by saying:

- 我不抽烟。
  Wǒ bu chou yan.
  I do not smoke.
In general, appropriate refusals for most other kinds of invitations are indirect and involve face-saving strategies. See section 62.3 for polite ways to refuse invitations.

**Formal written invitations**

Written invitations are issued for weddings and formal dinners and events. Formal Chinese events have a fixed ending time as well as a fixed beginning time. Guests come on time and the event ends at the predetermined time. Formal events typically begin with a short formal speech announcing the commencement and end with a short formal speech announcing the conclusion.

The cover of the invitation often includes one of the following expressions that identify it as an invitation.

- 邀请 (shū/xìn) 邀请 (shū/xìn)
- 邀请 (shū/xìn) 邀请 (shū/xìn)
- yāoqǐng (shū/xìn) 邀请 (shū/xìn)

The body of the invitation includes the following expressions.

- **Expressions that say ‘formally invite’**:

  - 敬约/敬约  jìng yuē
  - 敬约/敬约  jìng yuē

Requests

Making requests of close relatives and close friends

Close relatives and close friends have an obligation to help you. Therefore, requests to close relatives and close friends are often indistinguishable from commands.

给我那本字典。

給我那本字典。

Gěi wǒ nà běn zìdiǎn.
Give me that dictionary.

Gěi wǒ bǐ yòng yī xià.
Lend me a pen for a minute.

To make a request more polite, you may preface it with 请/請 qǐng ‘please.’

请给我笔用一下。

請給我筆用一下。

Qǐng gěi wǒ bǐ yòng yī xià.
Please lend me a pen for a minute.
**62.2.2 Requesting information or assistance from teachers**

Teachers have an obligation to help you with learning so requests to teachers for information can be direct. However, they should always be polite. You can preface a request with *请教* (qǐng jiào) ‘please teach me,’ or *请问* (qǐng wèn) ‘may I ask.’

老师，请教...（这个字怎么用？）
Lǎoshī, qǐng jiào...（這個字怎麼用？）
Professor, may I ask (lit. ‘please teach me’)...

*Wáng jiàoshòu, qǐng wèn, nín de yìsi shì...*
Professor Wang, may I ask, do you mean...

**62.2.3 Face-saving strategies used in requests**

When making a request to someone outside of your close personal circle, you should leave him or her room for a graceful refusal. That is, you should allow him or her the opportunity to *留面子* (liú miànzi) ‘save face’ if he or she has to refuse you. Here are some face-saving ways to phrase requests.

- Ask if he or she has time.
  
  你忙吗? 你有空吗? 你有工夫吗?
  Nǐ máng ma? Nǐ yǒu kōng ma? Nǐ yǒu gōngfu ma?
  Are you busy? Do you have free time? Do you have free time?

- Ask if he or she has the ability to help.
  
  你能不能帮我一点忙?
  Nǐ néng bu néng bāng wǒ yīdiǎn máng?
  Can you help me?

- Be humble
  
  The use of *求* (qiú) ‘to beg’ makes this request more humble.
  
  我有一点事要求你。
  Wǒ yǒu yīdiǎn shì yào qiú nǐ.
  May I ask you a favor? (lit. ‘I have a little matter that I seek your help with.’)

**62.3 Refusals**

It is not always possible to grant a request, but it is important to phrase a refusal in such a way that it saves face for all parties involved. Here are common ways to do so.

- **Promising to try**
  
  A promise to try leaves open the possibility that your request may be granted at some point. Here are some responses that promise to try.

  我试试看。 我试一试。 我尽力做。
  Wǒ shì shì kàn. Wǒ shì yī shì. Wǒ jìnlì zuò.
  I’ll see what I can do. I’ll try. I’ll try my best.
This promise to try is more formal:

尽力而为。

尽力而為。

Jìnlì’érwéi.

I will do everything possible. (formal)

- Pleading a lack of understanding
  This kind of response is a common way to avoid answering a request for information.

我不太清楚。

Wǒ bù tài qīngchu.

I’m not too clear about that.

- Postponing the decision
  These responses are used to postpone a decision to another time.

我们考虑考虑。

我們考慮考慮。

Wǒmen kǎolǜ kǎolǜ.

We’ll think about it.

以后再说吧。

以後再說吧。

Yǐhòu zài shuō ba.

Let’s talk about it again another time.

现在有一点不方便。

現在有一點不方便。

Xiànzài yǒu yídìǎn bù fāngbiàn.

It’s a little inconvenient right now.

- Pleading an inability to perform the task

我做不了。

Wǒ zuòbuliǎo.

I am unable to do it.

我恐怕帮不了你的忙。

我恐怕幫不了你的忙。

Wǒ kǒngpà bāngbùliǎo nǐ de máng.

- Pleading a time conflict

我現在有別的事。

Wǒ xiànzài yǒu biéde shì.

恐怕我太忙。

Kǒngpà wǒ tài máng.

Abandoning a request

我没有时间。
我没有時間。
Wǒ méi yǒu shíjiān.

对不起，我(那天)有事。
對不起，我(那天)有事。
Duìbuqǐ, wǒ (nà tiān) yǒu shì.
Sorry, I have something to do (that day).

To indicate that your explanation is genuine, and that you really do not have the knowledge, ability, time, or connections required to comply with a request, add 真的 zhēnde to your refusal.

我真的不会。
我真的不會。
Wǒ zhēnde bù huì.
I really can’t do it.

我真的不懂。
Wǒ zhēnde bù dǒng.
I really don’t understand.

You can soften a refusal with an apology by saying:

不好意思。
Bù hǎo yìsi.
I’m embarrassed about this.

or

对不起。
對不起。
Duìbuqǐ.
Excuse me.

不好意思 bùhǎoyìsi indicates the speaker’s discomfort at not being able to comply with a request.

Abandoning a request

To abandon a request and indicate that you will not ask anymore, say:

算了(吧)。 不要紧。
不要緊。
没关系。
Suànle (ba). Bù yàojīn.
Forget it. It is not important. It is not important.

62.4
Expressing apologies, regrets, sympathy, and bad news

63.1 Apologies and regrets

Cultures differ in the kinds of things that people are expected to apologize for. This chapter presents the types of situations for which an apology is expected and provides expressions of apology that can be used in these situations.

Note that in Chinese culture, you are not expected to apologize for or otherwise acknowledge bodily functions such as coughs, sneezes, belches, flatulence, etc. In response to someone’s sneeze, you can use the following expression:

百岁。/百歲。
Bǎi suì.
(May you live to be) 100 years old.

If someone sneezes a second time, you can say:

千年。/千歲。
Qiān suì.
(May you live to be) 1000 years old.

63.1.1 Apologizing for showing disrespect: 对不起/對不起 duībuqǐ

对不起/對不起 duībuqǐ is the appropriate apology for actions that show disrespect toward another, including:

• Physical actions: bumping into someone, stepping on someone’s foot, spilling something on someone, etc.
• Inappropriate behavior: interrupting someone, ending a conversation, etc.
• Imperfect performance: work done poorly, language spoken poorly, comprehension difficulty, etc.

对不起。我中文说得不好。
对不起。我中文說得不好。
Duībuqǐ. Wǒ Zhōngwen shuō de bù hǎo.
Excuse me. I speak Chinese poorly.

对不起。我不懂。
对不起。我不懂。
Duībuqǐ. Wǒ bù dǒng.
I’m sorry. I don’t understand.

对不起。我耽误了你。
对不起。我耽误了你。
Duībuqǐ. Wǒ dānwù le nǐ.
Excuse me. I’ve caused you to be delayed.
Apologies and regrets

Reply to 对不起/對不起 duibuqǐ by saying:
没事。 没关系。 不要紧。  
It’s nothing. It’s not important. It’s not important.

63.1.2 Apologizing for refusals: 不好意思 bù hǎo yìsi

不好意思 bù hǎo yìsi acknowledges embarrassment on the part of the speaker. It is commonly used when the speaker refuses an invitation or turns down a request for assistance.

Wáng: 今天下午跟我去喝咖啡吧。
Wang: Have coffee with me this afternoon.
Lín: 不好意思。我今天下午有事。
Lin: How embarrassing. This afternoon I’ve got something to do.

There is no formulaic response to 不好意思 bù hǎo yìsi.

63.1.3 Apologizing for mistakes or wrongs: 抱歉 bàoqiàn and 道歉 dàoqiàn

抱歉 bàoqiàn and 道歉 dàoqiàn acknowledge a wrong to another and acknowledge personal responsibility for the wrong. Formal and written contexts often call for 抱歉 bàoqiàn or 道歉 dàoqiàn. Many speakers of Mandarin use these two words interchangeably. Here are expressions in which these words are used.

抱歉。 抱歉。我来晚了。
I apologize. I’ve arrived late.

真抱歉。 我向你道歉。
Zhēn bàoqiàn. Wǒ xiàng nǐ dàoqiàn.
I really apologize. I apologize to you.

The use of the more formal preposition 向 xiàng ‘toward’ in the prepositional phrase 向你 xiàng nǐ ‘toward you’ makes this structure more formal.

The appropriate response to 抱歉 bàoqiàn or 道歉 dàoqiàn is the same as the response to 对不起/對不起 duibuqǐ:
没事。 没关系。 不要紧。  
It’s nothing. It’s not important. It’s not important.
63.1.4 Asking for forgiveness: 请原谅我/請原諒我 qīng yuánliàng wǒ ‘please forgive me’

请原谅我/請原諒我 qīng yuánliàng wǒ is used in an apology acknowledging personal responsibility for an action that negatively affects others.

The response to this kind of apology is the same as for 对不起/對不起 duìbuqǐ, 抱歉 bàoqiàn, and 道歉 dàoqiàn.

63.2 Expressing sympathy

To acknowledge a bad situation that another is experiencing, say:

真可惜。
Zhēn kěxī.
What a pity. What a shame.

To express sympathy when another is ill, say:

多保重身體。
Duō bǎozhòng shēntǐ.
Take care of your health.

希望你早日康复。
Xīwàng nǐ zǎo rì kāngfù.
I hope your health is soon restored.

63.3 Conveying bad news

To introduce bad news or a negative situation use 怕 pà ‘to fear’ and 恐怕 kǒngpà ‘to be afraid that.’ Notice that 怕 pà requires a subject and 恐怕 kǒngpà does not take a subject.

(subject) 怕 pà situation

这件事, 我怕他做不好。
Zhè jiàn shì, wǒ pà tā zuòbùhǎo.
I am afraid that he won’t be able to do this job well.

我怕你这次考得不好。
Wǒ pà nǐ zhècì kǎo de bù hǎo.
I am afraid that this time you didn’t do well on the exam.

我怕我帮不了你的忙。
Wǒ pà wǒ bāngbuliǎo nǐ de máng.
I am afraid that I can’t help you.

恐怕 kǒngpà situation

恐怕明天会下雨。
